The University of Texas was opened in September, 1883, at Austin, pr steps having been taken in 1881 by the legislature, which provided for the of its location by vote of the people, for its endowment, and for the appoi régents, who were to contract for a suitable building, elect a faculty, and t necessary action. In accordance with the decision of the voters, the acad law departments were located at Austin and the medical department at G The endowment of the university is to comprise the proceeds of a million ac public domain, besides other lands appropriated by the Republic of Texas in by the State constitution in 1876. The law provides that the university shal to young men and women on equal terms and that tuition shall be free. part of the public school system of the State, the university aims to establis connection with the public schools, and it is designed that as soon as pr graduates from approved schools shall be admitted without examination. demic department comprises instruction in literature, science, and the art ganization being that of distinct schools, of which there are 6, leading to th of B. A., B. S., B. L., B. LIT., and M. A. The studies of the first 2 years scribed for candidates for a degree; after that, choice is allowed on advice faculty.

The other colleges and universities reporting are St. Mary's University, G Southwestern University, Georgetown; Baylor University, Independence; M Male and Female College, Mansfield; Salado College, Salado; Austin Colle man; Trinity University, Tehuacana; Waco University, Waco; Marvin Waxahatchie; and Add Ran College, Thorp's Spring, which for the first time in the list of collegiate institutions. Five of the above are for young m Southwestern University, however, providing an annex for young women; t 5 admit both sexes on equal terms. Of these Waco University provides a s different course for young women, supposed to be more suitable for them, wh to the degree of maid of art; while Trinity University and Marvin Colle shorter course, with the degree of mistress of English literature, to those wh desire to take the regular one.

All the above colleges present preparatory departments and classical cou years, or that which amounts to the same, a number being arranged on th independent schools. Modern languages form a part of the course in nearly music, the fine arts, and business instruction, in many.

For statistics, see Table IX of the appendix; for a summary of them, the the Commissioner preceding.

INSTITUTIONS FOR THE SUPERIOR INSTRUCTION OF YOUNG WOMEN.

The collegiate institutions exclusively for young women are Dallas Female Dallas; Ursuline Academy, Galveston; the Ladies' Annex of Southwestern *sity, Georgetown* (above referred to); Baylor Female College, Independence

system, with its graded schools and better pay for teachers. There were 77 fewer teachers who had attended the State normal schools, but there was an increase in average daily attendance in 1883–'84. The superintendent says that, while the needs of the ungraded schools, in which are nearly six-sevenths of the whole enrolment of the State, are many and great, there are signs of improvement even in these. On the whole, the people show more interest; there is greater demand for well qualified teachers; 7 more towns have changed from the district to the town system, making 19 in all. Nearly every town superintendent reporting advocates the town system and the introduction of free text books.

ADMINISTRATION.

The school officers are, for the State, a superintendent of education, elected at each biennial session of the general assembly; for towns, superintendents, elected for 1-year terms; for counties, examining boards, with clerks; for districts, moderators, clerks, collectors of taxes, treasurers, 1 or 3 auditors, and prudential committees.

In towns where the district system has been abolished there are boards of 3 or 6 directors; and any town having a high or central school elects for such school a prudential committee of 3, with annual change of 1. Women have the same right as men to vote in all school district meetings and in election of school commissioners in towns and cities, and the same right to hold school offices. A town at its annual meeting may abolish the district system in such town. Unless otherwise instructed, every child of good health and sound mind between 7 and 14 years of age is required by law to attend a public school at least 3 months in the year. A district may establish evening schools, each evening to be regarded as a half day session of a public school.

SCHOOL FINANCES.

Public schools are sustained by district and town taxation and the income from town school funds and from the United States deposit fund. The interest on the last is apportioned to towns according to population, while one-half of the town school money, if it does not exceed $1,200, or, if it does, one-third of it, is equally divided among the districts of such towns. The remainder is divided among the districts according to the attendance of the children of school age during the previous year. Towns failing to assess school taxes forfeit to the county a sum equal to double the amount required to be raised by such tax, to be recovered by the county court. No public money of any town is to be distributed to any school district employing a teacher without the certificate required by law, nor to any district whose register does not contain the certificate of the town superintendent. No money raised on the grand list may be apportioned for the maintenance of strictly sectarian or religious schools.

NEW LEGISLATION.

The legislature of 1882 provided that books recommended by the text book committees of the towns in 1879 be the authorized text books till November, 1889, and that all others be prohibited. As to studies, the law, as amended, provided that one or more schools shall be maintained in each town for instruction of the youth in good behavior, reading, writing, spelling, English grammar, geography, arithmetic, free-hand drawing, history, and Constitution of the United States and of the State of Vermont, and in elementary physiology and hygiene, with explanation of the effects of stimulants and narcotics on the human system. The time for such instruction was made to cover at least 20 weeks in each school year. The time allowed each teacher to attend a teachers' institute, held in pursuance to law, and reckoned as so much time in teaching, was limited to 3 days.

In distributing public money the selectmen were required to reckon the school year from March 20 to March 19. The selectmen of any town were authorized to divide, unite, or otherwise alter school districts in their town on the petition in writing of a majority of the legal voters. School directors were authorized to provide for the conveyance of pupils to and from the public schools at the expense of the town. At the session of 1884 it was enacted that each town in which the district system exists shall, at the annual meetings of the town in 1885 and 1886, vote upon the question of adopting the town system.

SCHOOL SYSTEMS OF CITIES WITH 7,500 OR MORE INHABITANTS.

ADMINISTRATION.

Burlington has a board of school commissioners of 6, 1 from each of the 5 wards and the city superintendent; Rutland, a board of education of 9 members, with a city superintendent.

STATISTICS.

1882–'83.

Cities.	Population, census of 1880.	Children of school age.	Enrolment in public schools.	Number of teachers.	Expenditure.
Burlington	11,365	a3,258	1,526	42	$20,462

1883–'84.

Burlington	11,365	a3,258	1,603	48	20,727
Rutland	12,149	.....	2,776	70	24,500

a Census of 1878.

ADDITIONAL PARTICULARS.

The city superintendent of *Burlington* says that the schools are maintaining their reputation of past years, the general condition being somewhat improved. Special attention has been given to the health and comfort of pupils. The effort to lead them to act and work independently has been continued. Greater prominence has been given to topics which are essential or important. In school property no changes are reported, though there was great need of enlarged accommodations. The efficiency of the system does not appear to be as great as could be wished, as in 1883–'84 only 49.20 per cent. of the school youth enumerated 5 years before were enrolled in the public schools, or 1,603, against 1,000 in private and church schools. Adding both together and allowing for the increase of school youth since the census of 1878, the report estimates that nearly 1,000 children of school age were out of school.

Rutland grades its public schools as primary, secondary, and intermediate, each of 2 years, and grammar and high, each of 3 years. Statistics of 1883–'84 show a gain of 237 enrolled over 1882–'83 and of 4 in teachers, but a reduction of $3,721 in expenditure for schools.

KINDERGÄRTEN.

None of these useful aids to early training of children are reported from this State.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL STATE REQUIREMENTS.

A certificate of graduation from the lower course of a normal school or of a training department of a graded school is a license to teach in the common schools of the State for 5 years; one from the higher course of such schools is a license for 10 years.

A county license for 5 years may be issued by the board of examiners chosen at the annual meeting of town superintendents of each county. Candidates must pass an examination on all the branches required by law to be taught in the common schools, and also in drawing and methods of teaching; they must, if men, be 20 years of age; if women, 18. A town certificate of qualification may be given to any one passing a satisfactory examination on the questions selected at the annual meeting of the town superintendents of the county. Except in the case of principals of graded and union schools, a teacher must hold one of the above certificates to make a valid contract for teaching.

STATE NORMAL TRAINING.

The State sustains 3 normal schools, at Castleton, Johnson, and Randolph. The reports for 1882–'83 and 1883–'84 show an aggregate attendance for the 2 years of 836 and 177 graduates. In courses of study, gradation of classes, regularity of attendance, and thoroughness of professional work, all report an advance over any previous year, while they as uniformly call for larger appropriations to supply real needs for a full normal training. The State superintendent suggests that there be 1 normal school wholly under the control of the State, and that the money now expended on the three be united on one.

For full statistics of each of the above schools, see Table III of the appendix; for summaries of same, the report of the Commissioner preceding.

OTHER NORMAL TRAINING.

In counties where there is no normal school a training school department may be *organized* in a legal graded school under the direction of the State superintendent,

ɔurses of study to be similar to those of the normal schools and the certificates ɔduation to have a similar force as those of normal schools. No reports of such tments have come to this Office.

INSTITUTES AND EDUCATIONAL MEETINGS.

required by law, 1 institute and 79 educational meetings for the instruction chers were held under the general supervision of the State superintendent in years under review. The institute held at Bradford for four days was well led, and is said to have been ably instructed by a large number of leading edu-, assisted by several teachers and classes from the schools. Of the other meet-o special mention is made, except that those at Newport, Irasburg, Bethel, and r were held in connection with county associations.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

the two years under consideration 28 public high schools are reported in the with an aggregate attendance of 1,825. Of these, 466 studied Latin, 64 Greek, ench and German; 137 were graduated and 36 fitted for college. Thirteen of ɔols had an aggregate of 3,783 volumes in libraries.
statistics of business colleges, private academic schools, and preparatory de-ɔnts of colleges, see Tables IV, VI, and VII of the appendix; for summaries of he report of the Commissioner preceding.

SUPERIOR INSTRUCTION.

COLLEGES FOR YOUNG MEN OR FOR BOTH SEXES.

University of Vermont and State Agricultural College, Burlington, continues its ɔtion in departments of art, applied science, and medicine, the first two open nen on equal terms with men. The department of art comprises the usual nic course of 4 years, leading to the degree of A. B. Candidates are admitted mination, on certificate of graduation from preparatory schools whose courses lies meet the requirements, on certificate of honorable dismissal from some ɔollege or on evidence of proficiency in the studies proposed to be continued by ndidate. All male students are required to take part in military drill and in-on 2 hours each week. Through the liberality of John P. Howard, esq., the ɔollege building has been reconstructed at an expense of more than $40,000. ɔrary contains 21,000 volumes, 12,000 of which were from that of the late Hon. ɔ P. Marsh, presented to the university by Hon. Frederick Billings, of Wood-who has also given $100,000 for a suitable building to contain the whole col-

llebury College in 1882–'83 and 1883–'84 continued to confine its instruction to an led classical course of 4 years, with high standard for admission. In all the stud-the departments in which honors are sought, a general average of 75 per cent. uired for "simple honors" and of 90 per cent. for "higher honors." During 4 $1,500 from the estate of Rev. Thomas A. Merrill were paid to the college for provement of elocution. The college library, recently increased by liberal do-s from the alumni, now contains more than 15,000 volumes.
e College, Northfield, though largely scientific, offers the usual academic course erican colleges.
statistics of the above, see Table IX of the appendix; for a summary of same, ɔort of the Commissioner preceding.

SUPERIOR INSTRUCTION OF YOUNG WOMEN.

Vermont Methodist Seminary and Female College, Montpelier, a preparatory of high standard, offers opportunities to fit for college, for business, or for the l duties of life. Its courses of study include, besides 2 preparatory, each of 3 2 collegiate courses, each of 4 years, including normal instruction for teachers. ers on lady students who complete these collegiate courses the degrees of mis-f liberal arts and mistress of English literature. For statistics, see Table VIII appendix.

SCIENTIFIC AND PROFESSIONAL INSTRUCTION.

SCIENTIFIC.

State Agricultural College of Vermont, in its department of applied science, offers ɛtion in courses of civil engineering, theoretical and applied chemistry, agri-e and related branches, and metallurgy and mining engineering, each of 4 years. tinues its special winter course for young men who cannot leave their farms

in summer and fall. The topics in this course are agricultural chemistry, botany, physics, entomology, stock breeding, dairying, fruit culture, road making, farm accounts, and bee culture. Representatives of the college coöperate with the State board of agriculture in attending farmers' meetings during the winter, giving special attention to fertilizers with reference to experiments conducted by the college on farms throughout the State.

Lewis College, Northfield, largely scientific, has courses in science and civil engineering, in mining engineering, in chemistry and physics, in metallurgy, in science and literature, and in arts, each of 4 years. Military instruction is given in all the courses.

For statistics of these schools, see Table X of the appendix; for a summary of same, the report of the Commissioner preceding.

PROFESSIONAL.

No schools of *theology* or *law* report from this State.

The *medical department of the State university* in 1883–'84 shows 18 professors and instructors; 2 annual terms of 17 weeks required; a 3-year graded course recommended; no requirements for admission; for graduation, the usual 21 years of age, good moral character, and 3 years of study, with the passage of a final satisfactory examination. Matriculates, 230; graduates, 100; a gain in the former of 26 and in the latter of 32 over 1882–'83.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEFECTIVE CLASSES.

Vermont continues to provide for the education of its defective classes in other States. Its deaf-mutes are cared for in the American Asylum, at Hartford, Conn.; its blind, in the Clarke Institution, at Northampton, Mass., and the Perkins Institution, Boston; and its feeble-Minded children in the Massachusetts School for Idiotic and Feeble-Minded Youth, South Boston.

REFORMATORY TRAINING.

The Vermont Reform School, Vergennes, sends no report since 1881–'82, at which time there were 146 boys and 26 girls under the usual instruction in common school branches and the ordinary industries of such institutions.

EDUCATION OF ORPHAN AND DEPENDENT CHILDREN.

Of the 2 institutions of this character, Providence Orphan Asylum and the Home for Destitute Children, both supported by private contributions, only the latter makes return for 1883–'84. This shows 13 instructors and 538 inmates since foundation in 1865. The Roman Catholic Directory showed 86 orphans in the Providence asylum in 1883.

For statistics of schools that may have reported, see Table XXII of the appendix; for a summary of same, the report of the Commissioner preceding.

EDUCATIONAL ASSOCIATION.

VERMONT STATE TEACHERS' ASSOCIATION.

The thirty-fourth annual meeting of this body was held at Montpelier October 23–26, 1883. The following topics, among others, are said to have been ably discussed: "What preparation do colleges expect from the high schools and academies?" "What constitutes a practical education?" "Relation of classical to scientific studies," "English literature as an element in education," "How can ungraded schools become graded?" "How can pupils be best taught to think?" "What should a teacher do before the first day of school?" and "Methods of inciting to diligence and order."

Mr. A L. Hardy, principal of West Randolph graded school, is reported to have made an interesting and suggestive exhibit of the practical work in the school room. Samples of penmanship by primary scholars and composition by young pupils, which were submitted, are said to have been highly creditable, the latter being grammatically and gracefully expressed; samples of map and technical drawing of a high order were also exhibited. It was resolved that a more efficient supervision of schools is a pressing need of the educational system; that the establishment of village and town libraries in various parts of the State is noted with great satisfaction; that the town system of schools be earnestly favored and hearty efforts pledged to secure its adoption throughout the State; and that untiring efforts be put forth in favor of temperance instruction in schools.

CHIEF STATE SCHOOL OFFICER.

Hon. JUSTUS DARTT, *State superintendent of education, Springfield.*

[Second term, December, 1882, to December, 1884.]

VIRGINIA.

a State census of 1880.
b Montgomery County fails to report sex.

reports of Hon. Richard R. Farr, State superintendent of public instruction, two years indicated.)

STATE SCHOOL SYSTEM.

GENERAL CONDITION.

tatistical summary shows a very gratifying as well as steady increase in all s to make up an efficient school system. As the State school census is only nce in 5 years, that of 1880 is used. The enrolment and attendance, as well

as the number of public schools and teachers, have largely increased. More of the schools were graded and over 1,600 more pupils were studying the higher branches. The percentages of school youth enrolled and of those enrolled in average daily attendance are not yet what could be wished, but on the whole there is advance instead of retrogression.

ADMINISTRATION.

The general supervision of the public schools is vested in a superintendent of public instruction, elected by the general assembly for 4 years; in a State board of education, consisting of the governor, superintendent, and attorney general; in county superintendents, appointed quadrennially by the board and confirmed by the senate; and in boards of district school trustees and subdistrict directors, each of 3 members, the former chosen by a county electoral board, the latter by the voters of the subdistricts. The schools are free to all persons of school age, the law requiring separate schools for colored pupils. The school census is taken every five years, and the State funds are apportioned on the basis of the number of school age shown by this census.

SCHOOL FINANCES.

The schools are supported from the proceeds of a State literary fund, a capitation tax not to exceed $1 on all voters, and a property tax of not less than 1 nor more than 5 mills on $1, as the general assembly may direct. County and district funds are derived from fines, penalties, and donations, and a tax not to exceed 10 cents on $100. Telegraph and railroad companies are liable to a tax for school purposes. Cities and towns may levy for the support of public schools a tax not to exceed 3 mills on $1 and a capitation tax not more than 50 cents for all school purposes.

AID FROM THE PEABODY FUND.

In 1882–'83 the State received $4,125 from the Peabody fund, with the stipulation that $2,000 should be used for Nashville scholarships, $1,525 for teachers' institutes, $500 for Hampton Normal Institute, and $100 for the Educational Journal. In 1883–'84, from this source came $1,700 for scholarships, $2,000 for institutes, $500 for Hampton Normal, and $2,000 for Farmville Normal School.

SCHOOL SYSTEMS OF CITIES WITH 7,500 OR MORE INHABITANTS.

ADMINISTRATION.

All cities of 10,000 inhabitants must and all others may have a city superintendent of schools, appointed by the State board of education and confirmed by the senate. The school affairs of such cities are managed by a board of not more than 3 trustees from each ward.

STATISTICS.

1882–'83.

Cities.	Population, census of 1880.	Public schools.	Children of school age.	Enrolment in public schools.	Average daily attendance.	Number of teachers.	Expenditure.
Alexandria	13,659	28	4,582	1,522	1,136	28	$13,127
Danville	7,526	20	2,126	1,035	530	20	11,692

Richmond	63,600	159	21,536	8,153	6,760	159	81,000

ADDITIONAL PARTICULARS.

Alexandria in 1883–'84 had 29 school rooms, with 1,800 sittings, valued at $53,000. The schools were taught 200 days. The total receipts exceeded the expenditures by $2,992.

Danville reported 1 high, 9 grammar, and 11 primary schools, with accommodations for 1,260 pupils. The schools were taught 196 days. Enrolment in private schools, 326. Valuation of public school property, $20,000. Receipts for the year were $119 in excess of expenditure.

Lynchburg had 40 school rooms, with 2,000 sittings. The schools, classed as primary, grammar, and high, were taught 196 days. Estimated enrolment in private schools, 360.

Norfolk in 1883–'84 reported 18 schools for whites and 10 for colored, taught by 6 men and 22 women, with an average monthly salary of $92.98 for men and $52.15 for women. The schools, primary and grammar, were taught in 7 buildings, valued at $63,000. Private and church schools enrolled 2,447. Although no high school was reported, 140 white and 73 colored pupils were studying the higher branches.

The superintendent said, at the close of 1882–'83, that the accommodations for pupils were far below the needs of the city, that hundreds of children who applied for admission had to be turned away, and that many more would probably have applied had they not known that it would be useless.

Petersburg in 1883–'84 had 20 schools for whites and 21 for colored, taught 180 days, in 10 buildings, valued at $67,000. Of the 1,979 pupils in attendance upon the public schools, 94 white and 93 colored pupils were studying the higher branches.

Portsmouth reported 10 schools for whites and 4 for colored, taught 191 days, by 4 men and 10 women, with an average monthly salary of $82.50 for the men and $42.50 for the women. The schools were classed as primary, grammar, and high, and occupied 14 buildings, with 1,100 sittings for study. Private schools enrolled 819 pupils.

Richmond in 1883–'84 reported 12 buildings occupied by primary and grammar and 2 by high schools. The former contained 128 rooms and the latter 15; total number of sittings for study, 7,201. The schools were taught 184 days, by 28 men and 131 women, with an average monthly salary of $70.92 for the former and $42.86 for the latter. The superintendent calls attention to the efficiency of the teachers and their small salary, and urges that they be better paid. He further says that the public schools are growing in popularity, and most of the buildings are crowded largely in excess of their seating capacity. Private and church schools enrolled 8,153. Public school property was valued at $297,510. Receipts exceeded expenditure by $43.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL STATE REQUIREMENTS.

No one is eligible to teach a State free school unless he presents to the trustees, or to the patrons at a called meeting, a certificate from the county or city superintendent in charge of the school that he desires to teach, showing ability to teach at least the branches required in that school.

Examination for such certificates must be held in spelling, reading, writing, arithmetic, grammar, geography, and history; and, if the applicant desire to take charge of a school in which higher branches have been introduced, he must also be examined in such branches.

STATE NORMAL TRAINING.

A State normal school for white girls, authorized by the legislature of 1882–'83, was organized June 10, 1884, to be opened at Farmville in October. It is designed to prepare teachers for the public schools of the State. The law gives to each city of 5,000 inhabitants and to each county the privilege of sending one or more students, according to the number of its members in the house of delegates, these State students to receive free tuition. The school will consist of an elementary and an advanced course, each of 2 years; a model school; and the extra studies of French, German, music, painting, and drawing. All State students must agree, on entering, to teach at least 2 years in the public schools of the State after graduation. The school is to have the valuable services of Dr. W. H. Ruffner, long the superintendent of the schools of Virginia, as principal.

A State normal school for colored pupils was authorized by the legislature of 1881–'82, and was to receive from the State $100,000 for buildings and maintenance. In consequence of this it was to be under the control of 7 visitors appointed by the governor, 6 of them well educated colored men. It has been since established under the title of the Virginia Normal and Collegiate Institute, Petersburg, and presents courses, normal and academic, of 3 years each. Connected with it by legislative act is a summer normal course of 8 weeks each year, to be conducted by the president and faculty, with such trained assistants as the State superintendent may think proper, and all colored teachers in State schools must attend it for at least one month in every year. Failure to attend for 5 consecutive years is to work a forfeiture of license, and no new teacher may take charge of a State school till he has attended at least one session of this normal course, the first session of which began July, 1884, and continued 6 weeks, enrolling 53 men and 60 women.

OTHER NORMAL TRAINING.

Other normal schools reporting are the *Virginia Normal School*, Bridgewater; *Hampton Normal and Agricultural Institute*, Hampton; *St. Stephen's Normal School*, Petersburg; and *Richmond Normal School*, for colored pupils. The first named offered a 2-year course. Hampton, for colored and Indian youth, with a 3-year normal course, in 1882–'83 had in this 507 pupils, 295 in day and 212 in evening classes, the senior class receiving daily instruction in the art of teaching. In 1883–'84 the normal students were 349. St. Stephen's, for colored youth, under control of the Protestant Episcopal Church, also gives a 3-year normal course. Roanoke College in 1883 established a course of normal lectures in connection with the regular studies.

For statistics and other information of these schools, see Table III of the appendix; for a summary, the report of the Commissioner preceding.

GENERAL TEACHERS' INSTITUTES.

The State makes no provision for teachers' institutes, but the agent of the Peabody fund required that $1,500 of the amount given to the State in 1883 and $2,000 in 1884 from that fund should be devoted to this purpose. Two normal institutes were held in the summer of 1883, one at Blacksburg, continuing 4 weeks, and the other, for colored teachers, at Staunton, for 3 weeks. In 1884 there were four held, at Wytheville, Harrisonburg, Farmville, and Petersburg, with a total attendance of 1,029. The Wytheville institute continued 4 weeks, and the one at Petersburg, for colored teachers, was in session 6 weeks.

COUNTY INSTITUTES.

In 1883 there were 169 institutes held in 88 counties, and 221 in 1884 were held in 80 counties, Lynchburg reporting 50 and Staunton 24.

EDUCATIONAL JOURNAL.

The Educational Journal of Virginia, published at Richmond, still continued to be the official organ of the department of education, and furnished valuable information as to the progress of education in the State. The general department is edited by William M. Fox and the official by State Superintendent R. R. Farr.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

The State superintendent gives no information concerning the high schools in 1883–'84, but reports 7,250 white and 1,024 colored pupils studying the higher branches, an increase of 445. The city of Danville reports 1 high school; Lynchburg, 3, with 13[illegible] pupils; Portsmouth, 2; Richmond reports 2 high school buildings, with 15 rooms for study and recitation. The one for colored pupils gives normal training, and the course of instruction in each school covers 3 years.

OTHER SECONDARY SCHOOLS.

For statistics of business colleges, private academic schools, and preparatory departments of colleges, see Tables IV, VI, and VII of the appendix; for summaries of their statistics, see the report of the Commissioner preceding.

SUPERIOR INSTRUCTION.

UNIVERSITIES AND COLLEGES FOR YOUNG MEN.

The *University of Virginia* continued in 1883–'84 its academic and professional courses, the former in the literary and scientific departments, the latter in the departments of medicine, law, engineering, and agriculture. The instruction in these subjects is distributed among 19 schools, each affording an independent course, with a professor, the student electing the course he wishes to attend. Graduate courses follow the completion of the literary and scientific courses. Attendance in all the schools, 298 in 1883–'84. Diplomas are granted to graduates of schools; degrees, to those only that complete a full course in a certain number of schools.

Emory and Henry College, Emory (Methodist Episcopal South), at its last report on studies had 3 optional courses, the classical and Latin-scientific, each of 4 years, and the scientific, of 3 years. In 1882–'83 it reported 6 instructors, 98 students, and property valued at $100,000.

Like the University of Virginia, Washington and Lee University and Randolph Macon and Richmond Colleges continued their courses in separate elective schools. Hampden Sidney and Roanoke Colleges continued their preparatory department and regular classical courses of 4 years. Both offered German and French. At Roanoke these languages were spoken in the class rooms, and at least one of them [illegible] required for a degree.

For statistics of the above institutions, except the Emory and Henry College, see Table IX of the appendix; for a summary of statistics, the report of the Commissioner preceding.

INSTITUTIONS FOR THE SUPERIOR INSTRUCTION OF WOMEN.

For the statistics of the 17 institutions of this class reporting, see Table VIII of the appendix; for a summary of their statistics, the report of the Commissioner preceding.

SCIENTIFIC AND PROFESSIONAL INSTRUCTION.

SCIENTIFIC.

The three special scientific schools reporting for the two years are the following:

The *Agricultural and Mechanical College of Virginia*, which offers technical, scientific, and literary courses of study. Students taking only the technical have a 3-year course; those who seek the degree of civil or mining engineer or of A. B. have a 4-year course, with an additional year of special study for the degree sought. Elective studies are provided for those who do not intend to graduate.

The *Virginia Military Institute* receives from the State $15,000 annually for the benefit of cadets unable to pay their own expenses, and affords instruction in architecture, engineering, mechanical drawing, and natural sciences in a 4-year course, with a special school of applied science for a graduate course.

General scientific courses of three to four years are found in Emory and Henry College, when last reported; in Washington and Lee University, in its department of applied mathematics; and in the University of Virginia, in its scientific department, to which is added a special course in analytical and agricultural chemistry.

New Market Polytechnic Institute offers, besides primary, intermediate, and preparatory studies, a collegiate course of 2 years, including some of the higher mathematics.

PROFESSIONAL.

Theological instruction in the 2 years under review continued in the Union Theological Seminary, Hampden Sidney; the Theological Seminary of the Diocese of Virginia, Theological Seminary; and the Richmond Institute, Richmond.

In the first two of these schools a preliminary examination or its equivalent is required of all candidates for admission not collegiate graduates; and the three have each a 3-year course of study; Richmond Institute, for colored students, a 2-year theological course. In St. Stephen's Normal and Theological School, for colored students, Petersburg (Protestant Episcopal), there were, in 1882–'83, 18 students in the theological department.

The Theological Seminary of the Evangelical Lutheran General Synod South has made no report to this Bureau for 1882–'83 or 1883–'84.

For statistics reported, see Table XI of the appendix; for a summary of statistics, the report of the Commissioner preceding.

Legal instruction continued to be given in the University of Virginia and the Washington and Lee University in the usual 2-year course, no requirements for admission appearing in either case. In Richmond College the law department has disappeared.

Medical studies are still pursued in the medical department of the University of Virginia, Charlottesville, and the Medical College of Virginia, Richmond. The former, with an annual session of 36 weeks, has a 2-year graded course, but no requirements for admission; the latter, with an annual session of 24 weeks, no requirements for admission, but for graduation 2 full courses of lectures and attention to practical anatomy, attendance at clinics, and a thesis.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEAF AND DUMB AND THE BLIND.

The Virginia Institution for the Education of the Deaf and Dumb and the Blind, Staunton, in 1882–'83 reported 77 mute and 42 blind pupils. In 1883–'84 the pupils fell off to 41, cause not given. Instruction continued to be given in the common English branches, with articulation, drawing, and painting for the deaf, and the higher branches and vocal and instrumental music for the blind. The boys are taught different trades and the girls sewing, knitting, &c.

INDUSTRIAL TRAINING.

The *Hampton Normal and Agricultural Institute* aims to give the negro and Indian races what they most need and need now: a class of intelligent, earnest teachers, practical workers, and leaders. To that end it selects and trains its youth by a system of mental and manual labor drill. The problem is said to be to turn to account the labor payments of the students, who in 1882–'83 earned over $35,000, being paid at the rate of 5 to 8 cents an hour. The *present* proportion of races is about 4 negroes

to 1 Indian, there being 451 of the former and 117 of the latter. Of the 60 graduates in 1882 more than 90 per cent. engaged in teaching. Boys, in connection with school studies, are instructed in almost all the common industries, as well as in field work, while girls receive instruction in cookery, sewing, tailoring, and general housework. All receive pay for work, and those who fail to pass the required examination for admission may be to some extent employed during the day and admitted to the night class to fit themselves for entering the following year.

At the *Industrial School*, Norfolk, established by Mrs. Hemenway in 1882–'83, there was reported to be instruction in cookery by a graduate of the Boston Cooking School, in that year at least.

The *Miller Manual Labor School*, for boys, at Crozet, is divided into 3 departments, primary, intermediate, and academic, the last 2 covering 3 years each. The studies of the school embrace the common and higher English branches, with civil engineering, physics, chemistry, Latin, and the modern languages. Practical familiarity in agriculture, engineering, technical drawing, electrical engineering, and printing is given the pupil by his working at these arts. The institution owns 1,000 acres of land. Enrolment for the year, 164, an increase of 18.

ORPHAN ASYLUMS.

For statistics of orphan asylums reporting, see Table XXII of the appendix to this volume; for a summary of it, the report of the Commissioner preceding.

EDUCATIONAL CONVENTIONS.

CONFERENCES OF CITY AND COUNTY SUPERINTENDENTS.

The first annual conference of this kind was held in Richmond, February 27 to March 2, 1883; the second, at the same place, April 15 to 19, 1884; a large majority of the superintendents and many distinguished educators and speakers were present on both occasions. The aim at each meeting was to discuss such questions and suggest such action as might best promote good education in the State. Those brought forward at the first conference were "School-house architecture and location of schools;" "Teachers' institutes: how to organize and conduct them;" "Methods of examining teachers, and advantages of such examination;" "Graded schools;" "School furniture and apparatus;" "Duties and authority of superintendents;" "Text books: their uses and abuses;" "State uniformity in qualifications for certificates;" "Live teachers and dead ones."

At the second, among many other subjects treated were "The importance and benefits of proper school literature;" "Higher education for women, industrial and scholastic;" "Free text books along with free education;" "Importance of grading schools under one teacher, and how to do it;" "Normal training for teachers."

In the absence of State aid for teachers' institutes, these conferences, attended and addressed by such men as Dr. Curry, of the Peabody fund; Dr. Newell, of the Maryland State board of education, and Dr. Wickersham, long State superintendent in Pennsylvania, seem likely to afford important suggestions as to better organization and better management of all the school forces of the State.

CHIEF STATE SCHOOL OFFICER.

Hon. RICHARD R. FARR, *State superintendent of public instruction, Richmond.*

[Term, March 15, 1883, to March 15, 1886.]

WEST VIRGINIA.

SUMMARY OF EDUCATIONAL STATISTICS.

	1882–'83.	1883–'84.	Increase.	Decrease.
POPULATION AND ATTENDANCE.				
Youth of school age (6–21), white	212,865	219,548	6,683	.....
Youth of school age (6–21), colored	8,652	8,637	.....	15
Total white and colored school youth	221,517	228,185	6,668	.....
Whites enrolled in public schools	156,225	161,665	5,440	.....
Colored enrolled in public schools	4,679	4,607	.....	72
Whole enrolment in public schools	160,904	166,272	5,368	.....
Whites in average daily attendance	95,368	99,225	3,857	.....
Colored in average daily attendance	2,822	2,787	.....	35
Whole average daily attendance	98,190	102,012	3,822	.....
Per cent. of school age enrolled	72.64	72.87	.23	.....
Per cent. of school age in average attendance.	44.33	44.70	.37	.....
SCHOOLS AND SCHOOL-HOUSES.				
Public ungraded schools	3,986	4,122	136	.....
Public graded schools	124	125	1	.....
Public high schools	6	7	1	.....
Average time of schools, in days	98.5	100	1.5	.....
School-houses, frame or log	3,835	3,984	149	.....
School-houses, brick or stone	110	113	3	.....
Whole number of school-houses	3,945	4,097	152	.....
Number built within the year	171	167	.....	4
TEACHERS.				
Men teaching in public schools	2,961	3,036	75	.....
Women teaching in public schools	1,494	1,607	113	.....
Whole number of teachers	4,455	4,643	188	.....
Teachers who have had experience	1,348	1,433	85	.....
Teachers from State normal schools	763	862	99	.....
FINANCIAL STATEMENT.				
Whole expenditure for public schools	$947,371	$997,431	$50,060	.....
Available public school fund	509,305	514,159	4,854	.....
Valuation of State school property	1,841,661	1,871,235	29,574	.....
Average monthly pay of men	29 72	30 31	59	.....
Average monthly pay of women	31 08	30 52	.....	$0 56

(From reports and returns of Hon. Bernard L. Butcher, State superintendent of free schools, for the two years above indicated.)

STATE SCHOOL SYSTEM.

GENERAL CONDITION.

Progress and improvement appear at almost every point, the schools growing in public favor and attendance in them advancing except among the colored youth. Discipline in them had improved very greatly, as a decrease of 3,154 is noted in cases of tardiness, of 971 in truancy, and of 89 in cases of suspension, while the number of pupils neither tardy nor absent during the year increased by 538. Almost the only thing that seems to be wanting to attain higher success is better pay for teachers. Although there are more with some experience employed and nearly 100 more from State normal schools, the superintendent shows that the average salary of men is only

$130 a year and of women $155, the length of school term being very short. He recommends that the minimum term of school, now only 4 months, be increased to 6 months, as the people now generally recognize the fact that 4 months out of 12 is too brief for effective schooling, even if the children attend continuously.

ADMINISTRATION.

A State superintendent of free schools, elected quadrennially by the people, has general control of public school interests. Local schools are supervised by county school superintendents, elected by the people for 2 years, by district boards of education, and by subdistrict boards of trustees. District boards comprise a president and 2 commissioners, elected for 4 years, and 1 apparently for 2 years. This board appoints 3 trustees for each subdistrict to hold office for 3 years, with annual change of 1. The county superintendent and 2 high grade teachers whom he may nominate constitute a county board of examiners for each county to examine and license applicants for teachers' certificates.

SCHOOL FINANCES.

For the support of public free schools there is levied annually a State tax of 10 cents on $100 of real and personal property, which, with the interest of the invested State school fund, the proceeds of forfeitures, fines, and an annual capitation tax, constitute a general school fund, annually distributed among the counties in proportion to the number of youth of school age in each as shown by the last enumeration.

Besides this State contribution there is an annual levy in each independent school district of not more than 50 cents on every $100 of valuation for the payment of teachers' salaries within the district.

To provide school-houses and grounds, keep them in order, supply fuel, and pay other expenses incurred in connection with the schools, there is a further tax in each district annually of not more than 40 cents on $100.

AID FROM THE PEABODY FUND.

For teachers' scholarships at Nashville, institutes, and normal schools there were granted from this fund $3,100 in 1883 and $2,850 in 1884.

CITY SCHOOL SYSTEM OF WHEELING.

ADMINISTRATION.

The city school officers of Wheeling are a board of education of 3 members from each subdistrict, and a superintendent of the city school district, appointed by the board.

STATISTICS.

For 1882–'83: Population, census of 1880, 30,737; children of school age, 9,986; public schools, 8; enrolment in public schools, 5,152; average daily attendance, 4,514; number of teachers, 106.

For 1883–'84: Children of school age, 10,459; public schools, 9; enrolment in public schools, 5,013; average daily attendance, 4,386; number of teachers, 107.

ADDITIONAL PARTICULARS.

Wheeling in 1883–'84 had an enrolment of 4,849 white and 164 colored pupils, with an average attendance of 4,242 white and 144 colored. Schools were taught 200 days by 6 men and 97 women. Of the 9 school-houses in the city 3 were rented and 1 was built during the year. The buildings contained 104 rooms, all having fenced and improved grounds, valued, with other school property, at $246,585.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL STATE REQUIREMENTS.

For examining and certifying teachers each county has a board of examiners, consisting of the county superintendent with 2 experienced teachers holding first class certificates, nominated by him and appointed at a meeting of presidents of district boards. Teachers must present to the proper school officers a duplicate certificate of qualifications to teach a school of the grade applied for.

STATE NORMAL TRAINING.

The State normal schools at Concord, Fairmount, Glenville, Huntington, Shepherdstown, and West Liberty all present courses of 3 years in normal training and nearly all offer preparatory. The schools at Huntington, Shepherdstown, and Fairmount give collegiate training.

Storer College, Harper's Ferry, for colored students, offers a 3-year normal course, and in 1884 had 87 normal students, of whom 14 were graduated. The State aids the school with 18 scholarships, which secure room rent and tuition for State students,

who have the free use of books also. The colored teachers of West Virginia are offered free tuition from the close of their schools to the end of a summer normal term.

For statistics, see Table III of appendix; for a summary of them, a corresponding table in the report of the Commissioner preceding.

OTHER NORMAL TRAINING.

The State is entitled to 6 scholarships in the *Nashville Normal University*, awarded by the trustees of the Peabody fund. At the close of 1883 there were 3 vacancies existing, all of which were filled in 1884, 1 vacancy subsequently occurring.

West Virginia College, Flemington, has a 3-year normal course, the first 2 years being given to the branches taught in the public schools and the third year to collegiate branches. A model school is connected with this department for the observation and practice of the pupil teachers.

TEACHERS' INSTITUTES.

The law requires that one or more teachers' institutes shall be held annually in each county in the State and teachers are required to attend them. The annual cost of these institutes is about $1,250, of which the State appropriates $500, the remainder being contributed from the Peabody fund. The amount received from this source in 1883 was $1,500; in 1884, $1,332.

In addition to their attendance at the regular county institutes, the teachers in several counties hold for a day or two each month district institutes or teachers' associations, to discuss among themselves, with such patrons as will attend, local questions affecting the school interests of the county, methods of teaching, and school management.

EDUCATIONAL JOURNAL.

The West Virginia School Journal, published at Wheeling and devoted to the cause of education, was in 1883–'84 in its third and fourth volumes. The general department is edited by the principals of the Wheeling schools, and the official department by the State superintendent of public schools.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

When the board of education of any district deems it expedient to establish a high school, it may submit the question to the voters of the district, and if they so decide the board is authorized to establish a high school. In 1882 there were 10 high schools in the State, the following year 6, and in 1884 1 more was added.

OTHER SECONDARY SCHOOLS.

For statistics of business colleges, private academic schools, and preparatory departments of colleges, see Tables IV, VI, and IX of the appendix; for summaries of them, corresponding tables in the report of the Commissioner preceding.

SUPERIOR INSTRUCTION.

COLLEGES FOR YOUNG MEN OR FOR BOTH SEXES.

West Virginia University in 1882–'83 entered on a new arrangement of its studies in 10 independent schools, under 2 general courses, academic and professional. It is claimed that this allows greater freedom in the selection of studies and the elevation of the standard of instruction and attainment; that, the course being elective, the student may pursue the studies of any school for which he is prepared, without regard to his deficiency in other studies; and that, if he desires but a partial course, he may adapt that course to his tastes or necessities; and, finally, that he is put upon the same equality with his fellows and thrown upon his own resources. Its military course of 4 years remained unchanged.

Bethany College, with the same arrangement by schools as the university, in 1882–'83 continued its classical, scientific, and ministerial courses, leading to the degrees of A. B., S. B., and L. B. It has also an academic course of 2 years, preparatory to the regular college course. While all courses are open equally to both sexes, there is a special ladies' course. The musical department offers a course of elementary training and drill in technique, both vocal and instrumental.

West Virginia College, noted in previous years, has made no report to this Bureau for the years under view.

For statistics of colleges reporting, see Table IX of the appendix; for summary of statistics, the report of the Commissioner preceding.

INSTITUTIONS FOR THE SUPERIOR INSTRUCTION OF YOUNG WOMEN.

For statistics of schools of this class reporting, see Table VIII of the appendix; for summary of statistics, the report of the Commissioner preceding.

SCIENTIFIC AND PROFESSIONAL INSTRUCTION.

SCIENTIFIC.

The *University of West Virginia*, in its new arrangement, offers the degree of bachelor of science to graduates holding diplomas in the schools of metaphysics, modern languages, English, geology and natural history, mathematics, agriculture, chemistry, and physics.

Bethany College, in its school of mathematics and astronomy, has a scientific course of 4 years, including, with subjects in the classical course, applied mathematics, road and railroad engineering, descriptive geometry, shades and shadows, and perspective drawing. A special course in engineering includes, in addition to some of the above, surveying, drawing, levelling, profiling, and mapping. No time is specified for this course.

For other information in regard to these schools, see Table X of the appendix.

PROFESSIONAL.

Theological.—The only theological instruction given in the State in 1882–'83 appears in the ministerial course of 4 years in Bethany College. The studies of the first 2 years are classical, those of the third and fourth years theological, of a fair standard.

Legal training in 1882–'83 continued in the State university in its school of law and equity, embracing the usual studies. The degree of bachelor of laws will hereafter be conferred on graduates of this school.

For statistics of these schools, see Tables XI and XII of the appendix.

Medical.—Up to 1882–'83 no full medical school or department appears in the State. In the school of anatomy, physiology, and hygiene of the West Virginia University there was preparatory medical training in anatomy, with dissection; in physiology and hygiene, by specimen, the microscope, drawing, and lectures. A foundation has been laid for a medical museum. Under the new order of things this department, it is said, has had during the session of 1882–'83 more bona fide medical students than ever before. The faculty hope soon to complete a medical department.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEAF AND DUMB AND THE BLIND.

The West Virginia Institution for the Deaf and Dumb and the Blind, Romney, founded in 1870, reported for 1883 an appropriation from the State of $23,450 and buildings and other property valued at $80,000. There were 102 pupils under instruction, of whom 66 were deaf-mutes and 36 blind. All are taught the common English branches, with drawing for the deaf and music for the blind; also, the usual industrial occupations of such schools.

EDUCATIONAL CONVENTION.

WEST VIRGINIA EDUCATIONAL ASSOCIATION.

The State Association met at New Martinsville, July 1–3, 1884, Hon. B. L. Butcher presiding. Among the subjects presented and discussed were "The old and the new in education," "The relation of the State university to the free school system," "Reform schools," "Building for the children of the South," and "Grading county schools." The meeting was regarded as a very profitable one, and the association will hold its next session at Keyser.

CHIEF STATE SCHOOL OFFICER.

Hon. B. L. BUTCHER, *State superintendent of free schools, Wheeling.*

[Term, March 4, 1881, to March 4, 1885.]

WISCONSIN.

STATISTICAL SUMMARY.

	1882–'83.	1883–'84.	Increase.	Decrease.
POPULATION AND ATTENDANCE.				
Youth of school age (4–20)	510,125	528,750	18,625	
Number between 7 and 15 years old	269,425	286,542	17,117	
Public school enrolment	309,680	316,969	7,289	
Per cent. of school youth enrolled	60.70	59.94		.76
Average daily attendance				
Enrolment of youth 7 to 15	234,800	238,266	3,466	
Attending free high schools	7,519	7,689	170	
Youth in private and church schools	21,191	15,616		5,575
In collegiate and normal schools	5,335	5,821	486	
In all classes of schools	336,206	338,406	2,200	
SCHOOL DISTRICTS AND SCHOOLS.				
Number of school districts outside of cities.	5,707	5,767	60	
Schools with more than one department.	486	519	33	
Number of high schools	114	115	1	
Average term of school in cities, days	192			
Average term of school in county, days	168			
Volumes in district school libraries	28,038	30,985	2,947	
Public school-houses	5,870	5,951	81	
School-houses built during the year	256	287	31	
TEACHERS.				
Number of men teaching	2,457	2,378		79
Number of women teaching	8,478	8,251		227
Whole number of teachers	10,935	10,629		306
Teachers with first grade certificates	168	199	31	
Teachers with second grade certificates.	594	666	72	
Teachers with third grade certificates.	7,595	7,835	240	
FINANCIAL STATEMENT.				
Total expenditure for public schools	$2,892,877	$2,964,861	$71,984	
Amount of available school fund	2,913,612			
Total of permanent school fund	3,063,612			
Value of school property	5,930,789			
Average monthly pay of men in cities	156 30			
Average monthly pay of women in cities.	37 50			
Average monthly pay of men in counties.	40 89			
Average monthly pay of women in counties.	27 27			

(From returns of Hon. Robert Graham, State superintendent of public instruction of Wisconsin, for the years indicated.)

STATE SCHOOL SYSTEM.

GENERAL CONDITION.

The statistics show a steady increase in the school population, which in 1883–'84 numbered 33,517 more than in 1881–'82. As may be seen, the advance in the number of pupils under instruction did not keep pace with the increase in school youth in 1883–'84

Above 7,000 more were enrolled in public schools, but 5,575 fewer are reported from private schools, which brings the net increase down to 2,200, counting students in normal and collegiate institutions. Fuller statistics from private schools, however, the State superintendent says, would change this presentation very much, several of the largest cities in the State, where it is well known there are large numbers of private schools, sending no reports of them. Besides, as he says, the failure of attendance to keep pace with population is easily understood when it is remembered that a large proportion of the increase in population has been in the newer portions of the State, where time is required to provide school facilities, and in a few large cities, where school accommodations are almost always inadequate. The number of pupils 7 to 15 years of age reported in public schools in 1883–'84 was 14,691 more than in 1881–'82 and 3,466 more than in 1882–'83. Fuller statistics on this point, it is believed, would show that nearly all of that age attended during some portion of the year. More school districts were reported, a fairly larger number of schools with more than one department appears, more houses were built, and there was an increase of expenditure for all school purposes. Sixteen towns adopted the township system in 1882–'83, four more did so the next year, and more school districts were supplied with libraries, dictionaries, maps, and globes. A larger number of the country districts have adopted a graded course of study, and this effort to systematize the work of the common schools has resulted in the more rapid advancement and the more equal and symmetrical development of pupils where the experiment has been tried in good faith and with earnest purpose. The superintendent advises that district boards be required by law to adopt a course of study prescribed by the superintendent, just as they are required to adopt a list of text books, and that all teachers be required to organize their schools in accordance with it.

ADMINISTRATION.

A State superintendent, elected biennially by the people, has general supervision of the public schools. Each county has a superintendent, and counties with 15,000 or more inhabitants may have 2 of these officers. Districts have boards of 3 directors. Towns which have adopted the township system have township boards, consisting of the clerks of the several subdistricts belonging to the township. Women are eligible to all school offices except that of State superintendent. Public schools must be nonsectarian; they are free to all resident youth 4–20 years of age, a census of whom is taken annually by the district clerk. Children 7–15 years of age must attend school at least 12 weeks in each school year unless their education has been otherwise provided for or unless excused for specified causes. The public school system comprises high and normal schools and a State university. There are also State institutions for the blind and deaf and a State Reform School.

SCHOOL FINANCES.

Public schools are supported from the income of a State school fund and from local taxation. The income of the State school fund is distributed annually to such towns and districts as send the required reports and show that they have raised toward the support of common schools one-half the amount last appropriated to them from the State fund and that they have maintained schools at least 5 months in the year, a 3 months' term in extraordinary cases being accepted. School money is apportioned according to the school census.

SCHOOL SYSTEMS OF CITIES WITH 7,500 OR MORE INHABITANTS.

STATISTICS.

1883–'84.

Cities.	Population, census of 1880.	Children of school age.	Enrolment in public schools.	Average daily attendance.	Number of teachers.	Expenditure.

ADDITIONAL PARTICULARS.

All the cities named above continued in 1883–'84 to have graded courses of instruction, covering 11 to 13 years, including high school studies, with ancient languages, and in all but Janesville pupils may fit themselves for college. Teachers' meetings are held in all the cities.

Appleton reported for 1883–'84 8 school buildings, with 32 rooms and 2,300 sittings for study, valued, with other school property, at $110,500. The schools were taught 176 days in the year, and the average annual salary paid to men was $807; to women, $322. The evening school enrolled 29 pupils, and private schools, 444. One Kindergarten was maintained, with 30 pupils and 2 teachers.

Fond du Lac public schools in 1883–'84 were taught 200 days, in 17 buildings, with 2,800 sittings for study, valued, with all other school property, at $124,800. The average annual salary of men teaching was $c75; of women, $355. Private schools enrolled 500 pupils.

Green Bay public schools occupied 17 rooms, with 1,070 sittings for study, valued, with grounds, at $54,500. Private schools had 775 pupils, and one Kindergarten was maintained, with 26 children, under 1 teacher.

Janesville had 6 public school-houses, with 1,815 sittings for study, valued, with all other school property, at $67,150. Private schools had 250 pupils enrolled.

La Crosse held its public schools in 13 buildings, containing 43 rooms, with 2,684 sittings for study, valued, with other school property, at $108,000. Schools were taught 194 days, and teachers received an average annual salary of $1,038 for men and $400 for women. Two Kindergärten were reported, with 60 pupils, under 2 teachers.

The *Madison* schools were all graded and were taught 175 days, in 9 buildings, in good condition and well ventilated, with 2,000 sittings for study. All school property was valued at $100,000. Two Kindergärten were reported, with 100 pupils, under 2 teachers.

Milwaukee schools, classed as primary, grammar, high, normal, and evening, were taught in 1883–'84 197½ days, in 27 buildings, containing 16,200 sittings for study. The schools were all graded. The average annual salary paid teachers was, to men $1,147 and to women $568. Special teachers were employed in music, drawing, and German. There were 12 evening schools, with 1,776 pupils enrolled, under 46 teachers, all belonging to the day school force. There were 7 Kindergärten, enrolling 900 children, under 13 teachers. Public school-houses and lots were valued at $722,900.

Oshkosh public schools, classed as primary, intermediate, grammar, and high, were taught in 9 buildings, 6 of which were in good condition and well ventilated, valued, with sites, at $80,000. The average attendance was about 93 per cent. of the number enrolled. The course of instruction extends through 12 years. Calisthenics was taught by the regular teachers, with satisfactory results.

Racine classed its public schools as primary, grammar, and high, each covering 4 years. Drawing and music were taught throughout the first 8 grades. Schools were housed in 7 buildings, with 2,900 sittings for study, valued, with grounds, at $105,000.

Watertown reported public schools taught in 1883–'84 in 5 school-houses, all in good condition, well ventilated, and affording 1,200 sittings, houses and sites being valued at $44,000. One night school was maintained, with 60 pupils, and 1 Kindergarten, with 30 children, under 1 teacher. Private schools were taught 200 days, with 700 pupils, under 14 teachers.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

STATE REQUIREMENTS FOR CERTIFICATES.

Teachers to be legally employed in public schools must have a certificate of qualification from their county superintendent or from a State board of examiners, unless they are graduates of one of the State normal schools, or the State university or other college

in the State with equivalent courses of study; and no person may receive a certificate who does not write and speak English correctly and easily. Certificates granted by county superintendents are of 3 grades, the first good for 2 years, the second for 1 year, the third for such term as is specified on the certificate, but not for more than 1 year. Each county superintendent establishes for his county, under the advice of the State superintendent, the standard of attainment which must be reached by applicants for the different grades of certificates. The board of examiners, which is appointed by the State superintendent, gives State diplomas, good for 5 years and for life. The State superintendent also has power to grant diplomas to graduates of the university and of colleges, which are good until annulled; and diplomas of graduates from the full 4-year course of the normal schools, countersigned by the State superintendent, become unlimited State certificates after the holder has taught successfully one year.

STATE NORMAL TRAINING.

The 4 State normal schools, located, respectively, at Oshkosh, Platteville, River Falls, and White Water, had in 1882-'83 a total enrolment of 1,908, of whom 952 were in normal departments; and in 1883-'84 the whole number increased to 1,971, that of normal students being 940. All have elementary and advanced normal courses, both together covering 4 years. All have primary, intermediate, grammar, and preparatory departments, and that at Oshkosh a Kindergarten training class. The aggregate number completing the courses in 1883-'84 was 71 from the elementary and 30 from the advanced course, an increase in the former of 16 and in the latter of 4 over the preceding year.

A handsome and commodious building has been erected in Milwaukee for a State normal school, which will be opened as soon as the funds at the disposal of the board of regents will justify such action.

Among the teachers in the public schools of the State there were in 1883-'84 243 who were graduates from normal schools, an increase of 57 over the preceding year.

By a law of 1883 the free high schools of the State are required to include in their course instruction in the theory and art of teaching and in the organization, management, and course of study of ungraded schools; and all examinations of teachers for the high schools are to include examinations on these subjects.

The question of the reëstablishment of a chair of pedagogy at the University of Wisconsin was decided in 1883-'84, and President J. W. Stearns, of the State Normal School at White Water, was tendered, in June, 1884, the appointment to the chair, and accepted it, to take effect in February, 1885.

OTHER NORMAL TRAINING.

The *City Normal School of Milwaukee* continued to prepare teachers for the city schools, and in 1882-'83 had 24 students, under 2 teachers.

The *National German-American Teachers' Seminary*, Milwaukee, for 1883-'84 reports 25 normal and 20 other students, under 9 instructors. The course of study covers 3 years. Six pupils were graduated during the year and engaged in teaching.

The *Catholic Normal School of the Holy Family*, St. Francis Station, has a 3-year normal course, with preparatory studies, and in 1883-'84 reported 50 normal students and 56 others.

Galesville University, when last heard from, offered a 3-year course of normal training, all the studies being pursued which are required by the State for a first class certificate.

Melton College, in its preparatory department, reported teachers' courses, the elementary and advanced together covering 4 years.

TEACHERS' INSTITUTES.

County teachers' institutes were held under State authority in 1882-'83 in all the 62 settled counties, one county having 3. In all 4,429 teachers were in attendance. In 1883-'84 there were 63 institutes held again in the 62 counties, with 4,757 teachers attending. The institutes were in session generally from 4 to 10 days, and each had an average daily attendance in 1883-'84 of 60, an excellent record.

EDUCATIONAL JOURNAL.

The Wisconsin Journal of Education, published at Madison and conducted by the State superintendent and his assistant, continued in 1884 to be the organ of the State Teachers' Association and of the department of public education, and in that year was in its fourteenth volume.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

The State appropriates $25,000 annually for the maintenance of these schools, which may be established under the law where not less than 25 pupils are prepared to enter upon a high school course. The schools are in charge of a high school board, consisting

of a director, a treasurer, and a clerk in joint high school districts; but in cities not under county superintendents the city board acts as a high school board. The course of study to be pursued and the standard for admission are established under the advice of the State superintendent.

As may be seen under the head of State Normal Training, these schools are now utilized as means of preparing teachers for the lower schools.

The number of high schools organized under the free high school law in 1883 was 114; the number making special reports and receiving State aid was 110. Pupils enrolled for that year, 7,519; instructed in English branches only, 6,400; in other branches, 1,119; while 454 completed the course of study.

In 1884 there was 1 more organized; 2 more received State aid; the enrolled pupils (7,689) were 170 more; a smaller number than in the previous year studied English branches and a larger number the higher branches; and 475 completed the course, making a total of 3,430 graduates since the organization of these schools. The major part of the teachers in both years held either State certificates of qualification or normal school, collegiate, or university diplomas.

SUPERIOR INSTRUCTION.

COLLEGES FOR YOUNG MEN OR FOR BOTH SEXES.

The University of Wisconsin, Madison, admitting both sexes and giving free tuition, comprises in its collegiate department a college of arts and one of letters, the latter including an ancient and a modern classical course, leading to the degrees of A. B. and LIT. B. In the college of arts a general course in science, leading to the bachelor's degree, is provided, besides several technical courses, including agriculture. Of the professional schools contemplated, only that of law has as yet been established.

The board of regents report in 1883–'84 that for a number of years past the history of the university has been that of rapid, continuous, and wholesome growth, a growth not alone measured by increase in the number of students, but also by necessary additions to real estate and buildings, by the progressive enlargement of cabinets and libraries, by the establishment of new and the expansion of old departments of instruction, and especially by the higher grade of instruction imparted.

Seven other institutions in the State are classed by this Office as colleges or universities, viz, Lawrence University, Appleton; Beloit College, Beloit; Galesville University, Galesville; Milton College, Milton; Racine College, Racine; Ripon College, Ripon; and Northwestern University, Watertown. All but 2 of these are open to both sexes, all have preparatory and classical courses of study and all but 2 scientific courses, all include one of the modern languages in their course of study, while in most of them two or three of these languages are studied. Instruction in business and in music and the fine arts is given by 3.

For full statistics of colleges and universities reporting to this Office, see Table IX of the appendix; and for a summary, see the report of the Commissioner preceding.

INSTITUTIONS FOR THE SUPERIOR INSTRUCTION OF YOUNG WOMEN.

Three colleges exclusively for young women are Wisconsin Female College, Fox Lake; Milwaukee College, Milwaukee; and Santa Clara Academy, Sinsinawa Mound. The college at Fox Lake is authorized by law to confer collegiate degrees. All include music, drawing, painting, and German in the course of study, one adding French and another Italian. For statistics, see Table VIII of the appendix; and for a summary, see the report of the Commissioner preceding.

SCIENTIFIC AND PROFESSIONAL INSTRUCTION.

SCIENTIFIC.

Instruction in scientific branches is chiefly given in the college of arts of the University of Wisconsion, which includes, besides a general science course, departments of agriculture and of civil, mining, metallurgical, and mechanical engineering, all having courses of 4 years, which lead to a corresponding bachelor's degree.

Courses in science, leading to the degree of bachelor of science, are also offered by Lawrence and Galesville Universities and Milton, Racine, and Ripon Colleges.

For statistics of scientific schools reporting, see Table X of the appendix; and for a summary, see a corresponding table in the report of the Commissioner preceding.

PROFESSIONAL.

The *theological* schools reporting are the Mission House, Franklin (Reformed); the Lutheran Theological Seminary of the Synod of Wisconsin; Nashotah House, Nashotah (Protestant Episcopal); and the Seminary of St. Francis of Sales, St. Francis (Roman Catholic). All but the last named report a 3-year course of study and require an examination for admission. In the Seminary of St. Francis the course is 9 years;

EDUCATION OF THE DEAF AND DUMB.

Wisconsin Institution for the Education of the Deaf and Dumb, Delavan, found trains the deaf-mutes of the State for a useful life, giving instruction in th and higher English branches, including anatomy, philosophy, chemistry, an history. Special attention is given to articulation, penmanship, morals, and Sewing, knitting, ironing, printing, cabinet and shoe making are taught. 1883–'84, 212, under 13 instructors; State appropriation, $40,000. The i owns 37 acres of land, which, with buildings, &c., was valued at $100,000. tures for the year, $40,000.

The *Milwaukee Day School for Deaf Children*, founded in 1883 and under the Wisconsin Phonological Institute, reports 8 pupils, but does not define ies. The oral method is employed. The city appropriated $1,200 for maint the school during the year and $300 were received from tuition fees.

St. John's Catholic Deaf-Mute Institute, St. Francis, founded in 1876, in 18 22 boys and 15 girls under instruction. Common school studies were pursu ulation, to a limited extent, and agriculture, shoemaking, needlework, an housework were taught.

For further statistics of deaf-mute schools, see Table XVIII of the appen for a summary, see the report of the Commissioner preceding.

EDUCATION OF THE BLIND.

The Wisconsin Institution for the Education of the Blind, Janesville, in 18 78 pupils, who received instruction in common and high school branches, and instrumental music, and in carpet weaving, cane seating, sewing, and far The age for admission is from 8 to 21 years, and the State provides free boar tion. All youth are admitted whose vision is too defective to allow them the benefit of public school instruction. Total receipts for the year, $25,000 itures, $18,000; value of all property, $175,000; volumes in library, 1,700.

REFORMATORY AND INDUSTRIAL TRAINING.

The *Wisconsin Industrial School for Boys*, Waukesha, under State control boys between the ages of 10 and 16 years, and in 1881–'82 reported 132 re tickets; 21 released at 18 years of age, the limit of detention; 7 discharged; 8 and 299 on the roll. In 1882–'83 there were 229 pupils reported. The instit founded in 1860, since which time 1,979 boys have received its care. The school branches are taught; also, farm work, shoemaking, and knitting.

The *Wisconsin Industrial School for Girls*, Milwaukee, established in 1875, h object the moral and intellectual training of girls under 16 and boys under 1 age who are found destitute or disobedient or are in manifest danger of vicious. In 1882–'84 there were 149 enrolled, some in a Kindergarten class resenting 40 different counties. School is in session for the little ones 2 ho morning, 3 in the afternoon; 1 hour in the evening for the others. The studi the common school branches, with some scientific and general literature. It is also given in sewing, laundrying, and general housework.

and the Rhine," and "Normal work in the high school." Among the topics reported upon were "How can the schools secure better supervision?" "What modifications of the school course do the times demand?" and "The teacher's mission in awakening in the community an interest in school work."

The summer session was also held at Madison, July 14–15, 1884, President Stearns again in the chair. After the committees were announced, papers and reports were read and discussed upon "The school and the home," "Elementary education," "Educational systems in the South," and "Instruction in the high schools in the theory and art of teaching." After the election of officers for the ensuing year the meeting adjourned.

CONVENTION OF CITY AND COUNTY SUPERINTENDENTS.

The annual convention of these school officers was held in the afternoon of December 28, 1883, with State Superintendent Graham in the chair. The attendance of superintendents was meagre, only 18 being present. Some very interesting subjects were presented, but owing to lack of time the discussions were brief.

CHIEF STATE SCHOOL OFFICER.

Hon. ROBERT GRAHAM, *State superintendent of public instruction, Madison.*

[Term, 1882 to 1885.]

ALASKA.

Educational affairs in Alaska remain much as reported in 1882–'83, the princi schools still being those in the southeastern portion of the Territory conducted supported by the Presbyterian Church. A letter from their superintendent, R Sheldon Jackson, reports them to be steadily growing in influence and in attendar Of 7 different settlements mentioned, in which one or more schools had been tau during some portion of the year 1883–'84, the number of pupils attending in 5 was ported, aggregating from 500 to 600. One of them was a summer school, which lowed the natives 16 miles down the coast, returning with them in the fall. Th schools had industrial departments connected with them; that at Sitka, having b designated as the Government industrial school for Eastern Alaska, promises great largement of its work.

No late information is at hand from any except 1 of the 3 schools sustained by Alaska Commercial Company in the southwestern section of the Territory. This St. Paul's Island, reports 47 pupils enrolled during 1882–'83.

The appropriation by Congress of $15,000 for industrial schools and $25,000 for c mon schools in Alaska will doubtless give a powerful impetus to education in the T ritory.

ARIZONA.

STATISTICAL SUMMARY.

(From reports of the territorial superintendent of public instruction for the years mentioned.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

As will be seen from the preceding summary, the public schools, while not up to the standard desired, were making a fair degree of progress. The census taken in June, 1883, showed a school population of 9,376, more than 48 per cent. of whom were enrolled in public schools in 1883–'84, with about 35 per cent. in average daily attendance, an increase for the year of 8 per cent. enrolled and of nearly that proportion in average attendance. In the year 17 more school districts were organized, 19 more school-houses built, more schools were taught, and the average term for the Territory was, according to a written return, 60 days longer, though a printed report gives an increase of only 30 days. The new school-houses were said to be substantial and well adapted to the purposes for which they were erected, several of them having also been built with an eye to beauty of design and finish, and supplied with the latest improved furniture and apparatus. A majority of the country schools had also been supplied with the necessary school apparatus. The standard of scholarship required for license to teach was being gradually raised throughout the Territory. Many of the teachers had been trained in a normal school, and at least one-half of those who applied for certificates during 1883 and 1884 were graduates of universities or normal schools.

ADMINISTRATION.

The school system of Arizona is conducted by a superintendent of public instruction, elected for 2 years by the people; a territorial board of education, consisting of the governor, territorial treasurer, and superintendent; county superintendents;

county boards of 3 examiners; and a board of 3 school trustees for each district. Th county probate judge is ex officio county superintendent and presiding officer of th county board of examiners.

SCHOOL FINANCES.

Four forms of school taxation are provided by the law. The first two, which a obligatory, consist of a territorial tax of 15 cents on $100, which forms the territori school fund, and of a county tax of not less than 50 nor more than 80 cents on $10 which is known as the county school fund. The third is conditional, only being r quired of those districts in which the tax apportioned is inadequate to secure thr months of school, and the fourth an optional tax for prolonging the school ter beyond the three-month limit or for building school-houses, voted on by the distri at a meeting called by the board of trustees. The territorial fund is apportioned t the counties on the basis of school population, 10 per cent. of it for libraries, the a nual amount, however, not to exceed $20 a year for this purpose.

Moneys arising from escheats go into the territorial school fund; those from fine forfeitures, and gambling licenses, into the county school funds, except in incorp rated villages or cities.

SCHOOL SYSTEM OF TUCSON.

SCHOOL STATISTICS AND OTHER EDUCATIONAL PARTICULARS.

Tucson had for January, 1883, an enrolment of 318, an increase of 84 over the pr ceding year, all under 6 regular and 2 special teachers, these last of music and Spa ish. The school registers show that most of the new pupils come from families th have resided in the city for two years or more but have never before sent their chi dren to the public schools. The superintendent states, with regret, that the scho buildings do not meet the requirements of this growth, and that a further increa in attendance is impossible. A new building was to be erected soon, however, whi will furnish ample room. Schools are classed as primary, grammar, and high, t course of study covering 11 years. Music and drawing enter into the first 8 yea special attention being given to oral instruction. Expenditures for the year we $8,455.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL REQUIREMENTS.

Teachers must have attained the age of 18 years, must hold certificates of qua fication from the county board of examiners or from the superintendent of public i struction, must keep a school register, and make proper certified reports to the coun superintendent at the end of each quarter.

TEACHERS' INSTITUTES.

The law provides that whenever a county contains 20 districts a teachers' institu may be held at least once a year. Teachers are required to attend and participate its proceedings. But the superintendent says the districts are scattered and the e penses attending institutes great. None, consequently, have been held in the la two years.

SECONDARY AND SUPERIOR INSTRUCTION.

SECONDARY.

The Territory makes no provision for the instruction of its youth beyond the com mon school course. Tucson, however, reports a high school, which offers 2 course scientific and literary, each of 3 years. The former includes the study of Spanish, and Latin is added to the latter. Students may elect either course, and diplomas o graduation are given on a satisfactory completion of it.

SUPERIOR.

No institutions of this class, either territorial or private, have reported to this Bureau.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. W. B. HORTON, *territorial superintendent of public instruction, Prescott.*

[Term, January 1, 1882, to January 1, 1884.]

Succeeded by R. L. Long, Phœnix.

DAKOTA.

[a] The statistics are from 44 counties in 1882–'83 and from 66 in 1883–'84; in addition to these 66 there were 16 others not yet in a condition to report.
[b] The school age was 5-21 in 1882–'83 and 7-20 in 1883–'84.

(From report and return of Hon. W. H. H. Beadle, territorial superintendent of public instruction of Dakota, for the two years indicated.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

As may be seen from the foregoing table, education has shared in the general prosperity that has marked Dakota affairs in the years reviewed. The superintendent says a better public sentiment has developed, and even a spirit of enthusiasm in school work, while the people have demanded longer terms and better schools and have kept their children more continuously and regularly in school. The large increase in school population and enrolment made it necessary to erect 785 school buildings, thus largely increasing expenditures.

ADMINISTRATION.

Educational affairs are in the hands of a superintendent of public instruction, appointed biennially by the governor and confirmed by the legislature; of county superintendents, chosen biennially by the people, women being eligible; and of township boards of 3 members, elected for 3 years, with annual change of 1. The duty of these boards is to provide buildings, employ teachers, regulate schools, and disburse the funds of the township. The school census must be taken annually. The Bible

may not be excluded from any public school nor deemed a sectarian book, and th law requires that the highest standard of morals shall be taught. School attendanc is compulsory on all children 10 to 14 years of age for at least 12 weeks in each schoc year, 6 of these weeks to be consecutive, unless such children are excused by the schoc authorities for good reasons.

SCHOOL FINANCES.

Taxation is of two kinds: (1) a county tax of $1 on each elector and of 2 mill on $1 of taxable property, to be distributed to the several school corporations of th county in proportion to their youth over 7 and under 20 years of age; (2) a local tax not to exceed 3 per cent. of the taxable property of the district in which it is levied The general tax, or public fund, as it is called, is increased by penalties of various kinds and is distributed according to the ratio of school youth in each school corporation.

NEW SCHOOL LEGISLATION.

A new school law in 1883 changed the ending of the school year from March 1 t June 30; made the school age, which had undergone several previous alterations, 7–20 required an annual census of school children; abolished districts and subdistrict in school townships; gave free choice as to the schools to be attended, but mad education for at least 12 weeks in each school year compulsory on all youth 10 to 1 years of age; and appropriated $600 a year for the employment of experienced con ductors of teachers' institutes.

CITY SCHOOL SYSTEM OF YANKTON.

ADMINISTRATION AND STATISTICS.

The municipal system is in no way subordinate to the territorial system, its onl obligation being to report its school population in order to receive its share of th school fund. Under a board of education composed of 10 members, including secr tary and treasurer, the Yankton system in 1883–'84 was still progressing. The scho population of the city comprised 1,114 children, of which number 751 were enrolled i public schools and 474 were in average daily attendance. The schools, classed a primary, grammar, and high, were taught 175 days by 13 teachers, including the s perintendent, who gives part of his time to teaching, and 1 special teacher of voc music. The schools occupied 12 rooms, containing 576 sittings for study.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL REQUIREMENTS.

Teachers to be employed must present certificates of qualification from the supe intendent of public instruction or from a county superintendent, and to receive pa must furnish duplicate reports of attendance and whatever statistics are needful f making an accurate report of their schools at the end of each term, one report for th district clerk and one for the county superintendent.

TERRITORIAL NORMAL TRAINING.

The Territorial Normal School, Springfield, has been suspended.

Notice comes through the New York School Journal that a new State normal scho was opened at Madison, December 5, 1883, under the principalship of Prof. C. S. Richardson, a graduate of Colby University, Waterville, Me.

OTHER NORMAL TRAINING.

The University of Dakota presents teachers' courses of 1 and 2 years and 2 years advanced normal training. Students qualified to teach at the end of the first and second years receive a certificate of proficiency, and those who satisfactorily complet the 4-year course receive diplomas conferring the degree of bachelor of didactics.

TEACHERS' INSTITUTES.

The law requires institutes to be held, conducted by teachers employed or designated by the territorial superintendent, and $600 are appropriated annually for this purpose Every applicant for a county teacher's certificate must pay $1, which is added to the institute fund of the county where it is received. From the territorial fund not more than $60 may be paid for the expense of any institute, which institute must continue in session two weeks, and no institute aided by this fund shall continue for less than five days. Two or more counties, however, may be grouped into one institute and $80 appropriated for its use. Money assigned for any particular institute may be added to the county institute fund of any county and the institute extended as long as the combined funds may last, not exceeding four weeks. In 1883–'84 there were 3 county institutes held and 70 sessions of county teachers' associations were reported

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

This class of schools is not required by law, but has been established in the larger towns. Yankton, the only one furnishing statistics for 1882–'83, had 1 school building, with 46 sittings for study. The enrolment during the first quarter was 37, with 33 in average daily attendance, but the number fell off considerably before the end of the year, only one being graduated, many of them leaving the high school to enter the new college. Owing to the advantages of an advanced education from this source, the course was shortened from 4 years to 3.

SUPERIOR INSTRUCTION.

TERRITORIAL UNIVERSITY.

The University of Dakota, Vermillion, organized and opened in 1883, has preparatory and collegiate departments, the former extending over 3 and the latter over 4 years. The collegiate department has 3 courses, classical, scientific, and literary. A 4-year course in normal training is also presented, as before stated, and arrangements are being perfected for thorough instruction in vocal and instrumental music. In 1883–'84 there were 95 students enrolled, under 7 instructors.

By a vote of the regents, Superintendent W. H. H. Beadle was to organize and conduct at the university a normal institute in August, 1884, of which full information is expected in the report for 1884–'85.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEAF AND DUMB.

The Dakota School for Deaf-Mutes, Sioux Falls, founded in 1880, in 1883–'84 had 23 pupils, under 2 instructors, making 28 from the beginning. The common English branches were taught, with penmanship, drawing, and agriculture. The Territory appropriated $12,000 and the expenditures were $4,830 for the year.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. W. H. H. BEADLE, *territorial superintendent of public instruction, Yankton.*

[Third term, 1883 to 1885.]

Then to be succeeded by Hon. A. Sheridan Jones.

DISTRICT OF COLUMBIA.

a Census of 1880.

(From returns by Hon. E. A. Paul, acting superintendent of public schools, and F. T. Cook, superintendent of colored schools.)

DISTRICT SCHOOL SYSTEM.

GENERAL CONDITION.

In the absence of printed reports of the public schools in the District, their gene condition can be seen only from the preceding statistics, gathered at the office of superintendent and certified to by him.

From 1880–'81 to 1882–'83 there was an increase of 1,272 in enrolment, although t of the colored youth fell off by 873; in average daily attendance, a gain of 1,561. t of colored falling off by 477. In 1882–'83 there were 3,295 more sittings than in 1880– 45 more teachers, of whom 12 were colored; expenditure for public schools increa $142,379, while school property seems to have diminished in value $120,533. gains of 1883–'84 over 1882–'83 show a continued advance on all material points, th being no decrease worthy of note except of 1,000 in the private and church sch and of $109,994 in expenditure for public schools.

From both white and colored superintendents assurances were received that schools of both classes were in a prosperous condition.

ADMINISTRATION.

The absence of suffrage in the District of Columbia places the choice of the 9 m bers of the board of trustees, which is the educational authority, in the hands of

Commissioners of the District. This board annually selects 2 superintendents, who are its chief executive officers, and chooses supervising principals, who act under the supervision of these superintendents; through its committee on teachers, the board of trustees also appoints an examining board composed of the 2 superintendents and an undefined number of supervising principals and principals of public schools. To assign each superintendent to his proper sphere of action, the public schools have been formed into 8 divisions, the first 4 comprising the white schools of Washington, the fifth those of Georgetown, and the sixth the rural schools for both races, over all of which one of the superintendents exercises authority; the seventh and eighth, comprising the colored schools of Washington and Georgetown, are under the control of his colleague.

SCHOOL FINANCES.

To support the system Congress makes an annual appropriation, one-half of which is taken from the amount raised by local taxation and the other from the public funds of the United States. The school age is 6–17. The schools are all graded, with a few exceptions among the rural schools, and each race is taught by instructors of its own color.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL DISTRICT REQUIREMENTS.

All examinations of candidates for teachers in the public schools and for promotion are conducted by a board of examiners consisting of the 2 superintendents and others appointed annually by the committee on teachers from the supervising principals and the principals of public schools. The result of such examinations is reported to the committee on teachers, who select such candidates as in their judgment have given evidence of qualification and report their selection and the class of certificate to which the candidates are thought to be entitled to the board of trustees, who proceed to consider the same and determine what candidates may receive certificates and the grade of the certificates.

DISTRICT NORMAL TRAINING.

There are 2 normal schools connected with the public school system of the District, 1 for white teachers, the other for colored. Owing to the non-publication of school reports there is no official information in regard to them at hand. The Miner Training School for Colored Women Teachers is said to have done goo dservice in training teachers for the colored schools of Washington. It is under the care of Miss Lucy Moten, a graduate of these colored schools and more recently of the State Normal School at Salem, Mass.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

The *Washington High School* reported for 1882–'83 382 students, including 51 unclassified; and for 1883–'84, 509, including 41 unclassified students, showing an increase of 127 over 1882–'83. The courses, each of 3 years, are (1) academic; (2) scientific; (3) business. There is also a special elective course for the first and second years in object drawing, historical ornament, plant forms from nature, projection, and perspective; for the third year, a choice in instrumental drawing, free hand drawing, and design in colors. The graduating class of 1883 numbered 13 young men and 23 young women. In its new quarters, the school has ample accommodations in study and class rooms, and the advantages of a library, lecture and drawing rooms, drill and exhibition halls, and laboratories. Military training, under a United States officer, was among the regular exercises of the school.

The *High School for Colored Students* is said to have been in successful operation during the year, but no report of it has been published.

OTHER SECONDARY SCHOOLS.

For information respecting business colleges, private academic schools, preparatory schools, or preparatory departments of colleges, see Tables IV, VI, VII, and IX of the appendix; for summaries of them, the report of the Commissioner preceding.

SUPERIOR INSTRUCTION.

COLLEGES FOR YOUNG MEN OR FOR BOTH SEXES.

The *Georgetown*, *Columbian*, and *Howard Universities* continued in 1883–'84 substantially the same collegiate courses they have heretofore reported. They are all of fair standard and well equipped and officered. Columbian University has been provided with a large and excellent brick building in the heart of Washington, near its medical

SCIENTIFIC AND PROFESSIONAL INSTRUCTION.

SCIENTIFIC.

Scientific courses of 3 years, leading to the degree of B. S., continue in the town and National Deaf-Mute Colleges. In the Columbian University a C School of Science and Arts has been established, and will open in October, the new university building, corner of Fifteenth and H streets. The genera will embrace studies in literature, science, and arts, leading to degrees of bac science, of civil, mechanical, and mining engineer.

PROFESSIONAL.

Theological.—Howard University in 1883–'84 had a well organized theolog partment (non-sectarian), with Greek and Hebrew for such as are prepared fo the course requiring 3 years. Its support comes from the American Missiona ciation and the Presbytery of Washington City.

Legal.—The law departments of Georgetown, Columbian, Howard, and Natio versities in 1883–'84 continued their 3-year courses of legal instruction, leadin degree of bachelor of laws; also, additional graduate courses of 1 year, on con of which the degree of master of laws is conferred. Graduates are admitted tice at the bar of the District after examination by a committee appointed court.

Medical.—The National Medical College, medical department of Columbian sity, and the medical department of Howard University have each an annual of 20 weeks, the medical department of the National University (1884) one o 27 weeks, while the medical department of Georgetown College shows one of 3 All have 3-year graded courses; all require for admission evidence of qualifica the successful study of medicine; and, for graduation, substantially 3 years o attendance on 3 courses of lectures, clinics, anatomy, and dissection, with fin factory examinations on all the studies of the course.

Pharmacy.—The National College of Pharmacy, with annual session of about 3 requires for graduation 2 years of study in chemistry (practical and analytica cology, pharmacy, materia medica, and botany, the degree of doctor of pharm ing conferred.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEAF AND DUMB.

The Columbia Institution for the Deaf and Dumb, Kendall Green, near Wash including the Deaf-Mute College, in 1883 had 106 pupils, 40 admitted during t Of these 41 were in the college department and 65 in the preparatory. The

take care of house, wash and iron, make beds, and sew. Two exhibitions of progress made are said to have given proofs of excellent training and satisfactory results.

The same association opened a free Kindergarten, with an average attendance of 20 children 3 to 6 years of age. There was also maintained jointly a kitchen garden and a Kindergarten for a portion of the year.

An industrial school has been supported, the principal going into the streets and picking up the children who were roving about in idleness and filth, and putting them under wholesome influences. This association has paid, in a 6-month term, for the instruction of one class in cookery.

The *Metropolitan Industrial School* reports in 1883–'84 the introduction, among other industries, of the manufacture of straw goods, with encouraging success. There were 56 girls enrolled in the school. A night school for boys who work during the day is said to have been well attended.

The *Reform School of the District of Columbia* reported for 1883–'84 a total population of 243; committed during the year, 103; discharged, 80; leaving at close of the year 163 inmates. All the younger boys are employed one-half their time in chair caning. The tailoring and shoe departments furnish clothes and shoes for all the inmates. Various other industries receive attention. The schools hold regular sessions throughout the year in rooms provided for the purpose.

The *Industrial Home School of the District of Columbia*, for both sexes, had, at beginning of 1883–'84, 63 inmates; received during the year, 58; discharged, 44; cared for, 121; found homes for, 22; returned to friends, 18. The schools are under public school control and are said to have made fine progress. Industries are pursued in a carpenter's shop, a greenhouse, and garden. Girls are instructed in house work and sewing, with the prospect of soon having a kitchen garden.

CHILDREN'S HOMES AND ORPHAN ASYLUMS.

Six such homes and asylums reported in 1881–'82 an aggregate of 583 inmates and continued their work in 1883–'84.

For information as to these institutions, see Table XXII of the appendix; for a summary of same, the report of the Commissioner preceding.

TRAINING IN ART AND MUSIC.

So far as known, the enterprising art schools of Mr. W. M. Rouzee, Mr. Edmund C. Messer, Mrs. S. E. Fuller, and Mrs. I. R. Morrelle, reported in 1881–'82, continue their work, though no official report from any of them has been received at this Office for 1883–'84. The same is true of the Washington Conservatory of Music, Mr. O. B. Bullard; the School of Music of Mr. Theo. Ingalls King; and the Georgetown Conservatory of Music.

EDUCATIONAL CONVENTIONS.

TEACHERS' ASSOCIATIONS.

A voluntary association of the graduates of the Normal School for White Students meets once a month to compare experiences in government and teaching.

CHIEF DISTRICT SCHOOL OFFICERS.

Hon. J. ORMOND WILSON, superintendent of public schools for white pupils in Washington and Georgetown, and of the schools for both races in the rural districts, holds office till 1885.

Hon. GEORGE F. T. COOK is superintendent of the public schools for colored pupils in Washington and Georgetown.

[Mr. Wilson is to be succeeded by Mr. W. B. Powell in 1885.]

(From report and returns of Hon. James L. Onderdonk, territorial superinte of public instruction, for the two years indicated.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

It is a source of regret that the statistics from counties and districts are so i plete, but the summary above given indicates healthy growth. The superinte says that the success of the graded schools in Boisé City and Lewiston has been gratifying, a higher standard having been attained than ever before; that ever the demand becomes more imperative for a higher degree of education; and that there is a great and increasing improvement in the school-houses built throu the Territory. The principles of light, ventilation, and hygiene are receiving in degree the attention which their importance demands; the standard of teacl improving, and there is a growing tendency to allow them a more suitable comp tion. The salaries in the rural districts average about $50 a month and boar mining communities, from $60 to $125; and in the more advanced schools, fro to $150.

ADMINISTRATION.

The territorial controller is ex officio superintendent of public instruction and c auditors are ex officio county school superintendents. Each county has a bo examiners and each district a board of 3 trustees. Schools cannot be sustained the public school fund if any political or sectarian doctrines be taught therein; the distribution of books, tracts, or documents of this character in them is forb by law.

SCHOOL FINANCES.

The public schools are sustained from the income of a general territorial school fund, from a county tax of not less than 2 nor more than 8 mills on the dollar, from moneys arising from legal fines and forfeitures, and from fees paid by teachers for certificates of qualification. The basis of distribution of the school money is the number of children of school age (5–21 years). Districts may levy special taxes for building or repairing school-houses, and, when the cost of repairs does not exceed $25, the trustees may levy a rate bill, to be collected from such patrons of the school as are able to pay.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL TERRITORIAL REQUIREMENTS.

Teachers must present to the proper school officers certificates of qualifications from the county board of examiners, said certificates to state the branches which the holder is competent to teach and to be valid for 2 years; and no certificate may be granted to any applicant who is not found competent to teach the common English branches.

TEACHERS' INSTITUTES.

The law of Idaho makes no provision for this means of instruction for its teachers, but Superintendent Onderdonk says institutes have been held in several counties, with beneficial effects, and that their establishment has given rise to a spirit of emulation among the teachers. He further says that, if the legislature would adopt a territorial system and provision could be made for holding a territorial teachers' institute, such institute would be of incalculable value to the educational interests of the Territory.

ADVANCED INSTRUCTION.

NORMAL AND SECONDARY SCHOOLS, COLLEGES, ETC.

There are no schools for normal, secondary, superior, or special instruction reported from this Territory.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. JAMES L. ONDERDONK, *territorial superintendent of public instruction, Boisé City, Idaho.*

[Third term, February, 1883, to February, 1885.]

From reports of Hon. H. Price, Commissioner of Indian Affairs, for [illegible].

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

The above table denotes an important and general advance in every way. Of the 264,369 Indians in the United States, exclusive of those in Alaska, 64,000 wear citizens' dress and 71,194 speak English sufficiently well for ordinary conversation; 38,051 families were engaged in agricultural pursuits during the year and the number of male Indians performing manual labor in civilized pursuits was 57,053. There were 29,074 houses occupied by Indians, of which number 1,975 were built during the year by the Indians and 292 for them.

ADMINISTRATION.

The school systems of the Five Nations are nearly alike. The Cherokees have a board of education, consisting of 3 persons of liberal literary attainments appointed by the principal chief and confirmed by the senate, who appoint to each primary school 3 directors for local supervision. Among the Choctaws, Chickasaws, Creeks, and Seminoles there are superintendents of public schools, boards of education for general control and for local supervision, and trustees who have charge of the schools in the districts into which the territory of each tribe is divided.

Each nation holds teachers' institutes at its capital annually. Schools are established only where 10 or more scholars can be got together. The neighborhood builds the house and the nation furnishes teachers and books. Most of the teachers are educated Indians, who teach only English in their schools. In addition to the neighborhood schools, each nation has academies and seminaries, and boarding schools for their children alone. The Cherokees have 2 fine seminaries, managed and operated by themselves. The Choctaws have 3 large academies, managed by religious associations. The Chickasaws have 4 academies, conducted by contractors who are citizens of their nation. The Seminoles have 2 and the Creeks 4, under the management of religious societies. There are also private schools receiving no support from the nations.

The schools at Carlisle, Hampton, and Forest Grove, Oreg., were continued in 1882–'83 and 1883–'84 on essentially the same plan as previously, namely, with a combination of industrial pursuits and school studies, half a day for each. It is also learned that in January, 1881, a boarding and industrial school was opened at Albuquerque, N. Mex., for the children of the Pueblo Indians of that region, which had for its first year an average attendance of 40. This school in 1883 reported 112 attending for a month or more during the year, with an average attendance of 82; in 1884 the enrolment was 147, the average attendance 115. Other schools of this class are reported at Genoa, Nebr., and at Chilocco, Ind. Ter. Movements were on foot for at least one other in New Mexico, in some connection with the projected university of that Territory, and for yet another at Lawrence, Kans.

CHIEF SCHOOL OFFICERS.

These at last advices were reported to be as follows:

FOR THE FIVE NATIONS.

Hon. O. H. BREWSTER, *president of the board of education of the Cherokees, Tahlequah, Ind. Ter.*
Hon. BENJAMIN BIRNEY, *school superintendent of the Chickasaws, Tishomingo, Ind. Ter.*
Hon. EDMUND MCCURTIN, *school superintendent of the Choctaws, Red Oak, Ind. Ter.*
Rev. JOHN MCINTOSH, *school superintendent of the Creeks, Eufaula, Ind. Ter.*
Hon. THOMAS CLOUD, *superintendent of schools for the Seminoles, Wewoka, Ind. Ter.*

FOR OTHER INDIAN SCHOOL WORK.

(From report and return of Hon. Cornelius Hedges, superintendent of public instruction of the Territory, for the two years indicated.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

The above summary, as well as other information, indicates a steady improvement in the schools in nearly all essential respects, the only exception being a small decrease in average daily attendance. But these statistics are not so complete and accurate as could be desired, owing partly to the law, which requires two reports each year, thus bringing together figures which properly belong to two separate years, and partly to the neglect of district officers to furnish their reports when due. There was a fair increase in the number of youth of school age and a greater one in the number enrolled in public schools, the enrolment being nearly 54 per cent. of the enumerated youth, notwithstanding the fact that the school age here comprises all between 4 and 21 and that very few attend school who are under 5 or over 15. The superintendent thinks that very few children between these ages are out of school. An increase was reported in the number of schools, in the average term taught, in the amount of funds expended on the schools, in the number of school-houses, and the valuation of school property. The superintendent notes a great improvement in school buildings and furniture in many parts of the Territory, nearly every city or town of considerable size having an elegant and commodious graded school building.

ADMINISTRATION.

Educational affairs are managed by a territorial superintendent of public instruction, county superintendents, and district boards of 3 trustees. The first is appointed biennially by the governor; the others are elected by the people, county officers for 2 years and district boards for 3, with annual change of 1. Provision is made for the education of colored children in separate schools. Instruction must be given in all schools, during the entire course, in morals, manners, and laws of health, with due attention to physical exercise and to the ventilation and temperature of school rooms. Nothing of a political or sectarian nature may enter into the instruction in any school.

SCHOOL FINANCES.

The schools are sustained from money derived from a county tax of not less than 3 nor more than 5 mills on the dollar, from unlimited taxes voted by the districts, from various fines, and from a fund arising from the sale of town lots previously reserved to provide for the erection and furnishing of school buildings, or for general school purposes when the district shall so elect. The county tax and the amount derived from legal penalties are distributed to the districts in proportion to their population of youth of school age, excluding Indians not under the guardianship of white persons, provided school has been maintained 3 months.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL TERRITORIAL REQUIREMENTS.

Teachers must hold certificates of qualification from the recognized school officers, such certificates to be valid for 2 years, and, to receive their last month's pay, must submit an annual report to the county superintendent and a duplicate one to the district clerk.

TERRITORIAL NORMAL TRAINING.

The law makes no provision for normal instruction. In 1882 a normal course was given in the Helena High School, but no further information has been received.

OTHER NORMAL TRAINING.

The law requires that teachers' institutes be held annually in every county having 5 or more organized districts and makes it the duty of the territorial superintendent to attend. Such institutes were held in 1883 in every county but 2, and in 1884 in every county but 1. Attendance was generally good, and 3 days were profitably spent in discussing various methods of teaching, the evenings being generally devoted to lectures or discussions of more general questions. The superintendent says the results of these institutes have fully realized the anticipated benefits. The law requires teachers to attend these institutes, but names no penalties for non-attendance.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

High school studies are a part of the territorial system. The Helena High School in 1882 reported scientific and classical courses of 4 years each, but no information has been received subsequently of this or any other.

OTHER SECONDARY SCHOOLS.

For statistics of an institution of this class, see Table VI of the appendix; and for a summary, see the report of the Commissioner preceding.

SPECIAL INSTRUCTION.

EDUCATION OF THE DEAF AND DUMB.

During 1883–'84 there were 4 deaf-mutes maintained by Montana at the National Deaf-Mute College, Washington, D. C., and 1 at the Missouri Institution for the Education of the Deaf and Dumb, Fulton, Mo.

EDUCATIONAL CONVENTION.

MONTANA TERRITORIAL TEACHERS' ASSOCIATION.

The Territorial Teachers' Institute for 1883 was held at Deer Lodge, in the latter part of August, in connection with the county institute. The attendance was not large, but good work was done and the interest increased to the last.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. CORNELIUS HEDGES, *territorial superintendent of public instruction*, Helena.
[Term, February, 1883, to February, 1885.]

NEW MEXICO.

TERRITORIAL SCHOOL SYSTEM.

ADMINISTRATION.

By an act of the legislature approved March 31, 1884, a system of public sc
was established in the Territory of New Mexico. Under this a superintendent of sc
for each county is to be appointed by the county commissioners, holding his offi
his successor is appointed. Each superintendent must within one month after
qualified, or as soon thereafter as practicable, call a public meeting in each scho
trict, when 3 directors are to be elected, to hold office till the next general ele
when the same number are to be elected for 2-year terms. Each of the voting pre
constitutes a school district, in which must be established at least one public sc
In these schools the common branches are to be taught, with history of the U
States, in English or Spanish, or both, as the directors may determine. The c
school funds are to be apportioned to the various districts in proportion to the
ber of children 5 to 20 years of age residing therein.

No reports under this system can be expected until the close of the school
1884–'85.

report and returns of Hon. L. John Nuttall, territorial superintendent of hools, for the two years indicated.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

tistics of 1883 and 1884 show growth in nearly all particulars, the only ex-sing in the per cent. of school population enrolled in public schools, the f school age having increased during the year by nearly 3,000 and that of rolled by only 638. The average attendance, however, was 1,286 more than ous year, the per cent. of this to school population remaining about the same; ge term for the Territory was 5 days longer, and the average pay of teachers , as did the whole amount expended for public schools and the valuation of operty.

erintendent says there has been a natural and vigorous growth in the schools at improvement in the character and value of the instruction given; that n increasing demand for good and well trained teachers, as well as for good furnished school-houses, with a determination on the part of school officers le to do all that is possible towards securing these.

ADMINISTRATION.

rritorial superintendent of district schools, elected for 2 years, has general public school affairs. The local officers are county superintendents, elected ople for 2 years, and district school trustees, elected for 3 years, with an-ge of 1. There are also boards for the examination of teachers, comprising rs, appointed by the county courts. The territorial and county superintend-

cents, in convention, determine what text books are to be used in the public schools. The law requires district trustees to take an annual census of school youth and report to the county superintendent the condition of the schools.

SCHOOL FINANCES.

Public schools are supported from a tax of 3 mills on $1 of ordinary taxable property, from taxation of railroads, sale of estrays, and a special district tax not to exceed 2 per cent. a year. The school funds are distributed in proportion to the number of children of school age (6–18), as reported annually by county superintendents.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL TERRITORIAL REQUIREMENTS.

Teachers must hold certificates of the required qualifications, signed by the board of examiners; these certificates are valid for the term of 1 year.

TERRITORIAL NORMAL TRAINING.

The University of Deseret gives free tuition annually to 40 normal students, in addition to the 40 annually provided for by the Territory. There was in 1883–'84 a much larger attendance in the normal department than ever before. In 1883 the course was extended from 1 year to 2 years, and the president of the university expresses himself as being thoroughly convinced of the wisdom of the change, and recommends that a model school be established in connection with the normal department, having the 3 grades of primary, grammar, and high school studies. Five students were graduated from the 2-year course in 1883 and 20 in 1884.

OTHER NORMAL TRAINING.

The Brigham Young Academy, Provo City, offers a 2-year course of normal instruction, but does not report full statistics. Utah County provides for a permanent class of 10 students in this institution.

TEACHERS' INSTITUTES.

The County Teachers' Association holds 10 sessions annually at Provo, Utah County, and among the minutes of these meetings is found the discussion of the following subjects: (1) That the grading of schools is economy of means, time, and labor; (2) that the employment of non-progressive and transient teachers is not a remunerative investment; (3) the encouragement and support of proficient teachers is a public benefit; and (4) that the school should be made a pleasant place of resort instead of a purgatory for boyhood. Other institutes were held during the year in Box Elder, Cache, Sevier, and Wasatch Counties.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS.

There is no information regarding any public high schools in this Territory other than the academic department of the University of Deseret.

ACADEMIES AND SEMINARIES.

For statistics of academies and seminaries reporting, see Table VI of the appendix, and for a summary, see a corresponding table in the report of the Commissioner preceding.

SUPERIOR, SCIENTIFIC, AND PROFESSIONAL INSTRUCTION.

UNIVERSITY OF DESERET.

The University of Deseret, Salt Lake City, provides scientific, classical preparatory, normal, and preliminary courses, the first covering 3 years and the classical preparatory and normal 2 years each. The studies include chemistry, free hand, mechanical, and architectural drawing, physiology, geometry, surveying, botany, music, French, German, Latin, &c.

A series of lectures is given upon the elements of law, intended to be preliminary to a fuller course of study in the future.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. L. JOHN NUTTALL, *territorial superintendent of district schools, Salt Lake City.*

[Term, August, 1881, to August, 1885.]

ort and return of Hon C. W. Wheeler, territorial superintendent of public for the two years indicated.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

torial superintendent in 1882–'83 reported a prosperous condition of the ughout the Territory, the educational interests keeping pace with the icement of the Territory in other respects; that the number of school dis- school-houses had increased in proportion to the great increase of popu- that the school buildings were of a better class than formerly and largely th improved furniture. The figures for 1883–'84 show a large increase in of pupils enrolled in public schools and a still larger one in the average lance, more school-houses, a larger number built during the year, more ployed, and an increase in expenditure corresponding to the advance in cts. The superintendent says that within the past few years there has ng and steadily increasing demand for a better class of teachers and as a great improvement had been made in this direction.

ADMINISTRATION.

f school officers are a territorial superintendent of public instruction, ap- 2 years by the governor and confirmed by the legislature, and a territorial lucation, composed of the superintendent and 1 person from each judicial ointed by the governor for 2 years. County officers are superintendents, he people for 2 years, and boards of examination for teachers, comprising superintendent and 2 teachers chosen by him, who must be holders of the de of certificate. District school affairs are in the hands of a board of 3 lected for 3 years, 1 being changed each year, and a district clerk. Women to school offices and *may vote at school* meetings.

Public schools must be taught by qualified teachers at least 3 months during year; the schools must teach the common English branches in the English langu and be open free to all residents 5 to 21 years old. Attention must be given to cultivation of manners and morals, to the laws of health, physical exercise of the pils, and to the ventilation and temperature of the school room. Nothing of an dol, partisan, or sectarian nature may enter into the instruction in any public sc or be admitted in any school library. To receive their apportionment of the sc funds, districts must take an annual census of the school children and report to county superintendent.

SCHOOL FINANCES.

The schools are supported from an annual tax on property of not less than 2 more than 6 mills on $1 and the proceeds of certain special taxes, fines, and penalt all to be apportioned according to the number of youth of school age. Districts r raise funds, by taxation not to exceed 10 mills on $1, to furnish additional sc facilities.

NEW LEGISLATION.

A new school law of 1883 modifies the compulsory law previously reported, mak the age of children required to attend school 8 to 18, instead of the former 6 to 16, the time for absolute attendance in ordinary circumstances 3 months each year, inst of 6 months. Time lost by any child because a school has not been taught the quired 3 months, or from other cause, must be made up the next year or as soo the disabling cause is removed. The penalty for disobedience or neglect of t requirements is $100, to go to the school funds of the district. The school age also changed from 4–21 to 6–21.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL TERRITORIAL REQUIREMENTS.

Teachers must hold certificate of qualification from the legal school officers, grade to be valid for 3 years, second grade for 2, and third grade for 1 year. T holding first grade county certificates and who have been teaching for 3 years eligible to examination for first grade territorial certificates.

TERRITORIAL NORMAL TRAINING.

The normal department of the *University of Washington Territory* gives a 3- course of normal instruction, including chemistry, geology, physiology, botany, mercial law, and other higher English branches. A primary training school is nected with this department, giving illustrative lessons in the art of teaching.

Whitman College also offers a 3-year course of normal training, and students complete the first 2 years or elementary course receive certificates, while those pleting the advanced or full course receive normal diplomas. The higher Eng branches are taught, with music, mental philosophy, and the science and metho teaching.

For statistics of these departments, see Table III of the appendix; for a summ the report of the Commissioner preceding.

SECONDARY INSTRUCTION.

PUBLIC HIGH SCHOOLS AND OTHER SECONDARY SCHOOLS.

No definite information is at hand in regard to public high schools.

For statistics of private academic schools reporting, see Table VI of the appen and for a summary, the report of the Commissioner preceding.

SUPERIOR INSTRUCTION.

INSTITUTIONS FOR YOUNG MEN AND YOUNG WOMEN.

The University of Washington Territory, Seattle, and Whitman College, W Walla, open alike to both sexes, present a 4-year classical course, with scient commercial, and normal courses of 3 years each, and Whitman a 3-year literary cou Both give attention to preparatory studies, and the university has departmen music and art.

For statistics of these institutions, see Table IX of the appendix; and for a s mary, the report of the Commissioner preceding.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. C. W. WHEELER, *territorial superintendent of public instruction, Olympia.*

[Term, January 5, 1882, to January 5, 1884.]

To be succeeded by Hon. R. C. KERR, whose term is to be from January 9, 1884, to January 9, 18

(From the reports of the governor of Wyoming for 1881 and 1883.)

TERRITORIAL SCHOOL SYSTEM.

GENERAL CONDITION.

Information as to the public school work of the Territory is so meagre and unsatisfactory that but few items can be given even for 1882–'83, but, as may be seen above, they denote improvement.

ADMINISTRATION.

The territorial librarian is ex officio superintendent of public instruction for the Territory. County superintendents are elected biennially by the people, and for each school district boards of 3 trustees are elected for 3 years, with annual change of 1. Women are eligible to vote and to hold school offices. Separate schools may be established for colored children when there are 15 or more of these in a district. A compulsory school law requires parents or guardians to send their children of school age (7-21) to some school at least 3 months in each year or furnish satisfactory reason for not doing so, under penalty of $25. County superintendents and district directors may, in their discretion, establish schools of higher grade than the ordinary district schools, the studies pursued in them to be determined by the territorial teachers' institute.

SCHOOL FINANCES.

The public schools are sustained from a poll tax of $2 on each voter, from 2 mills on $1 of all taxable property, and from fines, penalties, and forfeitures. The people may, at the annual district meeting, vote such tax as they deem necessary to pay teachers, to purchase libraries, build or repair school-houses, and to procure fuel, or books for poor children, the amount for a library not to exceed $100 for any one year.

PREPARATION AND QUALIFICATIONS OF TEACHERS.

GENERAL TERRITORIAL REQUIREMENTS.

Teachers must have certificates of the required qualifications from the legal school officers, and in the question of salary no discrimination is made on account of sex when the qualifications are equal.

TERRITORIAL NORMAL TRAINING.

The law requires the superintendent of public instruction, with the county superintendents and principals of all graded schools in the Territory, to hold annually, at some convenient place, a territorial teachers' institute, for the instruction and advancement of teachers, to continue not less than 4 nor more than 10 days; but no information is at hand of any such meeting.

CHIEF TERRITORIAL SCHOOL OFFICER.

Hon. JOHN SLAUGHTER, *territorial librarian and ex officio superintendent of public instruction, Cheyenne.*

Mr. Slaughter has been ex officio superintendent since 1873. His term of service will expire December, 1884.

EDUCATIONAL ASSOCIATIONS AND CONVENTIONS.

NATIONAL EDUCATIONAL ASSOCIATION.

The twenty-second annual meeting of the National Educational Association w held at Saratoga, N. Y., July 9-11, 1883, including, as usual, meetings of the general sociation and of the different departments, of which a new one was organized on t occasion — the department of art education — making 6 departments, the others bei those of higher instruction, superintendence, industrial education, normal schoo and elementary schools. The following were the addresses given before the gener association: "Examination of teachers," by Eli T. Tappan; "The moral influenc of manual training," by Dr. J. R. Buchanan; "The teaching of drawing in gra mar schools," by Walter S. Perry; "City systems of management of public schools," by J. T. Pickard; "The normal school problem and the problem of the schools," by H H. Straight; and "What has been done for education by the Government of the Unite States," by Hon. John Eaton.

The twenty-third annual meeting, held at Madison, Wis., July 15–19, 1884, brough together, it is said, the largest and most eminent gathering of educators that ev assembled on this continent. It is estimated that over 6,000 persons were prese during the four days. The speakers announced were present as a rule, and the pr gram was successfully carried out. All sections and States were well represented, were all grades and methods of teaching; the discussions, oral and written, evinc ability, research, and enthusiasm; the educational exhibits showed improvement apparatus and text books, while the various reunions held and the general cordiali were noticeable features of the gathering.

On account of the large number present, the general sessions were divided into thr sections, one meeting in the assembly chamber, another in the senate chamber, and t third in a church. Addresses of welcome were made by the governor of the Sta Hon. Jeremiah M. Rusk; by Mayor B. J. Stevens, of Madison; and by Dr. Jo Bascom, president of the University of Wisconsin. Among the topics presented the general association were "Citizenship and education," by Hon J. L. M. Curry, Richmond, Va.; "The Utah problem as related to national education," by Prof. M. Coyner, PH. D., Salt Lake, Utah; "Science of education," by Hon. T. W. Bickn LL. D., Boston; "Educational status and needs of the South," by Maj. R. Bingha superintendent of Bingham School, North Carolina; and "The educational outlo in the South," by Prof. B. T. Washington, Tuskegee, Ala. An address was m by Albert Salisbury, superintendent of education of the American Missionary Assoc tion, showing what the North has done in and for the South since the war, mai through the missionary societies of the churches. One by Hon. G. J. Orr, of Georg contained an eloquent appeal for national aid for southern education, and Prof. W iam H. Crogman, of Atlanta, Ga., gave an able résumé of the present status of ne education in the South, its helps and hindrances. Following this topic came that of education of the Indians. General S. C. Armstrong, of the school at Hampton, Va., g the results of his six years' experience in the teaching of Indians there, and Alfred Riggs, of the Santee Agency, Nebraska, gave a paper entitled "Special difficulties educating Indians." A collection amounting to $175 was then taken to defray the penses incurred in having a party of Indians present from the Santee Mission, Nebras The third evening was set apart as "Woman's evening," a new feature in the assoc tion meetings, and one which in this case proved a very acceptable one, the pla of meeting being crowded with eager listeners. Miss Sarah E. Doyle, of Rhode Isla presided. The first address was by Miss May Wright Sewall, of Indiana, on "Wom work in education," and Mrs. Louisa P. Hopkins, of New Bedford, Mass., presen the same topic. Miss Frances E. Willard, of Chicago, spoke on "Temperance in school Mrs. Eva D. Kellogg, of Massachusetts, on "Needs in American education;" and M Clara Conway, of Memphis, Tenn., on "The needs of southern women." During t evening Governor Rusk tendered a reception to all members of the association at private residence. Elaborate preparations had been made for this reception and ab 5,000 people were entertained.

On the closing day the association listened to remarks from Monsignor Capel, distinguished Anglo-Roman divine, who urged the importance of paying greater att tion to the study of the English language in our schools, and spoke again in the ev ing, giving the "Catholic view of public education" and reiterating the desire of church for religious instruction. Addresses were also presented by G. Stanley H LL. D., professor of pedagogy at Johns Hopkins University, on "Elementary edu tion;" by Hon. J. W. Dickinson, secretary of the Massachusetts State board of edu tion, on "Method in teaching"; and by J. M. Greenwood, superintendent of schoo

Kansas City, Mo., on "Primary instruction." President W. T. Harris and others discussed the "Relation of the art of education to the science of education," and closing remarks were made by Rev. A. D. Mayo, of Boston, General John Eaton, LL. D., and others. General Eaton expressed great satisfaction at the success of the convention and thought that it would be the means of a great awakening in educational interests, especially in the South.

Among the resolutions adopted was one favoring national aid to education in the South; another advised the introduction in public schools of instruction as to the effects of alcoholic liquors on the human system.

Sessions were held during the four days by each of the 6 departments of the association, and many of the papers and discussions were of special interest; but lack of space forbids even an enumeration of the many topics presented.

NATIONAL COUNCIL OF EDUCATION.

The National Council held its fourth annual meeting July 10–13, 1884, at Madison, Wis. About 25 members were present at the opening session, President E. E. White, of Ohio, in the chair. After the opening address of President White attention was given to the report of the committee on hygiene in education, the special topic being "Recess or no recess." The report, which was read by Dr. J. H. Hoose, of the State Normal School, Cortland, New York, favored the continuance of the recess, as also did, apparently, a majority of the speakers who discussed it. Among other subjects considered by the council were "Oral instruction," by Hon. J. W. Dickinson, of Massachusetts; "The duties of city superintendents," by Aaron Gove, of Denver, Colo.; "Mode of election, tenure of office, and grades of superintendents," by A. J. Rickoff, of Yonkers, N. Y.; and "Preparation for college," by Rev. Lemuel Moss, D. D., of Indiana. All these topics were quite fully discussed and some of them recommitted to committees for future report.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

The thirty-third annual meeting of this association, held at Philadelphia, September 4–7, 1884, it is said, was one of the largest and most successful meetings ever held. Among the addresses and papers of the first day were the following: Before the department of economic science and statistics, one on "Scientific methods and scientific knowledge in common affairs," by General John Eaton, United States Commissioner of Education; before the physics section, one on the nature of electricity, by Prof. John Trowbridge; before the section of geology and geography, one on the crystalline rocks of the Northwest, by N. H. Winchell, of Minnesota; and before the anthropological section, one on the antiquity of man, by Edward S. Morse, of Salem, Mass. At the second day's session Professor Minot called attention to the proposed organization of an International Scientific Congress. He said that the British Association, at its recent session in Montreal, received the proposition most cordially, and appointed as a committee to consider it three of the most eminent members of the association. In the economic science section a large collection of charts and diagrams was explained by Prof. E. B. Elliott in elucidation of "The principles of graphic illustration." The professor also gave a lecture on "The credit of the United States Government," after which Miss Alice C. Fletcher, of the Peabody Museum, Cambridge, Mass., gave personal experiences among the Omahas, her text being "Lands in severalty to the Indians," and John Biddulph Martin, of London, England, read a paper on "The future of the United States." Before the same section, on the following day, a paper was read on "Technical education in the British Islands," by Henry Hennessy, F. R. S., of England; also, one on the commercial relations of the United States with Spain and her colonies, by His Excellency Don Arturo de Marcoartu. Mr. Charles W. Smalley, of Washington, D. C., then submitted some statements respecting the salmon industry.

In the chemistry section, on the second day, an interesting discussion occurred on the "Analysis of a mural efflorescence," in which Professor Silliman, of Yale, took a prominent part. In the section on geology and geography the most interesting subject considered was the relative level of the Atlantic Ocean and the Gulf of Mexico, with remarks on the Gulf Stream and deep sea temperatures, by Prof. J. E. Hilgard.

In the mechanical science section Professor Alden read a paper on "Training for mechanical engineers."

In the section on physics, during the third day, Prof. Graham Bell made a statement of a possible method of electrical communication between vessels at sea, which would be also available between light-houses within distances of one mile. Mr. W. Preece, electrician to the British Government, followed in a description of experiments made by himself between the Isle of Wight and the mainland, proving that it was possible to maintain communication by means analogous to those described by Professor Bell. Prof. C. A. Young, the retiring president of the association, read a scholarly paper on "The pending problems of astronomy." After the election of officers for the ensuing year the association adjourned to meet at Bar Harbor, Mount Desert, Maine, provided satisfactory arrangements could be made at that place, otherwise the meeting will be held at Ann Arbor, Mich.

AMERICAN INSTITUTE OF INSTRUCTION.

The American Institute of Instruction held its fifty-fourth annual meeting at Fabyan's, White Mountains, July 11–13, 1883, which was largely attended and is said to have been a very interesting session.

Its fifty-fifth annual session convened at Cottage City, Martha's Vineyard, Massachusetts, July 7–10, 1884, at the opening of which about 2,000 persons were present, the president, Homer B. Sprague, in the chair. He sketched the history of the institute from 1830. At that time popular education was in a deplorably low condition. There had been no efforts to make teaching a profession; schools were kept, but in no true sense were taught; parental indifference and neglect were every where prevalent. In such a state of things this association originated, and has coöperated in all the efforts put forth in behalf of education, helping in the solution of every educational problem.

At the close of this interesting address, W. T. Harris, LL. D., of Concord, Mass., introduced the first topic, "Moral instruction in public schools," followed by Hon. J. W. Dickinson, secretary of the Massachusetts board of education, in a discussion on "High schools." A paper on "Special preparation for citizenship" was then read by George H. Martin, of Bridgewater, Mass., and ably discussed by General H. B. Carrington, LL. D., of Boston. Prof. A. B. Palmer, M. D., LL. D., of Michigan University, spoke of the importance of a knowledge of sanitary science, or the science and art of good living, as a branch of popular education.

"The New England Primer," "Language in schools," "One way of studying poetry in schools," "English in schools," "The educational reading of teachers," with other topics, were presented and discussed with interest. Hon. Daniel H. Chamberlain, of New York, in "A reply to Charles Francis Adams, jr.," opposed at some length the main position of Mr. Adams, that Greek should be optional in college. Hon. J. W. Patterson, superintendent of public instruction, New Hampshire, introduced "Industrial education," and, among many other wise things, said that our systems of instruction have come down to us strong on the intellectual side but weak on the practical. "Natural history in schools" was well presented by Miss Lucretia Crocker, supervisor of Boston schools. Hon. John D. Philbrick, ex-superintendent of Boston public schools, in discussing "Reform of the tenure of the teacher's office," very justly said that the pivotal question in pedagogy is the question of the teacher. The fundamental requisite of a good school system is a desirable status for the teacher, and the indispensable requisite for such a status is certainty of position.

The following resolutions were passed:

"*Resolved*, That, whereas the great advance made in the adoption of improved methods of instruction and school management is largely due to the intelligent supervision of competent educational experts, we desire to call the attention of school authorities, particularly in sparsely settled districts, to the importance of adopting plans which shall give to the schools the benefit of such supervision.

"*Resolved*, That we reaffirm the sentiments heretofore expressed many times by this institute in support of the National Bureau of Education and in appreciation of the great value and importance to the cause of education of the work it is doing."

John Fiske, LL. D., then gave his lecture on "Manifest destiny," after which President Sprague, in a few well chosen words, introduced the president elect, Hon. J. W. Patterson, of New Hampshire, and the fifty-fifth annual meeting of the American Institute of Instruction adjourned.

FRÖBEL INSTITUTE OF NORTH AMERICA.

The second annual meeting of the Fröbel Institute was held July 15–18, 1884, at Madison, Wis., the president, W. N. Hailmann, of La Porte, Ind., in the chair. After the annual address of the president a number of others were given, among which were the following: "How can the friends of Fröbel be organized for efficient local work?" "How should efficient training schools be organized?" "The benefits that may be expected from charity Kindergärten," and "To what extent should primary teachers be familiar with Kindergarten methods?" Before adjournment a committee was appointed to take the necessary steps for securing the organization of a Kindergarten section in the National Teachers' Association. It was resolved, however, that the identity of the Fröbel Institute be retained and meetings of it be held as often as practicable.

NATIONAL ACADEMY OF SCIENCES.

This body held its regular session at Washington, D. C., April 15–18, 1884. Among the subjects presented were "The sufficiency of terrestrial rotation to deflect river courses;" "The origin of crystalline rocks;" "On the photographs of the transit of Venus;" "Zoölogical results of the deep-sea dredging expedition, United States Fish Commission steamer Albatross;" "On the depths of the western part of the Atlantic Ocean and Gulf of Mexico," with an exhibition of a relief model; "On the relative levels of the western part of the Atlantic Ocean and Gulf of Mexico, with respect to

the Gulf Stream ;" "On the existence of tin ore in the older rocks of the Blue Ridge," &c. Professor Gallaudet, of the National Deaf-Mute College, spoke of some recent results of the oral and aural teaching of the deaf, illustrating his remarks by conversing with a deaf-mute boy, a student of the college. The boy read speech from the professor's lips and replied in tones usually understood by the audience.

AMERICAN MEDICAL ASSOCIATION.

This association was organized in 1847 and held its thirty-fifth annual meeting in Washington, D. C., May 6–9, 1884, with 590 names registered. A. Y. P. Garnett, M. D, called the meeting to order, and President Austin Flint, M. D., delivered the opening address, in which he said the object of the association was to promote improvement in medical instruction and to advance the standard of medical acquirements; that the terms cultivation and advancement of medical knowledge implied progression; that the time would come when means would be found to destroy morbific agents outside of the body, thus securing prevention of disease. and means would be found to destroy the agent within the body, and thereby afford the power to arrest the course of disease. Other addresses were delivered on medicine, diseases, dentistry, surgery, and anatomy.

AMERICAN PHILOLOGICAL ASSOCIATION.

The sixteenth annual session of this body was held in Hanover, N. H., July 8–9, 1884, President M. L. D'Ooge in the chair. After the election of new members papers were read on "The theory and function of the thematic vowel in the Greek verb" and "On a group of Sanscrit derivatives." "The historical method and purpose in philology" was the subject of an address delivered by the president, in which he congratulated American scholars upon the successful opening of the American School of Classical Studies at Athens and the work at Assos by the Archæological Institute, both of which institutions give promise of doing much for the honor of American scholarship and of promoting the study of classical philology in this country. Other subjects were briefly discussed, among them, "Primary and secondary suffixes of derivation and their exchanges," "On the relation of the Anglo-Norman vowel system to the Norman words in English," and "The influence of written English and of the linguistic authorities upon spoken English." Professor March, chairman of the committee on the reform of English spelling, reported no very active movement in regard to the spelling reform, and proposed starting a periodical called Language, in which the spelling recommended by the Philological Association should be used.

SPELLING REFORM ASSOCIATION.

The ninth annual meeting of this association was held at Hanover, N. H., July 10, 1884. President March delivered an address, reviewing the history of the reform movement, which he said it was in contemplation to prepare an alphabetic vocabulary, with amended forms of all the ordinary English words susceptible of amendment.

NEW ENGLAND ASSOCIATION OF SCHOOL SUPERINTENDENTS.

The regular semiannual meeting of this association was held in Boston, May 23, 1884, Mr. J. L. Brewster, of Lawrence, in the chair. The one subject for consideration in the meeting was the "Teaching of reading." W. T. Harris, LL. D., of Concord, Mass., said that the objects of teaching reading are two: first, to enable the pupil to understand for himself the literature he is reading; and, second, to enable him to read the printed page so that others may understand it. Superintendent G. I. Aldrich, in "Choice of methods," said the method employed must be based on correct principles, such as will make learning to read as pleasant as possible. Superintendent W. F. Gordy, of Ansonia, in "The sentence method," defined the two kinds of reading as eye reading and oral reading, the first of primary importance, and said that the child passes from thought to expression. W. H. Laubert, of Malden, in "Supplementary reading," declared it to be a futile attempt to hold a child's attention to a reading exercise which had become devitalized by rereading, and that supplementary reading cultivates a habit of reading, creates a taste for good reading, and teaches a child how to read. Superintendent Bates, of Hingham, said the child's reading is constantly leading him into difficulties, and that teachers should instruct the child how to use the dictionary by careful drill. Superintendent George A. Littlefield, in his remarks on "Public libraries and schools," said judicious supplementary books were needed; that the time of every lesson should be economized and common pieces should be read but once. Superintendent W. E. Pulsifer, on "Silent reading *vs.* elocution," said: "Elocution as an art should be studied, for it yields to the world much that makes it happier and better; good reading as a vocal exercise is the proper expression of thought and feeling in speaking tones; but," the speaker added, "the fact remains that the great mass of children need to be so trained *that they* can grasp the meaning of the printed

* Amount raised by taxation for wages of teachers, fuel, and care of fires and school rooms.

† Total of reported items only, and not the whole income for school purposes.

‡ Items not fully reported.

§ Includes expenditure for repairs.

‖ This is not included in the total receipts, the interest on the permanent fund being retained in the State treasury until the fund is large enough to make a per capita apportionment.

t Includes income for evening schools.

u For the year ending October 31, 1882.

v Paid out of general county funds and not included in expenditure of school funds.

w Includes a special tax for teachers and building.

x United States Census of 1880.

y Total income not reported; amount given is that reported as expenditure.

z For boarding schools only.

f For current expenses only.

g Includes amount paid for interest or to cancel debt.

d As reported by county commissioners; the county clerks' report gives $3,408,765 as total expenditure, which figure the State superintendent regards as more correct than the county commissioners' total.

i Per capita cost on the entire sum expended.

u As reported for 1881; exclusive of large quantities of swamp lands.

v So reported, though the sum of the items given is $494,129.

w Includes evening school reports.

z For the year ending October 31, 1882.

y Actual expenditure not reported: the figure given includes the total State apportionment for the year and the amount paid teachers from private funds and by cities.

z In 1878.

aa Cost per capita a term for teachers' salaries and all current expenses.

bb United States Census of 1880.

cc So reported, though the sum of the items given is $260,030.

dd Includes the Cherokee asylum and orphan funds.

ee Schools supported from general tribal funds.

ff For boarding schools only.

gg The income derived from these funds is augmented from other sources.

a State appropriation.
b From poll tax.
c Exclusive of the local funds of Mobile County and Faunsdale district, aggregating $23,186.
d State apportionment.
e County apportionment, city and district taxes.
f Includes balance on hand from last school year.
g Paid out of general fund of counties, and not, therefore, included in State expenditure.
h Included in "salaries of teachers" (column 41 of this table).
i For white schools only.
j County assessment for school purposes.
k Salaries of county superintendents only.
l Amount of tuition revenue only.
m Local taxes and subscriptions.
n Includes compensation to commissioners by State, interest on county surplus bond,
o These figures, which are for 1883, are exclu of the city of New Orleans, and includ ports from only 46 out of 58 parishes.
p Amount available from State treasury.

Territories, showing the income, expenditure, &c., for 1883–'84—Continued.

? Amount available from town treasuries.

* This figure is apparently exclusive of the receipts for general purposes, under which come those for supervision and new schoolhouses.

a Includes expenditure for repairs.

b Total of reported items.

c Increase of nearly two years.

d Includes amount paid for interest or to cancel debt.

e Includes income for evening schools.

x In 1883.

y Includes total county apportionment.

z From sale of bonds.

aa $1,875 for salary of territorial superintendent and $32,639 paid county superintendents by counties, neither sum being included in total expenditure.

bb Items not fully reported.

cc United States Census of 1890.

dd Total income not reported; amount given is that reported as expenditure.

a In estimating these items, only the interest on the amount expended under the head of "permanent" (i. e., for sites, buildings, furniture, libraries, and apparatus) should be added to the current expenditure for the year.
b Includes $21,500 expended for normal schools.
c Estimated by the Bureau, 6 per cent. being the rate used in casting interest on permanent expenditure.
d In 1880.
e In 1882.
f Per capita on current expenses only.
g Includes salaries of superintendents.
h In 1883.
i For white schools only.
j In 1881.
k This amount from State and local largely supplemented by patrons.
l Amount of tuition revenue.
m Per capita on total expenditure.
n Includes salaries of secretaries and interest on bonds, &c.
o The sum included in this total as ture for colored schools is the amo for them, and may be somewhat less than the actual expenditure.

rritories, showing the income, expenditure, &c., for 1883-'84—Continued.

ANNUAL EXPENDITURE.							
Expenditure in the year per capita on pupils enrolled in public schools.	Expenditure in the year per capita on average attendance in public schools.	Expenditure in the year per capita on population between 5 and 18.	Expenditure in the year per capita on population between 5 and 18, including interest on the value of all school property.	Amount of available school fund.	Amount of permanent school fund (including portion not now available).	Estimated real value of sites, buildings, and all other school property.

* From Report of the Commissioner of Education for 1882-'83.
a Succeeded Hon. J. M. Fish, who furnished the above figures.
b Average duration of school in days.
c Since succeeded by C. Moss Smith.
d These statistics are for the Middletown City school district only.
e Total population of the town.
f In day schools only.
g Including Monroe County.
h School census of 1880.
i For the entire city.
j Succeeded Hon. L. E. Baker, who furnished the above figures.
k Estimated.

TABLE II.—*School statistics of cities containing* 7,500 *inhabitants and over, for* 1883-'84, *&c.*—Continued.

	City.	Superintendent.	Total population (census of 1880).	School population.				Number enrolled in public schools.			Estimated enrolment in private and parochial schools.	Number of school days in the year.	Number of days the schools were taught.
				Legal school age.	Number under 6 years of age.	Number over 16 years of age.	Total number of legal school age.	Number under 6 years of age.	Number over 16 years of age.	Whole number enrolled, excluding duplicate enrolments.

* From Report of the Commissioner of Education for 1882-'83.

a In primary, grammar, and high schools.

b Employed in both day and night schools.

c In primary and grammar schools.

d Average whole number.

e For term ending December 22, 1882.

f Includes special teachers.

g These statistics are for the Kingston school district only.

h Includes corporate schools.

i In unclassified school.

In the day school for deaf-mutes there are enrolled 31 pupils under 2 teachers.

k Estimated.

l Exclusive of evening school enrolment.

TABLE II.—*School statistics of cities containing 7,500 inhabitants and over, for 1883–'84, &c.*—Continued.

[a] From Report of the Commissioner of Education for 1883-'83.
[b] Monthly salaries.
[c] These are maximum salaries.
[d] Salary of secretary.
[e] These statistics are from a return for the year ending December 31, 1882.
[f] Salary of assistants in primary and grammar schools.
[g] The city superintendent is also principal of the high school.
[h] The statistics of attendance here given are for white schools of Georgetown and Washington only; the financial statistics are for all the schools, white and colored, of the District of Columbia.

TABLE II.—*School statistics of cities containing* 7,500 *inhabitants and over, for* 1883–'84, *&c.*—Continued.

* From Report of the Commissioner of Education for 1882–'83.

a From State appropriation.

b Includes amount received from permanent fund.

c In 1881.

d For libraries and apparatus.

e These statistics are for the Middletown City school district only.

f Includes a temporary loan of $50,000.

g Including Monroe County.

h These figures are for the whole county.

i $20,000 from bonds sold and $9,664 from temporary loans. Includes a loan of $42,292.

k Sites, buildings, rents, and repairs.

l This is the sum of the items given, though the reported total is but $35,785.

m Apparently includes State tax.

n From liquor licenses.

o From sale of bonds.

p Amount received from permanent fund.

TABLE II.—*School statistics of cities containing 7,500 inhabitants and over, for 1883–'84, &c.*—Continued.

	City.	Total taxable property in the city.		Tax for school purposes.		Receipts.									Expenditures.		
		Estimated cash value.	Assessed valuation.	Mills per dollar of cash value.	Mills per dollar of assessed value.	Balance on hand from last school year.	Amount received from interest on permanent fund.			Amount received from taxation.		Amount received from tuition fees.	Amount received from all other sources.	Total receipts.	Permanent.		
							State.	County.	Local.	State.	Local.				Sites and buildings.	Furniture and apparatus.	Libraries.

* From Report of the Commissioner of Education for 1882–'83.

a For all incidental or contingent expenses.

b Repairs and permanent improvements.

c Includes other expenses.

d These statistics are for the Middletown City school district only.

e Insurance, water, and gas.

f Including Monroe County.

g Total expenses per capita.

h These figures are for the whole county.

i Includes total cost of evening schools.

j Items not fully reported.

k Based on average number belonging.

l So reported, though the sum of the items given is $46,818.

m Interest only.

n This includes incidental or contingent expenses only.

o Exclusive of amount paid for indebtedness.

p Total of reported items; the reported total is but $46,701.

q Based on average enrolment.

* From Report of the Commissioner of Education for 1882-'83.
a Includes amount expended for fuel and insurance.
b Includes other supplies.
c Does not include expenditure for permanent repairs.
d Includes $2,916, which is the cost to the City of Portland School for the Deaf.
e Amount raised by taxes for wages of teachers, board, fuel, and care of fires and school rooms.
f Total of reported items only.
g For all incidental or contingent expenses.
h Items not fully reported.
i Exclusive of expenditure for permanent objects.
j Fuel and lights.
k Interest only.
l Includes rent.
m Repairs and rent.
n Includes pay of janitors and expenditure for furniture, apparatus, and insurance.

TABLE II.—*School statistics of cities containing* 7,500 *inhabitants and over, for* 1883–'84, *&c.*—Continued.

	City.	Expenditures.													Average expenses per capita.	
		Payment of indebtedness.		Tuition.		Incidental or contingent expenses.										
		Bonds (including interest).	Floating (including interest).	Cost of supervision.	Amount paid for teaching.	Officers of board, secretaries, messengers, &c.	Pay of janitors of buildings.	Fuel.	Rent.	Insurance.	Repairs.	School books supplied for use of pupils.	All other supplies and current expenses.	Total expenditure.	Supervision and instruction, based on average daily attendance.	Incidental or contingent expenses, based on average daily attendance.

* From Report of the Commissioner of Education for 1882–'83.

a Includes expenditure for fuel, rent, insurance, repairs, school books, and other supplies.

b For all incidental or contingent expenses.

c Salaries of school committees included.

d Based on enrolment.

e In day schools. In evening schools, the estimated average expense per capita for supervision and instruction is $7; for incidentals, $1.50.

f Items not all reported.

g Includes other incidental expenses.

h These statistics are for the Kingston school district only.

i On account of change in school year, this does not represent a full year's expenditure.

j Includes salaries of superintendent's clerks and expenses of shop and nautical school.

k Includes salaries of superintendent and librarian.

l The Public Library of Cincinnati cost the board of education for its maintenance during the same period $35,419.

m Expenditure for fuel, rent, insurance, repairs, school books, &c.

TABLE II.— *School statistics of cities containing* 7,500 *inhabitants and over, for* 1883–'84, *&c.*— Continued.

	City.	Expenditures.													Average expenses per capita.	
		Payment of indebtedness.		Tuition.		Incidental or contingent expenses.								Total expenditure.	Supervision and instruction, based on average daily attendance.	Incidental or contingent expenses, based on average daily attendance.
		Bonds (including interest).	Floating (including interest).	Cost of supervision.	Amount paid for teaching.	Officers of board, secretaries, messengers, &c.	Pay of janitors of buildings.	Fuel.	Rent.	Insurance.	Repairs.	School books supplied for use of pupils.	All other supplies and current expenses.

* From the Report of the Commissioner of Education for 1882–'83.
a So reported, though the sum of the items given is $31,441.
b For day pupils only; cost per pupil for term of 60 evenings on average attendance, $5.22.
c $4,500 paid into the sinking fund, and interest amounting to $3,113.
d Total expenditure for the schools of the three districts of the city; no itemized report of incidental expenses from second district.
e For all incidental or contingent expenses.
f Estimated.
g This is the sum of the items given, though the reported total is but $12,945.
h Includes salaries of janitor and book-keeper.
i Includes pay of janitors.
j These statistics are from a return for the year ending December 31, 1882.
k Paid by the city at large, and not included in total school expenditure.
l $3,459 in addition were spent for evening schools.
m Exclusive of evening schools.
n These statistics are for all schools, white and colored, in the District of Columbia.

Cities containing 7,500 inhabitants and over from which no statistics have been received.

* From Report of the Commissioner of Education for 1882–'83.

a Exclusive of appropriations for permanent objects.

b This is for normal pupils only.

c These statistics are for the year ending June 1, 1883; since then it is reported that the first two years of the normal work are the same as those of the preparatory department, and that the remainder of the normal work is, as yet, unprovided for.

d Succeeded July, 1883, by C. F. Carroll.

e As East Florida Seminary; reorganized as State Normal School in 1880.

f These are in model department, and include pupils of the grammar and primary as well as those of the secondary or high school grade.

g Training class of the Chicago Fröbel Kindergarten Association was removed from Chicago to this school in October, 1883.

h Appropriation in common with other public schools of the city.

i There were 95 males and 100 females in the training school.

j Includes $30,000 for building.

k There were 27 males and 25 females in attendance in the model school.

l Includes instructors in the high school.

m These are high school pupils.

n Associated with this school is a Kindergarten normal department.

o Includes income from endowment.

p No special appropriation; the salaries aggregate $8,160, and this is about the cost of the school.

q These figures are for the year 1882.

r Salary of principal and assistant.

s In course 1 (the art of teaching), 30 students; course 2 (the science of education), 48; course 3 (school supervision), 15; course 4 (teachers' seminary), 10; course 5 (history of education), 10.

t $7,700 are for improvements and repairs.

* From Report of the Commissioner of Education for 1882–'83.

a To normal pupils.

b To normal pupils; others, $7.50 to $30.

c To normal pupils; others, $20 to $50 a year.

d The State gives county and city boards discretionary power in the matter.

e In addition to three years in the high school.

f These statistics are for the year ending June, 1883; since then it is reported that the first two years of normal work are the same as those of the preparatory department, and that the remainder of the normal work is, as yet, unprovided for.

g Free to those pledged to teach in the State.

h Free that of university.

i Free to normal pupils; to others, $20 to $30.

j Training class of the Chicago Fröbel Kindergarten Association was removed from Chicago to this school in October, 1883.

k In all schools of the county, except those of Chicago.

l These items all belong to the public school system.

m Certificates are given on completion of course; diplomas at the end of two years of teaching.

n Graduates teach on receiving diplomas.

o Four years in high and one after in the training school.

p Also see report of university library (Table IX).

q After two years of successful teaching graduates may receive the degree of "bachelor of didactics."

r Associated with this school is a Kindergarten normal department.

s Incidental fee; tuition is free.

t In schools of the city.

u To 200 State students; $50 to others.

v Receive diplomas after one year's successful teaching.

w These figures are for the year 1882.

x To those who comply with the condition of teaching in the schools of Massachusetts; incidental fee, $4.

y All courses are elective.

z Free to appointees of senators and representatives in legislature, not exceeding 2 each.

aa State certificates are granted by the State superintendent without further examination.

bb Reported with classical department (see Table IX).

* From Report of the Commissioner of Education for 1882–'83.

a Incidental fee; tuition is free.

b State certificates are granted by the State superintendent without further examination.

c In schools of the county.

d In schools of the city.

e Do not graduate students from normal course; 14 of those in the normal department last year will teach this; 4 are full graduates of the university.

f Studies in didactics are elective in junior and senior years.

g Matriculation fee; tuition is free.

h The certificate is good for two years in any part of the State; the diploma is a perpetual certificate.

i Uses high school library.

j For all who will teach two years in the State; for others $50 a year.

k To normal students.

l Free to normal students; $12 to $24 to academic.

m To normal students; $21 to $28 to others.

n Drawing is taught through all grades completing the high school course.

o The ward schools are used for practice schools and for observation.

p In summer school; 40 weeks in university course.

q These figures are for the year 1882.

r To non-residents only.

s See Table VI.

t For two years.

u Graduates from the first course receive a State license to teach for five years; from the second, for ten years.

TABLE III.—PART 1.—*Statistics of public normal schools for* 1883-'84, *&c.*—Continued.

NOTE.—x indicates an affirmative answer; 0 signifies no or none; .... indicates no answer.

	Name.	Graduates in the last year.		Number of years in full course of study.	Number of weeks in scholastic year.	Library.			Number of educational journals and magazines taken.	Annual charge to each student for tuition.	Is drawing taught?	Has the school a collection of models, casts, apparatus, and examples for free hand drawing?	Is music taught?		School possesses a chemical laboratory?	School possesses a philosophical cabinet and apparatus?	School possesses a museum of natural history?	School possesses a gymnasium?	Model school attached to the institution?	Students receive diplomas or certificates on completion of course?	Graduates teach in State common schools without further examination?	Time of anniversary.
		Whole number.	Number who have engaged in teaching.			Number of volumes.	Increase in the last school year.	Number of volumes of pedagogical works.					Vocal.	Instrumental.

* From Report of the Commissioner of Education for 1882–'83.

a Reported with scientific department (see Table X, Part 1).

b For life scholarship in commercial department; same in telegraphy.

c In day school.

d For commercial course.

e Students in the business department are entitled to gratuitous instruction in these branches in the classes of the other departments of the university.

f Monthly charge for time in attendance.

g In accounts; $75 in shorthand.

h The figures here given are for the Western Normal Commercial Institute, the commercial department of Western Normal College.

i All studies elective; tuition paid for studies chosen.

j For day school; $30 for evening school.

k For scholarship.

l Reported with classical department (see Table IX).

m Average charge.

n Average time.

o For three months.

p In book-keeping department; $40 in penmanship, $50 in telegraphy, and $60 in phonography.

q For scholarship; time unlimited.

r For life scholarship.

s Principal's library.

TABLE IV.—*Statistics of commercial and business colleges for* 1883–'84, *&c.*—Continued.

NOTE.—The branches taught are indicated by ×.

	Name.	Number of students.					Average age of students.	Branches taught.												Volumes in library.		Number of months in full course of study.	Number of weeks in scholastic year.	Number of months in evening school.	Annual charge to each student for tuition.
		In phonography.	In telegraphy.	In German.	In French.	In Spanish.		Common English and correspondence.	Penmanship.	Drawing.	Book-keeping.	Higher mathematics.	Surveying.	Banking.	Commercial law.	Political economy.	Life insurance.	Phonography.	Telegraphy.	Whole number.	Increase in the last school year.

* From Report of the Commissioner of Education for 1882-'83.

a The normal pupils of the Pacific Kindergarten Normal School.

ies to inquiries by the United States Bureau of Education.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
35 40	Perforating, embossing, paper folding, stick laying, block building, weaving, embroidering, singing, calesthenics, drawing, and study of natural history.	Blocks, sticks, rings, slates, drawing books, colored crayons, and all appliances necessary for a Kindergarten.	Happiest and most satisfactory results physically and mentally.
44	Drawing, sewing, pricking, weaving, paper folding and cutting, modelling, and chain making.	Gifts, sticks, tablets, rings, &c., piano, drum, tambourine, blackboards, lunch tables, &c.	Cultivates individuality, imparts dexterity and grace, teaches the child to be industrious, persevering, cleanly, and polite, to concentrate his mind on what is before him, and to express his thoughts with ease.
43	All of Fröbel's occupations...	All modern apparatus and appliances for Kindergarten.	The physical and mental development is wonderful, and a grand opportunity is afforded for moral and religious training.
46	Sewing, weaving, drawing, paper cutting and folding, gift lessons in blocks, tablets, sticks, and rings, cork work, modelling, games, singing, and object lessons.	Balls, blocks, tablets, sticks, cork, rings, slates, sewing cards, weaving papers, Kindergarten furniture, swings, piano, and two horses and a carriage.	Children who have attended the Kindergarten are more attentive, more orderly, better able to comprehend what is brought to their notice, more capable of interesting themselves, and better prepared for the public school in every way than those who have not attended.
47	Rudiments of primary work in connection with Kindergarten gifts. Special attention paid to drawing, sewing, weaving, paper folding, tablets, sticks, and music.	Kindergarten tables and chairs, blackboards, charts, sociological and physiological tablets, sticks, slate, drawing books, slates, and materials for sewing, weaving and modelling.	Most beneficial; the young mind is pleasantly occupied and improved and the body given free and careful exercise.
40	Singing, motion plays, sewing, weaving, stick and tablet laying, &c.	First, second, third, and fourth gifts, slates, lead pencils, piano, drum, desks, tables, &c.	The beneficial effect on the physical system is perfectly apparent, the marching and gymnastic exercises are enjoyed, and turn the child's thoughts into a healthy channel, and the mental development is very striking.
45	Singing, weaving, sewing, drawing, modelling, paper folding, perforating, stick and ring laying.	The gifts and material necessary for the occupations of the system.	The motion plays develop the body and the gifts and occupations the mind; the results are good and influences refining.
43	The usual occupations, sewing, drawing, weaving, stick laying, and pricking.	Usual apparatus and appliances.	The whole body is strengthened, and it is impossible to enumerate the good results which this training produces in mental development.
40	Fröbel's occupations.....	The Kindergarten gifts and materials.	Develops the mental faculties through artistic and mechanical labor, improves the manners of the children, and turns natural talent into right directions.
40	Fröbel's occupations and exercises with the gifts.	Pictures, plants, blackboard, piano, &c.	Very satisfactory.
44	Perforating, sewing, drawing, weaving, modellling, paper folding, paper cutting, and chain making.	Gifts, tables, and seats, piano, plants, and a large sunny room.	Children are further advanced mentally than those who have not received the same training.

b Two hours weekly.

*From Report of the Commissioner of Education for 1882–'83.

Inquiries by the United States Bureau of Education—Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	43	The usual occupations, sewing, drawing, weaving, stick laying, and pricking.	The usual apparatus and appliances.	
5	40	Pricking, sewing, drawing, weaving, paper cutting, paper folding, and modelling.	Piano, squared tables, squared blackboard, slates, gifts, and everything essential to a first class Kindergarten.	
5	42	Weaving, sewing, pricking, paper folding, paper cutting, drawing, stick laying, and slat work.	Gifts, tables, benches, pictures, slates, and squared blackboards.	Children are better fitted mentally and morally to begin the hard world of school, having been trained to habits of attention, thoughtfulness, and obedience, accompanied with pleasing and strengthening physical exercise.
5	44	Frŏbel's occupations, music, gymnastics, &c.; reading, natural history, spelling, and writing for the advanced class.	The usual Kindergarten materials, piano, plants, pictures, &c.	Very satisfactory.
5	42			
5	....	Exercises with 1st, 2d, 3d, and 7th gifts, drawing, stick laying, paper folding, weaving, and sewing, accompanied with songs and games.	Kindergarten furniture, gifts, and material for occupations.	Superior to any other system for harmonious training of body and mind.
5	51	Weaving, sewing, pricking, paper folding, stick laying, chain making, tablet laying, drawing, 1st, 2d, and 3d gifts, games, and stories.	Instructive pictures of the various products of the animal, vegetable, and mineral kingdoms, blackboards, &c.	Through the occupations, games, and exercises, the muscular system is evenly and carefully developed, and every mental faculty is furnished support and nourishment.
5	42	Sewing, weaving, drawing, modelling, stick laying, paper folding, paper cutting, paper twisting, paper pasting, perforating, tablet and ring laying, building with blocks, singing, and marching.	Frŏbel's gifts and materials for the occupations.	Makes the children vivacious, obedient, attentive, and observing; accustoms them to memorize and reason; and teaches self control, amiability, self reliance, honesty, promptness, and cleanliness.
5	40	Usual occupations, culture of flowers and vegetables, silk raising, &c.	Usual apparatus, a garden, a palm grove, a playground, cabinets, pictures, sand tables, and appliances for modelling.	Develops muscular strength, self reliance, and general health, teaches clearness and precision in the use of the hand, leading to skill in art and the mechanics, influences the intellectual, social, and ethical natures and gradually leads the youngest child into the kingdom of righteousness, order, and beauty.
5	43	All of Frŏbel's occupations ...	A room, 70 x 30 feet, beautifully decorated and furnished, Frŏbel's gifts, small collection of minerals, birds, fishes, &c., a piano and other musical instruments.	The children are remarkable for their punctuality and attendance, though coming from the poorest classes only, and the refining and elevating influences affect not only the children but the parents.
5	43	All of Frŏbel's occupations ...	Large airy room, completely equipped with furniture, and apparatus for a model Kindergarten.	The children are remarkable for their punctuality and attendance, though coming from the lowest classes only, and the refining and elevating influences affect not only the children but the parents.

a At San Francisco; first established at Los Angeles in 1878.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
....	....			
5	38	All the gift exercises, weaving, perforating, card board work, modelling, paper folding, mounting crayon work, games, and object lessons.	Tables, blackboards, Kindergarten gifts, material for the occupations, &c.	It aids materially in the mental and moral development of the child.
....	....	Fröbel's occupations and gift exercises.	.....	The child is educated and developed mentally, morally, and physically.
5	47	Fröbel's occupations and gifts, gymnastics, object lessons, singing, and declamation.	The twenty gifts and occupations, Indian clubs, wands, and pictures.	Excellent physical development, and superior preparation for public school.
5	40	Modelling, drawing, sewing, crayon work, mat weaving, and peas work.	Five tables, four dozen chairs, one checked blackboard, one dozen of 1st, 2d, 3d, and 4th gifts, cardboard, worsted, and needles.	
5	40	Modelling, peas work, sewing, drawing, perforating, object lessons, and games.	Kindergarten tables, chairs, Fröbel's gifts (including the ball, cube, and cylinder, and divisions and subdivisions of the same).	Develops the physical nature, exercises the powers of obeservation, and inculcates habits of industry.
5	52	Exercises with all the gifts, marching, singing, and gymnastics.	The usual gifts and a piano.	It awakens the faculties of the mind, and improves and develops them in a wonderful degree.
5	40	All the usual Kindergarten occupations.		
5	40	Modelling, folding, weaving, sewing, drawing, pricking, bead and straw stringing, exercises with the gifts, singing, playing, marching, and care of plants.	Tables, chairs, squared slates, blackboards, drawing books, worsted balls, blocks, sticks, tablets, rings, materials for modelling, weaving, folding, pricking, sewing, and stringing, a piano, plants, and natural history cards.	Imparts manual dexterity and grace in motion, trains the eye and ear, develops the powers of perception, attention, and imagination, and stimulates the memory.
5	40	Geometrical and fancy sewing, weaving, perforating, interlacing, drawing, and designing.	All requisite for the regular Fröbel system.	Makes the child easy and graceful and eager for knowledge.
5	40	Weaving, sewing, paper folding, modelling, and pasting.	Kindergarten tables and chairs, gifts and materials for the occupations.	
5	....	Perforating, sewing, weaving, paper folding, paper cutting, drawing, modelling, singing, marching, and games.	Balls, beads, sticks, tablets, blocks, and lentils.	Imparts deftness to the hands, and grace and ease to the whole body, teaches accuracy, invention, symmetry of form, harmony of color, and love of the beautiful; cultivates habits of neatness, kindness, forbearance, self-control, and politeness.
....	....			
....	....			
....	....			
....	....			
....	....			
5	38½	Fröbel's system is followed as closely as possible, and a half an hour given daily to reading.	Usual tables, chairs, blackboards, gifts, and apparatus, wall pictures, clay, books, and access to natural history specimens of the school, &c.	A true Kindergartner gives to her pupils a new meaning to existence; they are benefited physically, mentally, and morally.

a Average attendance.

Inquiries by the United States Bureau of Education—Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	40	Frŏbel's occupations and gifts, movement plays, marching, &c.	Kindergarten tables, chairs, sand tables, plants, piano, &c.	It gives increased physical and mental strength, especially power to observe accurately and skill to execute.
5	40	All of Frŏbel's twenty gifts and occupations.	Squared tables, slates, blackboard, drawing books, gift materials, microscope, mineral and natural history specimens, and gymnastic apparatus.	Harmonious development of body and mind. The child becomes strong, graceful, polite, self-dependent, skilful, thoughtful, and constructive, and the system is a superior preparation for later school work.
5	40	Frŏbel's occupations.....	.....	Imparts elasticity and harmony in movement, promotes health and cheerfulness, awakens the observing powers and a desire for knowledge, and teaches the child the use of surrounding objects and to handle, to combine, and to construct intelligently.
5	40	Perforating, sewing, weaving, paper folding, paper cutting, and intertwining, peas work, modelling, drawing, and exercises with the gifts.	1st, 2d, 3d, 4th, 5th, and 6th gifts, representing solids; 7th, 8th, and 9th gifts, representing surfaces; 10th, 11th, and 12th gifts, representing lines; 13th gift, representing the point; materials for the occupations, chairs, and tables.	Promotes health of body and mind, sometimes producing wonderful results.
5	40	Usual Kindergarten work, folding, pricking, modelling in clay, block building, drawing, needlework, weaving, games, and physical exercise.	Usual apparatus of a Frŏbel Kindergarten, together with the various gifts and all materials necessary for the occupations.	Makes not only wiser but better men and women by the equal, full, and harmonious development of the three-fold nature.
5	40	1st, 2d, 3d, 4th, 5th, 9th, 10th, weaving, sewing perforating, peas work, clay modelling, &c.	Usual Kindergarten appliances.	Imparts ease and erectness to the carriage, brightens and exhilarates the whole deportment, and quickens the powers of perception and understanding.
5	32	Frŏbel's occupations.....	As usual in a well equipped Kindergarten.	Good.
5	36	Frŏbel's gifts and occupations, songs and plays.		
5	20	Gifts and occupations, gardening, plays, trips to the woods and fields.	All needed appliances.	
5	40	Building with cubes, planes, sticks, and rings; drawing, sewing, weaving, paper folding, paper cutting, and modelling.	Cubes, sticks, planes, rings, chairs, drawing material, natural history, cabinet, piano, &c.	Makes the children graceful, polite, and cleanly; develops ideas of number and form, and teaches the use of the faculties in various ways.

* From Report of the Commissioner of Education for 1883–'83. a Average attendance

ories by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
48	Lessons with 1st, 2d, 3d, 4th, and 7th gifts, drawing, stick laying, sewing, peas work, ring laying, weaving, paper folding, clay modelling, games, and music.	Cabinet, tables, chairs, gift materials, slats, pencils, rings, weaving materials, needles, mats, sewing cards, &c.	
52	Fröbel's occupations.....	Those given by Fröbel.....	Healthy and harmonious growth.
40	Fröbel's occupations.....	Fröbel's appliances	Promotes natural growth of the muscles, awakens perception, cultivates taste in design, and makes children more thoughtful, sympathetic, and happy.
48	1st, 2d, 3d, 4th, part of 7th, 8th, 9th, 10th, 11th, 12th, 14th, 18th, 19th, and 20th gifts.	Kindergarten tables, chairs, blackboard, all the necessary gifts and material for the occupations, cheerful, pleasant, and comfortable rooms.	Very gratifying; many of the children admitted to the home are considerably enfeebled in body and mind, and nothing else could so help to awaken the mental faculties and give strength and skill to the useless fingers. With the brighter children the results are very satisfactory.
39	All Fröbel's occupations, gifts, and games.	Piano, globes, pictures, and all materials necessary for instruction in a Kindergarten.	Develops harmoniously the physical, mental, and moral powers of the child.
38	All of those given by Fröbel..	1st to 9th gifts, blackboards, cabinet, and piano.	Develops the physical and mental natures without forcing either, and the child learns to combine the alphabet of knowing with that of doing.
24	Paper folding, sewing, ring laying, &c.	Cubes, slats, tablets, &c	Promotes healthy physical and mental growth, and prepares the child for the more rigid discipline of the public school.
40	Weaving, perforating, embroidering, paper folding, peas work, drawing, &c.	Good set.....	All that is claimed for it by any intelligent advocate.
50	Weaving, embroidering, block building, drawing, perforating, paper folding, singing, playing, lessons in number and the alphabet, and for the more advanced pupils reading, writing, and arithmetic.	Squared tables, blackboards, blocks, balls, pegs, tablets, embroidery cards, and materials for weaving and folding.	Improves the child physically and mentally, teaches him to be unselfish, trains the eye and hand, strengthens the memory, and develops ideas of number.
36	Sewing, weaving, pricking, paper folding, drawing, object lessons, gift lessons, games, singing, reading, writing, spelling, numbers, &c.	Piano, tables, chairs, blocks, slates, sticks, slats, charts, kitchen garden appliances, balls, tablets, and materials for parquetry.	Strengthens the muscles, cultivates the observing powers, and develops the mental faculties generally.
40	Weaving, paper folding, embroidering, modelling, perforating, tablet, stick, and ring laying, block building, outline work with cork and wire, bead stringing, cord knotting and braiding, games, slate work, &c.	Materials for weaving, sewing, and modelling, tablets, sticks, rings, balls, 2d, 3d, and 4th gifts, wires and cork cubes, wax, beads, type, and slates for the blind.	Produces the happiest results; the natural and pleasing incentives to effort arouse and interest the dormant minds, make sensitive and skilful the feeble hands, and put body and mind into a healthier condition than former methods have done.

stries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
36	Lessons in form and color, object lessons in natural history, calisthenics, perforating, embroidering, embossing, weaving, chain making, stick and ring laying, modelling, interlacing, and designing.	Blackboard, tables, chairs, piano, cabinet, blocks, materials for modelling, sticks, rings, and slats.	Develops the muscles, enlarges the chest, and strengthens weak lungs, gives graceful and easy carriage to the body, cultivates the memory, awakens perception, teaches children to examine objects for themselves and to give expression to their ideas, and inculcates lessons of love to God and humanity.
40	Modelling, drawing, sewing, weaving, perforating, peas work, stick laying, paper cutting, paper folding, mathematical exercises with blocks, sticks, rings, &c.	Squared tables, chairs, piano, cymbals, triangles, bells, Kindergarten blocks, sticks, rings, and materials for the occupations.	Marked development of mind and body.
40	1st, 2d, 3d, 4th, 7th, 10th, and 11th gifts, sewing, drawing, weaving, paper folding, modelling, pasting, &c.	Tables, chairs, cabinet for material, squared board, and all of the gifts and occupation material.	Marked physical, mental, and moral development.
38	Those of a true Kindergarten, where only Fröbel's principles are admitted.	Those necessary for a true Kindergarten.	Superior preparation, both physically and mentally, for future school work, inducing orderly habits of thought, and also making the children kind and thoughtful for each other.
40	Exercises with balls, blocks, tablets, slats, sticks, rings and beads, pricking, sewing, drawing, weaving, interlacing, paper folding, paper cutting, peas work, modelling, songs, and games.	Tables, chairs, blackboard, piano, and all material necessary in the use of Fröbel's gifts.	Makes the children strong, graceful, and easy in their movements, teaches them to observe closely and to express their ideas clearly, and cultivates cheerfulness, gentleness, and unselfishness.
....	.....	.....	Wonderful physical, mental, and moral improvement in the child and an elevating and refining influence in their homes.
....			
36	Fröbel's Kindergarten occupations.	Imported German Kindergarten materials.	Excellent.
36	Building, exercises with tablets, slats, peas, sticks, rings, thread, perforating, modelling, embroidering, net work, drawing, painting, weaving, intertwining, paper folding, paper cutting, and cardboard work.	Kindergarten tables, blocks, materials for perforating, modelling, sewing, painting, and weaving.	
40	Building with blocks, modelling, forming figures with sticks, rings, tablets, slats, &c., weaving, paper cutting, paper folding, gardening, marching, singing, and a variety of games.	All the necessary appliances for the occupations and exercises.	Strengthens the body, promotes ease, grace, elasticity, and firmness of movement, stimulates the mind, cultivates gentleness, friendliness, and sociability, and is an excellent preparation for school work.
....			
50	Lessons with 1st, 2d, 3d gifts, tablets, sticks and rings, weaving, sewing, paper folding, drawing, modelling, bead stringing, and games.	Kindergarten chairs and tables, and the usual materials.	The physical, mental, and moral training is decided in its effects, each child being trained individually; it is not only noticeable in the Kindergarten, but in the home life.

* From Report of the Commissioner of Education for 1882-'83.

Inquiries by the United States Bureau of Education — Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	40	Moulding in clay, building, stick and tablet laying, paper folding, weaving, sewing, drawing, peas work, and pricking.	Clay, blocks, tablets, paper, sticks, mats, cards, drawing books, wire, &c.	Develops the body and cultivates the intellectual powers.
5	40	Sewing, weaving, pricking, stick laying, drawing, gift lessons, color lessons, object lessons, modeling, games, singing, and stories.	Two large rooms, furniture suitable to children, and best possible apparatus.	Promotes physical health, imparts quickness and acuteness in distinguishing objects, and develops the power of expression, and makes pupils happy in their relationship with one another.
5	----	Block lessons, drawing, sewing, weaving, pricking, stick and ring laying, color lessons, singing, &c.	Materials for occupations and gifts.	Excellent.
5	36	Building, weaving, sewing, painting, folding, drawing, laying figures, and counting with sticks, beans, peas, &c.	Slates, drawing books, painting books, balls, 2d, 3d, 4th, and 5th gifts, and materials for the occupations.	Symmetrical development; the physical nature is developed at the same time that the mind is unfolded in a natural, unforced way.
5	40	Block building, paper folding, form laying, weaving, drawing, sewing, modelling, number and color lessons, games, &c.	Fröbel's gifts, piano, blackboard, drawing material, tables, chairs, window gardens, library, and cabinet.	Marked awakening of the slow minded and corresponding improvement of general health.
5	40	Usual occupations	Usual appliances and apparatus.	Satisfactory.
----	----	Those occupations which tend to awaken and exercise the powers of observation, comparison, combination, invention, memory, reflection, and action.	All means and appliances necessary to the carrying out of this method of instruction.	Most beneficent; no training of primary classes of blind children can attain a high degree of efficiency without its assistance.
5	40	Usual Kindergarten occupations.	.....	Beneficial.
5	40	Fröbel's occupations.....	All regular Kindergarten gifts and materials.	Trains the child into habits of self control, makes him graceful in movement, observant and intelligent, and is beneficial in its effect on the moral nature.
5	40	Fröbel's occupations.....	Complete furniture and all material necessary for a true Kindergarten.	Strengthens physically, awakens interest in self and surroundings, and inculcates a love for truth and the best things in life.
5	36	Fröbel's occupations and gift exercises.	Usual Kindergarten apparatus.	Good.
5	39	Weaving, sewing, stick laying, drawing, building, and designing.	Blocks, colored paper, straws, worsted, needles, beads, planes, slates.	Trains each child individually, developing body and mind harmoniously.
5	40	Fröbel's occupations, gifts, and games, with reading, writing, and arithmetic for the older pupils.	All necessary appliances....	Satisfactory to parents and teachers.
5	40	Those of a Fröbel Kindergarten, marching, singing care of plants, instruction in music by the tonic sol fa method, and instruction in reading, writing, and numbers during part of the 4th year.	A commodious building, with grounds for gardening and play, the usual Kindergarten materials, tables, chairs, pictures, two pianos, and a comfortable vehicle for transportation of children during inclement months.	The training gives ease and grace of movement, manual dexterity, love of work, eagerness for knowledge, and respect for the rights of others.

a Includes pupils in advanced classes.

TABLE V.—*Statistics of Kindergärten for* 1883–'84; *from replies to*

	Name of Kindergarten.	Location.	When established.	Name of conductor.	Number of assistants.	Pupils. Number of.	Pupils. Between the ages of—	Number of hours taught daily.

123	Kindergarten of the German-American Seminary.	Detroit, Mich. (251 La Fayette street E.).	1869	Miss Minnie Budden	1	25	4–7	5
124	Kindergarten (St. Vincent's Orphan Asylum).	Detroit, Mich. (McDougall avenue).	1881	Teresa Flanagan	2	50	3–6	3
125	Germania Kindergarten.	East Saginaw, Mich. (601–605 Lapeer st.).	1876	Miss Laura Ebel	1	56	3½–7	4
126	Second Ward Kindergarten.*	Ionia, Mich. (box 417).	1880	Lida A. Brooks	0	60	5–8	5
127	Charity Kindergarten*	Minneapolis, Minn. (near cor. 16th ave. south and 7th st.).	1880	Mrs. E. R. Holbrook	1	35	3½–7	3

* From Report of the Commissioner of Education for 1882–'83.

Inquiries by the United States Bureau of Education—Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	40	Building, drawing, sewing, weaving, laying forms with planes, sticks, and rings, modelling, object lessons, games.	Squared tables, blocks, staffs, rings, table for teaching color, slates, blackboard, &c.	Marked mental and physical development; makes the children more self reliant, observing, and accurate.
5	38	Weaving, moulding, sewing, &c.	Kindergarten gifts and all necessary appliances.	Very beneficial.
5	36	Usual occupations	Those used in a German Kindergarten.	Invigorates the body and awakens the mental faculties, leading to independent thought and action. Knowledge imparted according to this system is received with keen zest, clear perception, and true appreciation.
5	40	Drawing, modelling, dictation exercises, singing, sewing, reading, paper folding and cutting, plays, &c.	Fröbel's gifts and materials for the occupations.	Strengthens the physical and mental natures.
5	----	Weaving, sewing, paper folding, painting, stringing beads, stringing papers and straws, and slate work.	Balls (worsted and wooden), cubes, cylinders, sticks, &c.	Makes the children more receptive and keen to observe and improves their manners and morals.
5	36	Pricking, drawing, sewing, weaving, paper folding, paper cutting, modelling, exercises with the Kindergarten gifts, object lessons, singing, and reciting.	The usual furniture, gifts, materials for the occupations, &c., of a good Kindergarten.	Develops and trains the powers of body and mind naturally and harmoniously.
5	45	Gift work, gymnastics, marching, dumb bells, occupation work, clay moulding, Bible lessons, &c.	Marked tables and slates, blackboard, card board, scissors, colored balls, cubes, straws, peas, beads, dumb bells, piano, &c.	Wonderful; the children of this Kindergarten are charity children, who, as a rule, are not healthy, and are very often evil in disposition, and the improvement in their physical and moral natures is marked, and, through the child, the parent and home feel the elevating influence.
5	----	Modelling, gymnastics, singing, forming geometrical figures with blocks and sticks, and other usual occupations.		
5	40	Usual Kindergarten occupations.	Usual appliances	Best system that can be had for the physical and mental development of children.
5	48	Fröbel's occupations, sand table work, &c.	Squared tables, chairs, benches, piano, pictures, flowers, sand tables, all the gifts and materials for occupations, lentils, buttons, leaves, &c.	Most beneficial; rightly conducted, it is far in advance of the old method of teaching beginners.
5	40	Calisthenics and Kindergarten occupations.		
5	44	Weaving, drawing, perforating, sewing, and other occupations, gymnastics, games, marches, &c.	Tables, benches, a large and well ventilated room, piano, and all material necessary to a Kindergarten.	Turns the natural inclinations of children into right channels, awakens the intellect, harmoniously developing the physical, mental, and moral natures.
5	40	Drawing, sewing, pricking, folding, weaving, &c.	Fröbel's gifts	Strengthens physically and develops the memory.
5	40	All those usual in a Fröbel Kindergarten.	The gifts, consisting of blocks, sticks, rings, &c., materials for the occupations, weaving, drawing, pricking, &c., and all appliances necessary to carry out Fröbel's system.	Insures a healthy physical development, trains the artistic imagination, the scientific mind, and the skilful hand, engenders love for order, neatness, freedom, and justice, without taking the child from its innocent childish sphere.

.....	.....			
.....	.....	Games and calisthenics and gift exercises.	.....	Development of the child in a three-fold direction: the physical, mental, and spiritual.
5	40	Weaving, sewing, pricking, folding, drawing, cutting, and pasting.	1st to 5th and 7th gifts, sticks, peas work, clay, &c.	Strengthens the weak physical organs, insures free use of all parts of the body, and produces marked improvement in the action of the mind.
5	36	Lessons with blocks, sticks, rings, and slates, sewing, weaving, color mixing, and modelling.	Blocks, sticks, slates, rings, balls, bags, bibs, aprons, dishes, tables, &c.	Healthful; the children learn to observe and to be accurate, to be quick of comprehension and keen in discerning.
5	40	All used in Kindergärten taught according to Frōbel's method.	All used in a true Kindergarten.	Very beneficial.
5	40	Weaving, sewing, mounting, pricking, paper folding, paper cutting, modelling, interlacing, drawing, peas work, and lessons with the gifts.	1st, 2d, 3d, 4th, 5th, and 6th gifts, building blocks, sticks, rings, tablets, and slats.	Strengthens the body, develops the mental faculties, and makes the children happy, independent, unselfish, kind, sympathetic, and grateful.
5	38	Drawing, sewing, perforating, weaving, paper interlacing, peas work, paper folding, paper cutting, modelling, and all of Frōbel's occupations.	All of Frōbel's gifts, piano, squared tables, and every appliance needed in a genuine Kindergarten.	Excellent.
5	40	Weaving, perforating, sewing, drawing, paper folding and cutting, modelling, exercises with staffs, rings, cubes, balls, and cylinders.	Apparatus and appliances to the value of $100.	Very healthful; excellent preparation for primary school.
5	40	Frōbel's occupations and exercises with the gifts.	All necessary for the Frōbel Kindergarten.	Gives perfect control of the body, makes the child graceful and self possessed, cultivates the senses, awakens curiosity, arouses a desire for knowledge, and stimulates to free creative activity.
5	40	Frōbel's occupations and exercises with the gifts.	All necessary for the Frōbel Kindergarten.	Gives perfect control of the body, makes the child graceful and self possessed, cultivates the senses, awakens the child's curiosity, arouses a desire for knowledge, and stimulates to free creative activity.
5	40	Sewing, cutting, weaving, folding, drawing, peas work, modelling, stick laying, building, exercises on 1st, 2d, 3d, 4th, 5th, 6th, and 7th gifts.	Those introduced by Frōbel in his system of kindergartening.	Harmonious development of the physical and mental natures.
5	40	Those given by Frōbel.....	Those introduced by Frōbel in his system of kindergartening.	Harmonious development of the physical and mental natures.

* From Report of the Commissioner of Education for 1882-'83. a In the school and Kindergarten.

uiries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
50	Object lessons, plays, block building, laying figures with tablets, staffs, and rings, drawing, perforating, embroidering, braiding, interlacing, intertwining, peas work, paper folding, and modelling.	All Fröbel's Kindergarten gifts.	Awakens and trains the mind, enabling the little ones to see and appreciate with new delight objects by which they are surrounded.
40	Printing, drawing, weaving, perforating, embroidering, paper cutting, paper folding, ring and stick laying, designing, embossing, modelling, writing, reading, arithmetic, geography, calisthenics, pasting, &c.	Drawing cards, blocks, weaving materials, needles, paper, rings, sticks, clay, dumb bells, books, collections of leaves, shells, and stones, Kindergarten tables and chairs, globes, maps, charts, &c.	
40	Ball games, singing, drawing, weaving, and all the occupations of the Fröbel Kindergarten.	Balls, blocks, slates, pencils, sticks, slats, mats, needles, cards and worsted, clay, peas, sticks, numeral frame, blackboard, low table, and piano.	Develops healthy, natural children, quickens the intellect, trains the eye and hand harmoniously, cultivates the humane, thoughtful nature of the child, and lays the foundation for all after training.
40	The usual Kindergarten occupations for the first year for children under six years of age. Between six and eight years, instruction from books is combined with Kindergarten occupations.	Tables, pictures, blocks, straws, and other material used in Kindergärten, piano, books, and blackboard.	Excellent; the children keep their health and buoyancy and gradually acquire a love for books.
38	Fröbel's occupations and exercises with the gifts.	All necessary appliances....	Beneficial; strengthens the body and mind.
40	Fröbel's Kindergarten occupations, learning alphabet in English and German, singing, drawing, games, &c.	Fröbel's apparatus and charts for German and English reading.	Quickens the child's intellect and develops his moral nature; makes him happy, polite, and healthy, and is beneficial as a preparation for more advanced studies.
....			
36	All the usual occupations.....	All necessary appliances....	Most satisfactory.
40	Weaving, modelling, drawing, pricking, embroidering, singing, marching, calisthenics, object lessons, reading, writing, block lessons, &c.	Tables, chairs, charts of animals, birds, and fishes, blocks, marbles, &c.	
40	Fröbel's Kindergarten gifts and occupations, object lessons, games, plays, singing, and marching.	Tables, chairs, blackboards, pictures, balls, battledoor and shuttlecock, bean bags, bows, arrows, and pipes for soap bubbles.	Trains all the perceptive faculties, forms correct judgment, teaches children to live and work harmoniously together, and lays a foundation for moral growth.
36	Usual occupations	Usual apparatus.....	Good.
46	All of Fröbel's occupations...	Usual apparatus and appliances.	Excellent in every respect.
40	Use of Fröbel's gifts and occupations, and study of natural objects, songs, games, &c.	All regular Kindergarten materials.	Increase of physical and mental strength.
37	Newspaper lesson, weaving, perforating, embroidering, designing, pasting, drawing, dictation card lessons, and paper folding.	Reading chart and cards, blackboards, boxes of form, rings, sticks, natural history, cards, scrapbooks and books for designing, &c.	Instils habits of order, precision, and quickness of observation, develops original thought and action, and educates in all hand work.
....			

These figures are for the *year ending June, 1883*; the Kindergarten seems to have been since then *discontinued, there being no notice of it in the catalogue for 1883-'84.*

*From Report of the Commissioner of Education for 1882–'83.

a Also ten volunteers.

Inquiries by the United States Bureau of Education—Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	43	Fröbel's occupations.....	All usually found in a true Kindergarten.	Very satisfactory.
5	39	Customary gifts and occupations of the Kindergarten.	Customary apparatus and appliances.	Children promoted from the Kindergarten are bright, quick, and active mentally, and well and strong physically.
.....	.....			
5	36	Those given in a true Fröbel Kindergarten.	Gifts, materials for the occupations, ruled blackboards, and other apparatus necessary for carrying on the work.	Develops the physical and intellectual powers of the child naturally.
5	42	All the usual Fröbel occupations.	Tables, chairs, pictures, stuffed birds, piano, blackboards, and Prangs's chromos.	Gives control of the body, makes the child self dependent, awakens the observing powers, and imparts dexterity to the hand; also power to analyze and synthetize, and to give expression to thought.
5	40	Singing, object lessons, games, gymnastics, drawing, weaving, sewing, pricking, paper folding, building, laying, forms of life, knowledge, and beauty, with rings, sticks, and tablets.	Building blocks, squared slates, tablets, sticks, rings, and materials for sewing, pricking, paper folding, and weaving.	Promotes general health, and awakens the mental faculties naturally, bringing knowledge in a connected form before the mind.
5	40	Weaving, sewing, pricking, paper folding and cutting, paper and slat interlacing, drawing, modelling, singing, and games.	Fröbel's 1st, 2d, 3d, 4th, 5th, 6th, and 7th gifts; connected slats, slates, blackboard, sticks, peas, clay, &c.	Good, both physically and mentally.
5	38	Weaving, drawing, calisthenics, games, writing, embroidering, &c.	Usual apparatus and appliances, with colored plates of animals, &c.	Very beneficial; accustoms to habits of neatness, order, punctuality, and attention.
5	41	Fröbel's Kindergarten occupations.	Squared tables, benches, chairs, and the gifts and occupation material of the Kindergarten.	Develops the different parts of the body, and awakens all the faculties of the mind.
5	40	Fröbel's occupations.....	Squared tables and chairs...	Promotes physical health, quickens the faculties, cultivates habits of neatness, cleanliness, industry, and kindness; and these refining influences extend even to the parents.
5	40	Those of English infant schools, Fröbel's and Pestalozzi's.	.....	Very satisfactory.
5	42	Exercises with all the gifts...	Complete apparatus	Most excellent in every respect.
5	40	Fröbel's occupations.....	Charts, blackboards, cases for pupils' work, plants, birds, material for occupations, gifts, &c.	Makes the children healthy, cheerful, and happy, and under a thorough Kindergartener develops the mental faculties in a systematic manner.
5	40	Weaving, modelling, sewing, exercises with blocks, drawing, counting, writing, reading, spelling, and agriculture.	Blocks, sticks, clay, squared tables, blackboards; also ploughs and other appliances for teaching agriculture.	Quickens and develops the mental powers, fitting the child for ordinary school studies; also, teaches use of and how to handle different farming implements.

[b] Date of opening of the Eighteenth Street Kindergarten; others opened at various times since.
[c] These figures are for two Kindergärten *only*.

*From Report of the Commissioner of Education for 1882–'83.

uiries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
52	Paper folding, weaving, interlacing slats, peas work, drawing, perforating, embroidering, modelling, singing, playing, dancing, and gymnastics.	1st, 2d, 3d, 4th, and 5th gifts..	Renders the child graceful, polite, and intelligent, developing the physical and mental powers systematically.
48	Building, weaving, stick laying, paper folding, peas work, pricking, sewing, modelling, exercises with tablets, dumb bells, and slates, object lessons, singing, marching, &c.		
40	Occupations and gifts of the Fröbel system.	All necessary material for the gifts, occupations, and games.	The work of the Kindergarten tends to develop and strengthen all the muscles of the body, especially those of the hand. Flexibility, firmness, and gentleness of touch and dexterity of movement are acquired by it. The eye also is trained to judge of distance, form, size, color, &c. All the mental faculties are awakened and developed in their psychological order, particularly perception, imagination, a logical order of thought, and the power of expression or language. Thus the foundations for school work are laid, the child being prepared to do work intelligently and thoroughly and to advance rapidly.
42	Fröbel's occupations, games, plays, songs, stories, &c.	Fröbel's gifts, appliances for calisthenics, &c.	Harmonious development; it teaches combination of knowing with doing.
38	Fröbel's occupations, gymnastics, games, songs, stories, garden work, care of animals, &c.	Fröbel's gifts, seeds, plants, animals, apparatus for teaching the metric system in the advanced classes, occupation material, gymnastic apparatus, museum, cabinet, &c.	Harmonious development of all the powers; it teaches combination of knowing with doing, and exerts a wholesome influence in the formation of character, cultivating a love of nature, a love for work, a generous regard for others, and humane treatment of animals.
40	All occupations of Fröbel's system.	Fröbel's gifts, Kindergarten tables, blackboards, slates, charts, pictures, plants, &c.	Tends to make children active, healthy, happy, courteous, and unselfish, teaches accuracy and keenness in observation, independence in thought, and clearness in expression.
36	Drawing, perforating, embroidering, paper cutting, interlacing, intertwining, paper folding, peas work, and modelling.	1st, 2d, 3d, 4th, 5th, 6th, 7th, 8th, and 9th gifts.	Cultivates the intellect, the emotions, and the physical activities of the child, producing a development not attainable by any other method.
38	Weaving, modelling, drawing, designing, sewing, stick laying, study of natural objects of form and of color, singing, gymnastics, reading, spelling, and writing.	Charts for teaching color, form, natural history, botany, and reading, squared tables, boxes of geometrical forms, balls, books, and pictures.	Strengthens the body, enlarges the reasoning faculties and powers of observation, and so fits the child physically and mentally for later studies.

a Five or six of the pupil teachers are present each week from the Normal College.

*From Report of the Commissioner of Education for 1882–'83. a Average number.

uiries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
40	Modelling, sewing, weaving, perforating, paper folding, and paper cutting.	Fröbel's gifts and the apparatus pertaining to the work.	The children are led to observe, to express themselves clearly, and to be graceful in movement. They learn to read and write more readily than those who have not had the training.
40	All of Fröbel's occupations...	Fröbel's gifts, piano, Kindergarten tables and chairs, and a room fitted in the most thorough and complete manner.	When combined with primary work, Kindergarten training makes the child neat and particular in habits, generally intelligent and observing. When combined with study under a teacher not bound by the system, it is invaluable.
40	Perforating, sewing, drawing, weaving, paper folding, paper cutting, card board work, and modelling.	Squared tables, blackboards and slates, balls, blocks, sticks, rings, tablets, an organ, mottoes, bust and picture of Fröbel.	
40	Weaving, stick and ring laying, sewing, drawing, designing, and lessons in written language, articulation, habits of animals and plants, &c.	Charts and pictures for teaching natural history and botany, microscope, globe, small museum representing the animal, vegetable, and mineral kingdoms, and living natural objects.	Children are better developed physically and mentally than before the Kindergarten was established.
40	All the occupations of Fröbel's system.	Complete apparatus, with all modern improvements.	Supplies those elements which contribute to natural healthy growth.
48	Those used by Fröbel (paper folding, drawing, sewing, care of plants, &c.).	Kindergarten furniture and Fröbel's gifts and materials.	Excellent in every respect, especially as regards physical development.
44	Usual occupations.....	Usual apparatus.	
46	Fröbel's occupations, gymnastics, games, songs, stories, &c.	Fröbel's gifts, plants, animals, &c.	
34	.....	Those used in a regular Kindergarten.	Remarkably good.
38	Pricking, drawing, sewing, weaving, paper folding, paper cutting, peas work, modelling, stick laying, mathematical exercises with surface and solid forms.	Gifts, materials for occupations, squared tables, blackboard, &c.	Trains the eye and hand, cultivates the affections, and in many ways develops the physical and mental powers.
5	The aim is to carry out Fröbel's idea of a perfect Kindergarten; the gifts, modelling, pricking, weaving, folding, stick laying, drawing, &c., all the Kindergarten games, singing, playing, dancing, &c., and a lunch, with the instruction it demands.	Blocks, needles, sticks, paper, colored balls, worsted, drawing material, clay, books for preserving children's work, drums, bells, whistles, rods, and toys.	The physical nature is strengthened by intelligent exercise, and the harmonious influences which surround it; the mental development is marked, the child learns to think and act independently, and his faculties are developed in the order of nature, while too much stress cannot be laid upon the effect of the system in its influence upon the moral nature of children in the free Kindergärten. The Kindergarten really corrects evil home influences and starts the little waifs in paths of virtue, industry, and happiness.

b All are schools of the Cincinnati Kindergarten Association.

series by the United States Bureau of Education—Continued.

days in the week	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	38	All Fröbel's gifts and occupations.	Piano, squared tables, and all the necessary appliances for carrying out Fröbel's ideas.	Strengthens the powers of observation and tends to produce harmonious development of the physical and mental natures.
5	36	Weaving, paper folding, sewing, modelling, drawing, lessons with blocks, singing, marching, and games	All necessary for a well organised Kindergarten.	
5	40	All of Fröbel's gifts and occupations.	Fröbel's apparatus.	
5	38	Lessons with Kindergarten gifts, weaving, drawing, paper folding and cutting, sewing, perforating, modelling, singing, games, and conversational lessons.	Kindergarten gifts and occupation material, Prang's series of natural history charts, piano, and the usual Kindergarten furniture.	Imparts a fondness for mathematics, makes the child more observing, more logical in thought, self helpful, and respectful of the rights of others.
5	40	Usual occupations	.....	Very good.
5	40	Fröbel's gifts, games, plays, songs, luncheon, &c.	Tables, chairs, piano, and general Kindergarten material.	It makes healthy, thoughtful children.
5	38	Lessons with Fröbel's third and fourth gifts, weaving, sewing, stick and ring laying, modelling, paper folding, singing, object lessons, &c.	Chairs, squared tables, blocks, rings, balls, a cabinet, pictures, flowers, &c.	An approach to symmetrical development, physically, mentally, and morally.
.....	.....			
5	42	Fröbel's occupations, gift lessons, singing, games, gymnastic exercises, and reading and numbers to the advanced class.	Those given by Fröbel	Develops the physical, mental, and moral powers, and lays a firm foundation for future education.
5	40	Weaving, sewing, modelling, paper folding.	Blocks, clay, modelling knives, weaving needles, &c.	Excellent for blind children; cultivates ease of motion and good manners, quickens the powers of attention and apprehension, and educates the hand.
.....	.....			
5	24	Kindergarten games, weaving, pricking, sewing, paper folding, drawing, and modelling.	Low chairs and tables, material for occupations, dishes for lunch, and all appliances necessary for a true Kindergarten.	Harmonious physical development, culture of mental and moral perception, and excellent foundation for later training.
5	40	Sewing, perforating, weaving, paper folding, pasting, stick laying, interlacing, intertwining, drawing, modelling, &c.	Tables, gifts, &c.....	Physical and mental activity are acquired; the child is easily controlled and nervousness and dulness overcome.
5	40	Drawing, weaving, perforating, embossing, modelling, designing, gymnastic exercises, singing, recitations, and study of the kingdoms of nature.	All necessary appliances for the occupations.	Very good.
5	32	First, second, third, and fourth gifts, pricking, sewing, drawing, weaving, cutting, folding, and modelling.	Chairs, tables, and all articles needed for the work.	Develops physical powers and quickens mental faculties.
5	39	Usual Kindergarten occupations and primary school work.	A few of the more common appliances of the Kindergarten.

uiries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
....	Chain making, drawing, sewing, stick laying, pricking, paper folding, paper cutting, parquetry, modelling, weaving, leaf making, and paper lacing.	A bright, cheerful room, a piano, seats and squared tables, 1st, 2d, 3d, 4th, and 5th gifts, rings, tablets, numeral frame, and materials for all the occupations.	Changes listlessness and indifference into attention, brightness, and a great desire for knowledge.
36	Fröbel's gifts and occupations.	Fröbel's Kindergarten material, piano, &c.	Very satisfactory, giving the children an excellent foundation for future knowledge.
48	Those common to the system.	Those common to the system with such additions as will aid in the development of feeble-minded children.	Gradual development of the nervous system.
42	Modelling, weaving, sewing, perforating, staff laying, and exercises with all the gifts of the Kindergarten.	Fröbel's twenty Kindergarten gifts.	Promotes health and strength, and cultivates the inventive faculties and powers of observation and reflection.
40	Playing a variety of games, work with all of Fröbel's gifts, and such exercises as naturally suggest themselves to a true Kindergartner.	All of Fröbel's gifts, seeds, stones, strings, cabinets of curiosities, plants, musical instruments, pictures, tables, chairs, &c.	Thoroughly natural and helpful, imparting grace, agility, and skill in all physical movements, steadiness of nerve, delicacy of touch, accuracy in the use of the senses, clearness of perception, and especially cultivating the inventive powers, the use of language, and a love for the beautiful.
40	Weaving, modelling, ring and stick laying, pricking, embroidering, reading, writing, object lessons, paper folding, making books without words, games, calisthenics, singing, &c.	Miss Coe's American Kindergarten gifts and occupations, piano, wands, dumb bells, cabinet of specimens, stuffed birds, Prang's natural history series, cards for object lessons, maps, globes, charts, &c.	It harmoniously develops mind and body, creates a love of study, quickens perception, &c., and makes the child a lover of nature.
49	Singing, physical exercises, object lessons on color, counting, adding, &c., modelling, sewing, drawing, weaving, perforating, exercises with geometrical forms, &c.	Tables, chairs, Fröbel's 1st, 2d, and 3d gifts, slates, colored crayons, materials for modelling, paper folding, weaving, sewing, &c.	Improves the morals, inculcates habits of cleanliness, order, gentleness, politeness, and helpfulness; imparts skill to the hands, and awakens interest in surrounding objects.
40	Fröbel's occupations and gifts.	Kindergarten tables, benches, gifts, and materials for occupations.	The friendless little ones are made happy by the Kindergarten, and this happiness insures physical and mental benefits.
36	Drawing, sewing, weaving, pricking, paper folding, paper cutting, stick laying, slat interlacing, modelling, ring laying, exercises with geometrical forms (cubes, oblongs, &c.), and other Kindergarten occupations.	Fröbel's gifts, and all other needed appliances.	Good.
40	Building with blocks, drawing, sewing, pricking, stick and ring laying, gymnastics, vocal culture, games (illustrating trades, habits of animals, &c.).	Balls (worsted and rubber), 2d, 3d, and 4th gifts, rings, materials for pricking, sewing, and drawing, blackboard, &c.	Develops the child's threefold nature, brightens the dull and strengthens the weak.
42	Weaving, sewing, modelling, and drawing.	Colored balls, wooden sphere, cube, and cylinder.	Develops physically, training the hand and eye, develops clearness of perception, and cultivates attention, thought, and understanding.

days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	44	The usual Fröbel occupations.	Those ordinarily used.	
5	40	Occupations of Fröbel's system.	Those necessary for the perfect development of the child according to Kindergarten principles.	Promotes health, grace, and ease of body, develops quickness of perception, clearness and accuracy in thought, and cultivates truthfulness, gentleness, and love.
5	42	The regular occupations of the Fröbel system, and music by the tonic sol fa method.	All the appliances and apparatus of a first class Kindergarten, including a fine piano.	Very satisfactory.
5	40	Fröbel's occupations.....	Frobel's gifts and materials, plants, &c.	Produces sound minds in healthy bodies.
...	...	.....	.....	Marked improvement both in the work and in the behavior of the children.
5	40	Object lessons, gift occupations, &c.	Blackboard, color charts, gymnastic apparatus, &c.	Tends to develop all those good qualities which later on make the good man or woman.
...	...			
5	46	All of Fröbel's gifts, modelling, weaving, drawing, block building, stick and ring laying, &c.	Blocks, sticks, rings, slates, clay, &c.	Tends to quicken the children's perceptions, to give skill to hand and health to body and happiness generally.
5	44	The various occupations of the system.		
6	52	All of Fröbel's elementary gifts and occupations.	Those necessary for the best comfort and development of the child.	Develops naturally the physical and mental powers, without unduly stimulating them.
5	35	Sewing, weaving, drawing, modelling, crayon work, and all the employments of a true Kindergarten.	All the gifts, blackboards, Kindergarten slates, globes, natural objects, and everything from which children can obtain knowledge of form and color and all that interests, and which in so doing develops reasoning powers, cultivates habits of observation, &c.	Very beneficial, producing a sound mind and a sound body; many have been sent to this Kindergarten for physical improvement only, and in securing it have been mentally and morally improved.
6	51	Perforating, bead stringing, drawing, sewing, weaving, paper folding and modelling.		
5	32	Weaving, sewing, paper folding, paper mounting, clay modelling, perforating, peas work, drawing, &c.	Tables, chairs, 13 gifts, &c.	Mind and body are simultaneously developed by natural methods, and the child becomes in every way prepared for the harder tasks of school and life in general.
5	....	Pricking, sewing, drawing, weaving, paper folding, paper cutting, peas work, and modelling.	Materials for pricking, sewing, weaving, and modelling, balls, cubes, rings, sticks, peas, seeds, slates, and slats.	
5	36	Occupations designed by Fröbel, games, rhythmic exercises, accompanied by music, singing by color notation.	Kindergarten appliances, piano, cabinet, plants, and an aquarium, microscope, blackboards, pictures, and all of Fröbel's gifts.	Strengthens the physical nature, tends to make the child self dependent, and increases his capacity for happiness.
5	36	All of Fröbel's occupations, physical exercises, marching, games, and singing, taught by the tonic sol fa method.	All in general use, including color charts, music cases, &c.	Excellent.

uiries by the United States Bureau of Education—Continued.

Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
10	11	12	13
40	Those used in the Fröbel system.	Fröbel's gifts, blackboard, tables, chairs, musical blackboard, modulator, globe, geometrical solids, &c.	Harmonious development of the physical, mental, and moral faculties.
40	Sewing, weaving, peas work, 3d, 4th, 5th, and 6th gifts, paper folding, modelling, drawing, singing, games, gardening, lessons in botany, zoölogy, &c., and for advanced class wood carving, lace making, gymnastics, and lessons in reading, writing, geography, arithmetic, French, and German.	Fröbel's apparatus and appliances, maps, globes, charts, blackboards, pictures, aquarium, books, gardens, and collections of plants, minerals, stones, shells, animals, &c.	Superior development of the physical, mental, and moral natures.
40	Weaving, sewing, modelling, drawing, gardening, games, and exercises in and out of doors.	The usual gifts and material of a Kindergarten, plants, animals, &c.	Rapid, easy, natural, and harmonious development of the physical, mental, and spiritual nature of the child.
40	Weaving, pasting, geometrical forms in colored papers, designing, painting, embroidering, peas work, modelling, perforating, paper cutting, exercises with blocks, &c.	Cabinet of curiosities from the three kingdoms of nature, geometrical charts, and color charts.	Rapid development of the senses and healthy activity of body and mind.
30	Sewing, weaving, folding, cutting, pasting, intertwining, modelling, peas work, gift lessons in the 1st, 2d, 3d, and 4th gifts, &c.	Material for nine occupations, all the gift material, piano, and all necessary furniture.	Every muscle is brought into free play, the faculties of the child are aroused, and he is well prepared for the next grade of work.
40	Sewing, weaving, folding, cutting and pasting, modelling, drawing, &c.	First ten gifts of Fröbel, Mrs. Hallmann's lentils, and Dr. Bachelor's music charts.	Makes the child vigorous, graceful, buoyant, observant, self-reliant, creative, reverent, kindly, respectful of labor, and thoughtfully tender of the lower life about him.
----	The connected gifts and occupations necessary for complete Kindergarten work in solid, surface, line, &c.	----------	Children physically weak in any way are made stronger, slow perception quicker and clearer, sense of beauty is developed, symmetry of form more and more readily recognized, mechanical execution greatly improved; also in many cases moral action, &c.
42	Sewing, weaving, drawing, building stick, ring, and tablet laying, book mark work, &c.	----------	Aids materially in physical and mental development.
48	Weaving, drawing, paper folding, perforating, sewing, paper interlacing, peas work, modelling, building with blocks, marching, singing, play and object lessons.		
36	Usual occupations, games, trades, songs, &c.	Blocks, drawing books, blackboards, Prang's trades, &c.	True and natural development; children who take a 2-year course in Kindergarten are able to make rapid progress in primary work, especially in numbers, writing, and drawing.

a Members of training class.

a Includes 7 Kindergärten for the school year 1883–'84. The statistics given are, however, from the Report of the Commissioner of Education for 1882–'83 and are for 5 Kindergärten only.

quiries by the United States Bureau of Education—Continued.

days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	35	The usual occupations with the different gifts, calisthenics, declaiming, singing, and drawing.	Colored balls, geometrical solids, tablets, sticks, slates, materials for perforating and embroidering, split wood, straw, clay, primers, blackboards, &c.	Imparts health and grace to the body, cultivates the reasoning and observing faculties, develops a sense of beauty in form, color, and sound, and trains the child to habits of order, punctuality, obedience, kindness, and self control.
5	42	Fröbel's occupations and Hailmann's group work.	Usual appliances	Very beneficial to both body and mind.
5	38	Fröbel's occupations and gifts.	Chairs, tables, blackboard, charts, pictures, piano, and museum.	Marked.
5	40	All the occupations and gifts devised by Fröbel.	Gifts, blackboards, chairs, tables, &c.	Tends to promote strength, flexibility, and precision, produces ease and politeness of manner, awakens discrimination in size, distance, direction, position, number, &c., and cultivates habits of order, neatness, obedience, attention, and of interest in and love for work.
6	50	Fröbel's occupations	Fröbel's gifts, &c	
5	44	Building exercises, pricking, singing, sewing, knitting, drawing, games, object lessons, conversational and memorising exercises, and all Fröbel's occupations, often given in the open air.	Fröbel's gifts, objects for teaching color, form, number, &c.; appliances for calisthenics, musical instruments (drums, flutes, &c.) for drill.	Awakens and develops physically, mentally, morally, and spiritually.
5	49	Weaving, sewing, interlacing, drawing, writing, stick and ring laying, paper folding, modelling, peas work, block building, paper cutting, singing, calisthenics, and games.	Complete set of Fröbel's gifts, material for the occupations, and a piano.	Develops the physique, awakens the perceptive faculties, and benefits both body and mind.
...	...			
...	...			
5	37	Perforating, sewing, drawing, weaving, paper folding, paper cutting, peas work, and modelling.	All appliances needed	Develops manual and artistic skill, freedom and grace of movement, clear perception, habits of attention, self-dependence, and an eagerness for knowledge.
5	50	Weaving, sewing, pricking, intertwining, object lessons, and primary studies.	All necessary for use in a well conducted Kindergarten.	Physical and mental development is above the average.
5	40	Block building, stick, ring, and tablet laying, peas work, weaving, sewing, perforating, paper folding, modelling, &c.	Ruled slates, blackboard, the different gifts, and material for working.	It teaches children to be independent thinkers and workers and to be systematic and observant.
5	40	Usual occupations, except pricking.	Fourteen of Fröbel's occupations and gifts.	Tends to awaken perception, cultivates self control, improves habits relating to proper care of body and mind.
...	...	Fröbel's	Fröbel's	

[b] Date of the organization of the system in Milwaukee; Milwaukee Normal School Kindergarten, now the Central Kindergarten, was established in 1880.

TABLE V.—*Statistics of Kindergärten for* 1883–'84; *from replies to*

inquiries by the United States Bureau of Education—Continued.

Number of school days in the week.	Number of weeks in the year.	Occupations of pupils.	Apparatus and appliances.	Effect of the system.
9	10	11	12	13
5	40	Exercises with Fröbel's gifts from the 1st to the 8th, inclusive, and the 15th, drawing, sewing, weaving, intertwining and folding paper, peas and clay work.	Everything needful for thorough work in the teaching of the Kindergarten system.	The child is taught to think and act for himself and to learn by doing, and the physique is developed by the continual change of position and work.
5	40	Block lessons, tablet, stick, and ring laying, weaving, peas work, modelling in clay and sand, and common branches in connecting class.	All Kindergarten gifts and tables, chairs, trays for moulding, &c.	Just what is claimed for this system of training; the children trained by the system are more attentive, observant, obedient, and gentle than those otherwise trained, and it produces a genial awakening of all the faculties.
5	35			
.....	.....			
.....	.....			
.....	.....			
5	22	Block building, sewing, embroidering, weaving, stick-laying, lessons in numbers, &c.	Organ, tables, chairs, blackboard, rugs, and usual material for the occupations.	The hand is educated, the child is taught to think and reason for himself, to observe familiar objects around him, and to cultivate an interest in and a love for them.
5	40	Block building, sewing, weaving, drawing, tablet, stick and ring laying, clay modelling, paper folding, and peas work.	All necessary to teach the occupations.	Very good.
5	40	Object lessons and Kindergarten drawing, together with all of Fröbel's occupations, except pricking and pasting.	Squared tables, slates, blackboards, all the gifts, including balls, sticks, blocks, tablets, staffs, rings, and Mrs. Hailman's 2d gift, materials for the occupations, garden tools, and Prang's natural history cards.	Improves the general health, teaches the child self government, and leads him to choose to do what is right; it is also a superior preparation for subsequent mathematical training.
5	40	Usual occupations, except pricking.	Fourteen of Fröbel's occupations and gifts.	Improves the general health, teaches the child self government, and leads him to choose to do what is right; it is also a superior preparation for subsequent mathematical training.
5	40	Object lessons and Kindergarten drawing, together with all of Fröbel's occupations, except pricking and pasting.	Squared tables, slates, blackboards, all the gifts, including balls, sticks, blocks, tablets, staffs, rings, and Mrs. Hailmann's 2d gift, materials for the occupations, garden tools and Prang's natural history cards.	Improves the general health, teaches the child self government, and leads him to choose to do what is right; it is also a superior preparation for subsequent mathematical training.
5	40	Weaving, sewing, paper folding, drawing, block building, stick laying, reading, elocution, spelling, oral and written.	Squared tables, Kindergarten chairs, pictures, map, blackboard, gift and occupation material.	Produces grace of movement, cultivates the social element, and concentrates the faculties.

* From Report of the Commissioner of Education for 1882-'83.
a Total for all departments.
b Under classical are included students in scientific course.
e In preparatory department.
d For students in scientific department, see Table X, Part 1.
e Includes students in other collegiate courses.
f Roll for 1881-'82.
g Students in the Yale School of Fine Arts.
h Not reported of this number whether they are in classical or scientific course.
i Partially endowed.
j See Table X, Part I.
k These are in philosophical course.

* From Report of the Commissioner of Education for 1882–'83.
a Total for all departments.
b Total of pupils as classified above; the return gives, however, a total of 200 undergraduate students.
c Under classical are included students in scientific course.
d Includes students in other collegiate courses.
e Partially endowed.
f These are graduates of 1883.
g Includes graduates of 1883.
h Includes graduates for the year.
i These are in ladies' course.
j For both preparatory and collegiate departments.
k Not prescribed.
l These statistics are for the year ending June, 1884; by act of the general assembly at the regular session of 1884, the university became The Tulane University of Louisiana.
m In academic and select courses.
n Average time.

TABLE IX.—*Statistics of universities and colleges for* 1883–'84, *&c.*—Continued.

NOTE.—For statistics of the professional schools or departments connected with any of these institutions, reference is made to the appropriate tables.

	Name.	Collegiate department.																										
		Corps of instruction.				Whole number of students.	Students in classical course.								Students in scientific course.								Special or optional students.	No. of graduate students.	No. of fellowships.	No. of scholarships.	No. of years in collegiate course.	No. of weeks in scholastic year.
		No. of faculty.	No. of resident professors and instructors.	No. of non-resident professors and lecturers.	No. of endowed professorships.		Freshman.		Sophomore.		Junior.		Senior.		Freshman.		Sophomore.		Junior.		Senior.							
							Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.

* From Report of the Commissioner of Education for 1882–'83.
a Total for all departments.
b For students in scientific department, see Table X, Part 2.
c Includes candidates for higher degrees.
d Wholly endowed; also several partially endowed.
e Also about $70,000 of undivided funds for charitable uses.
f College proper not open.
g Scholarships to the amount of $13,000 sold.
h Twenty-eight are unproductive.
i Includes students in other collegiate courses.
j Includes students in philosophical course.
k Partially endowed.
l Not prescribed.
m Includes report of O'Fallon Polytechnic Institute.
n Under classical are included students in scientific course.
o For students in scientific department, see Table X, Part 1.
p These are in commercial course.
q Also an aid fund of $25,000.

* From Report of the Commissioner of Education for 1882–'83.

a Board and tuition.

b Free in all departments of college proper; $60 in preparatory department.

c See Table X, Part I.

d Average charge.

e For incidentals; tuition is free.

f Also $100,000 in unproductive lands.

g Estimated.

h Tuition and incidentals.

i University, academical, and art school funds.

j This financial statement is for the year ending July 31, 1883.

k Current income of the academical department only.

l This appropriation was continued in 1883.

m Also unproductive funds amounting to $820,000.

n Value of grounds and buildings.

o In 1882.

p Includes value of furniture.

q Income from all sources other than tuition.

r Includes $10,700, income from other sources.

s Including 2,365 volumes theological works properly belonging to the Augustana Theological Seminary.

t To those not preparing for the ministry.

* From Report of the Commissioner of Education for 1882-'83.

a As a department of Kentucky University; rechartered and reorganized in 1880.

b These figures are for the School of Mechanic Arts, a subsidiary school under the control of the corporation of the institute.

c These figures are for the School of Industrial Science only.

d Reported with classical department (see Table IX).

e For all departments.

f Of the University of South Carolina, of which the South Carolina College of Agriculture and the Mechanic Arts is a department; this department was organized in 1880, after the university had been in suspension for several years.

TABLE X.—PART 1.—*Statistics of schools of science (mining, engineering, agriculture, &c.) endowed with the national land grant, for* 1883–'84, &c.—Cont'd.

* From Report of the Commissioner of Education for 1882–'83.

a In preparatory department.

b Reported with classical department (see Table IX).

c This includes a large amount of funds received from the estate of the late Joseph E. Sheffield, which funds will not be available to their full extent for several years to come.

d Income from all sources except tuition.

e Incidental fees; tuition is free.

f Entire proceeds of the sale of land scrip, the income of which, $16,954, is, by various acts of the legislature, divided between the State College at Athens and the branches at Cuthbert, Dahlonega, Milledgeville, and Thomasville.

g Entire income of public land scrip fund, which income is divided, as above stated, between the State College at Athens and the branches at Cuthbert, Dahlonega, Milledgeville, and Thomasville.

h See notes on these items given in above report of Georgia State College of Agriculture and the Mechanic Arts.

i Special appropriation for completion of building.

* From Report of the Commissioner of Education for 1882–'83.

a See notes on these items given in above report of Georgia State College of Agriculture and the Mechanic Arts.

b Includes $2,000 from the city.

c Incidental fees; tuition is free.

d Two students appointed by each of 92 counties under State law.

e Estimated.

f Reported with classical department (see Table IX).

g Also two years at sea.

h To residents of the State; $20 to others.

i For two years.

j Including interest on scrip.

k Free to State students.

l Congressional appropriation.

m Except to those receiving scholarships.

n The income of $50,000 which has accrued from the national grant is disbursed at the rate of $100 a scholarship annually, to the extent of the entire annual income, and aids about thirty students each year.

o Agricultural funds only; for university funds, see Table IX.

p Does not include amount arising from sale of congressional land grant.

q Income from land grant.

TABLE X.—PART 2.—*Statistics of schools and of collegiate departments of science (mining, engineering, &c.) not endowed with the national land grant, for 1883–'84; from replies to inquiries by the United States Bureau of Education.*

* From Report of the Commissioner of Education for 1882–'83.

a Atlanta University, although not founded under the act of Congress establishing agricultural colleges, receives an annual appropriation of $8,000 from the legislature of the State of Georgia under an act of 1874, entitled "An act equitably to adjust the claims of the colored people to a share of the agricultural land scrip."

b The place of this college is supplied by the Massachusetts Agricultural College at Amherst. Each successful candidate is allowed, on entering the college, to matriculate also in Boston University, and at graduation may receive his degree at the hands of the university, with a diploma entitling him to the relation and privileges of its alumni.

c A department for elective graduate study only.

d Included in the report of the department of literature, science, and the arts (see Table IX).

e The Manual Training School of Washington University (Table X) and Smith Academy (Table VII) are both preparatory to this school.

f See report of Stevens High School (Table VII).

g Reported with classical department (see Table IX).

TABLE X.—PART 2.—*Statistics of schools and of collegiate departments of science (mining, engineering, &c.) not endowed, &c.*—Continued.

* From Report of the Commissioner of Education for 1882–'83.

a There are also scholarships in the scientific school, not exceeding eight at any one time, of the annual value of $150 for graduates of the State normal schools.

b Free to residents of Worcester County.

c For residents of Michigan, $20; for non-residents, $30.

d Reported with classical department (see Table IX).

e To residents of New Jersey; $225 to others.

f This report embraces only the mechanical handiwork schools and schools of steam engineering.

g See full report of Swarthmore College (Table IX).

h Includes incidentals.

i All State students over 16 years old admitted free to academic schools.

MEMORANDUM.—Michigan State Agricultural College, Lansing, Mich.; post office is now Agricultural College, an office recently established.

* From Report of the Commissioner of Education for 1882-'83.
a No fee required for the third course.
b Value of hospital building.
c Examination fee.
d Suspended after graduating its 1884 class.
e Severed its connection with Butler University in 1883.
f Each candidate for graduation "must file a satisfactory certificate of having studied medicine for at least three years under a regular graduate or licentiate and practitioner of medicine in good standing."
g Value of apparatus.
h At the regular session of the legislature in 1884 this university became Tulane University of Louisiana.
i Estimated.
j This institution does not confer degrees.
k Including dissection fee.
l Value of apparatus and furniture.
m To residents of Michigan; non-residents $25.
n To residents of Michigan; non-residents $35.
o Also a recitation session of 13 weeks.
p Reported with classical department (Table IX).

a 10 of these are B. L. L. (bachelor of Latin letters).
b Includes 1 honorary M. D.
c As far as reported; this does not represent the whole number of degrees conferred by this institution in 1884.
d 5 of these are B. S. cum laude.
e Degrees not specified.
f 8 of these are A. B. cum honore.
g Certificates of graduation.
h Includes 6 "master of law."
i "Bachelor of literature."
j Honorary degree of C. E.

l other professional schools, and by schools for the superior instruction of women.

* From Report of the Commissioner of Education for 1882-'83.

a School for hearing youth, with classes for deaf-mutes.

b These statistics are for both departments of the institution.

c Language is also taught.

d Lip reading is also taught.

e Drawing is also taught.

f Articulation and lip reading are the basis of instruction in this institution.

g Higher branches are also taught.

h Includes some income from other States.

i For board of pupils.

j For two years.

k This school is a part of the public school system and has its rooms in one of the public school buildings.

l Total receipts from all sources.

m A large proportion of this was expended for permanent purposes.

n Includes appropriation from county.

o This institution has three branches, one situated at Fordham, another at Brooklyn (510 Henry street), and another at Throgg's Neck. The statistics here given are for the three branches.

p Value of building, furniture, and apparatus.

q Includes appropriation from counties and cities.

r Includes $2,704 from other sources.

s Kindergarten instruction is given and higher English branches, Latin, and drawing are also taught.

t Six years as county charges; eight years as State charges.

u Territorial appropriation for pupils from Washington Territory.

v Includes $30,000 for buildings.

w Includes $500 for travelling expenses of indigent pupils.

x Free hand drawing and oil painting taught.

Workshop Receipts for the Use of Manufacturers, Mechanics, and Scientific Amateurs. By Rob. Haldane. Second series, devoted mainly to subjects connected with chemistry.	do	do	Crown 8vo	450	2 00
Electricity in Theory and Practice; or the Elements of Electrical Engineering. By Bradley A. Fiske. Illustrated.	D. Van Nostrand	do	8vo	270	2 50
Electricity, Magnetism, and Electric Telegraphy. By Thos. D. Lockwood. Illustrated.	do	do	8vo	2—377	2 50
The Machinists' and Steam Engineers' Calculator. By D. B. Dixon	do	do	16mo		2 00
A Manual of Marine Engineering. By A. E. Seaton. Illustrated	do	do	8vo		6 00
Van Nostrand's Science Series:					
No. 66. Dynamo-Electric Machinery. By Sylvanus P. Thompson. Illustrated.	do	do	24mo	218	50
No. 68. Steam-Heating. By H. Briggs	do	do	24mo		50
No. 69. Chemical Problems. By Ja. C. Foye	do	do	24mo		50
No. 70. Explosive Materials. Series of lectures delivered before the Collége de France, Paris. By M. P. E. Berthelot.	do	do	24mo		50
No. 71. Dynamic Electricity; its Modern Use and Measurement. Illustrated.	do	do	24mo	4—167	50
The Elasticity and Resistance of the Materials of Engineering. By William H. Burr.	J. Wiley & Sons	do	8vo	15+753	5 00
Kinematics; or, Practical Mechanism. By Chas. W. MacCord	do	do	8vo	9+335	5 00

Mechanics of Engineering and of Machinery. By Julius Weisbach: Vol. 3. Part 1, section 1: The Mechanics of the Machinery of Transmission. Second edition, revised and enlarged, by Gustav Hermann. Authorized translation by J. F. Klein. Illustrated.	....do....	....do....	8vo....	67+544		5 00
Elementary Treatise on Physics, Experimental and Applied. By Adolphe Ganot. For the use of colleges and schools. Translated and edited by E. Atkinson. Illustrated. 5 colored plates.	William Wood & Co....	....do....	8vo....	1,020		5 00
A Text-Book on Physics. By Henry Kiddle. Illustrated and 3 colored plates. A short, complete course based upon the larger work of Ganot.	....do....	....do....	8vo....	272		1 75
Optics without Mathematics. By Rev. Thos. W. Webb. Illustrated....	E. & J. B. Young & Co....	....do....	16mo....	2–124		40
Metrical Tables for Engineers. By Olin H. Landreth. Students' edition....	W. S. Fortescue & Co....	Philadelphia, Pa....	....	....		35
Key to Sharpless and Philips's Natural Philosophy....	J. B. Lippincott & Co....	....do....	....	44		60
Natural Philosophy. By Prof. I. Sharpless and Prof. G. M. Philips....	....do....	....do....	12mo....	350		1 20
MEDICINE, SURGERY, AND SANITARY SCIENCE.						
A Hand-Book of Skin Diseases and their Homœopathic Treatment. By John R. Kippax, M. D. Second edition, revised, enlarged, and illustrated.	Duncan Bros....	Chicago, Ill....	12mo....	292		2 00
Lectures on Fevers. By J. R. Kippax, M. D. Illustrated....	Gross & Delbridge....	....do....	8vo....	400		4 50
A Practical Treatise on the Medical and Surgical Treatment of Diseases and Injuries of the Eye. By **J. H. Buffum, M. D. Illustrated and 25 colored** lithographs.	....do....	....do....	8vo....	450		4 50
Bacteria and the Germ-Theory of Disease. By H. Gradle, M. D....	W. T. Keener....	....do....	8vo....	4+219		2 00
Medical Education and the Regulation of the Practice of Medicine in the United States and Canada. Prepared by the Illinois State Board of Health. Second edition, revised and corrected to March 1, 1884.	....do....	....do....	8vo....	8+270		3 00
On the Relations of Micro-Organisms to Disease. By William I. Belfield, M. D. Illustrated.	....do....	....do....	12mo....	131		1 25
Medical Bibliography. By John S. Billings, M. D....	Isaac Friedenwald....	Baltimore, Md....	....	23	....	....
Sea-Sickness; its Cause, Nature, and Prevention without Medicine or Change in Diet. By William H. Hudson.	S. E. Cassino & Co....	Boston, Mass....	16mo....	147		1 25
The Medical Register for New England. By Francis H. Brown, M. D....	Cupples, Upham & Co....	....do....	16mo....	512		2 00
The Reproductive Process; its Histology, Physiology, and Pathology. By G. B. Ercolani. Translated by H. O. Marcy, M. D. Second edition, enlarged and revised. With a quarto atlas of sixteen engravings. 2 volumes.	Houghton, Mifflin & Co....	....do....	8vo....	8+403		6 00
Brand's Lessons on the Human Body....	Leach, Sherrell & Sanborn....	....do....	....	....		55
Health and Strength for Girls. By Mary J. Safford, M. D., and Mary E. Allen.	D. Lothrop & Co....	....do....	16mo....	4–88		60
A Plea for the Cure of Rupture. By Jos. H. Warren, M. D....	James R. Osgood & Co....	....do....	12mo....	....		1 25
The Collective Investigation of Diphtheria, as conducted by the Therapeutic Gazette, Detroit, Mich. By J. J. Mulheron, M. D.	G. S. Davis....	Detroit, Mich....	8vo....	120		75
Gout in its Protean Aspects. By J. Milner Fothergill, M. D....	....do....	....do....	16mo....	300		2 50
Pearls of Wisdom; Gems of Knowledge for All; Common-Sense Prescriptions and Practical Information: A Systematic Treatment in the Domestic Practice of Medicine. By Paul Barrington Jones, M. D.	Kansas City Book and News Company.	Kansas City, Mo....	12mo....	3–150		50
Electricity in Medicine and Surgery. By George C. Pitzer, M. D. Second edition, enlarged.	George C. Pitzer....	St. Louis, Mo....	12mo....	83		1 00
Brain Exhaustion. By J. Leonard Corning, M. D....	D. Appleton & Co....	New York, N. Y....	12mo....	2–234		2 00
Diseases of Modern Life. By Benjamin Ward Richardson, M. D. New cheap edition.	....do....	....do....	12mo....	12+520	Paper,	10
The Elements of Anatomy, Physiology, and Hygiene. By Roger S. Tracy, M. D.	....do....	....do....	12mo....	....		1 25

MEDICINE, SURGERY, AND SANITARY SCIENCE—Continued.					
The Organs of Speech and their Application in the Formation of Articulate Sounds. By Geo. Herman von Meyer. Illustrated. The International Science Series, vol. 46.	D. Appleton & Co	New York, N. Y	12mo	12+349	$1 75
A Practical Treatise on Materia Medica and Therapeutics. By Roberts Bartholow, A. M., M. D. Fifth edition.	do	do	8vo	739	5 00
The Relation of Animal Diseases to the Public Health, and their Prevention. By Frank S. Billings.	do	do	8vo		4 00
An Abridgment of the Hygienic Physiology, with Special Reference to Alcoholic Drinks and Narcotics. By Joel Dorman Steele. For use of schools. Illustrated.	A. S. Barnes & Co	do	12mo	8–192	1 25
Steele's Hygienic Physiology	do	do			1 17
A Complete Hand Book of Treatment. By Will Aitken, M. D. Alphabetical index of diseases, containing nearly 1,000 formulæ.	Bermingham & Co	do	12mo	444	2 00
The Diagnosis and Treatment of Diseases of the Ear. By Oren D. Pomeroy, M. D. Illustrated.	do	do	8vo	392	3 00
Diseases of the Bladder, Prostate Gland, and Urethra, including a Practical View of Urinary Diseases, Deposits, and Calculi. By F. J. Gant, M. D. Fifth edition, revised, and enlarged by over 150 pages. Illustrated.	do	do	8vo	616	3 50
The Hip and its Diseases. By V. P. Gibney, M. D. Illustrated	do	do	8vo	412	3 00
Manual of Operative Surgery. By Joseph D. Bryant, M. D. Illustrated	do	do	8vo	593	4 00
The Pathology, Diagnosis, and Treatment of the Diseases of Women. By Graily Hewitt, M. D. New American edition, from the fourth revised and enlarged London edition. Edited, with notes and additions, by Harry Marion-Sims, M. D. 2 vols. Illustrated.	do	do	12mo	20–33+469; 14–17+561	4 50
A Practical Manual of the Diseases of Children. By Edward Ellis, M. D. Fourth edition, revised and enlarged.	do	do	8vo	218	1 00
Surgical Emergencies; Life-Saving Operations. By L. Von Lesser, M. D. Translated and revised by Fred. A. Lyons, M. D.	do	do	12mo	215	1 50
A Systematic Treatise upon the Science and Preservation of Health. Edited by Malcolm Morris. Illustrated.	Cassell & Co	do	8vo	1,092	5 00
The Laws of Health, Physiology, Hygiene, Stimulants, Narcotics. By Dr. Joseph C. Hutchison.	Clark & Maynard	do	12mo	223	75
The Diseases of Memory. By Théodule Ribot. Translated from the French by J. Fitzgerald.	J. Fitzgerald	do	8vo	48	Paper, 15
The Diseases of the Will. By Théodule Ribot. Translated from the French by J. Fitzgerald.	do	do	8vo	45	15
Sound Bodies for Our Boys and Girls. By William Blaikie. Illustrated	Harper & Bros	do	16mo	9+168	40
The Human Body. By H. Newell Martin. Briefer course. American Science Series.	Henry Holt & Co	do			1 50

The Horse's Foot and its Diseases. By A. Zundel. From the French by A. Liautard, M. D. Illustrated.	Wm. R. Jenkins	do	8vo			1 50
Text-Book of Pathological Anatomy and the Pathogenesis. By Ernst Ziegler. Translated and edited for English students, by Donald MacAlister. Part 2: Special pathological anatomy, sec. 1–8.	Macmillan & Co	do	8vo	17+371		3 50
Alcohol, What It Is, What Harm It Does, and What To Do With It. By Rev. C. H. Buck. Chautauqua text-book, No. 45.	Phillips & Hunt	do	24mo	87		10
Catarrh, Sore Throat, and Hoarseness. A Description of the Construction, Action, and Uses of the Nasal Passages and Throat. By J. M. W. Kitchen, M. D. Illustrated.	G. P. Putnam's Sons	do	Sq. 16mo	3+80		1 00
The Diseases of Children: A Hand-Book for Practitioners and Students. By Armand Semple, M. D.	do	do	12mo	16+352		1 75
Eczema and its Management: A Practical Treatise Based on the Study of Three Thousand Cases of the Disease. By L. Duncan Bulkley, M. D. Second edition.	do	do	8vo	12+344		3 00
Health Notes for Students. By Burt G. Wilder, M. D.	do	do	24mo	8+58		20
The Home Physician. By Luther M. Gilbert, M. D.	do	do	16mo	6+131		1 00
Medical Ethics and Medical Etiquette. By Drs. Post, Ely, Vanderpoel, Pitcher, Hun, Wey, Agnew, Jacobi, and others.	do	do	12mo			1 25
Notes on the Opium Habit. By Asa P. Meylert, M. D.	do	do	16mo	36		25
Students' Manual of Diseases of the Nose and Throat. By J. M. W. Kitchen, M. D. Illustrated.	do	do	16mo	6+127		1 00
Training Schools for Nurses. By W. G. Thompson, M. D. With notes on twenty-two schools.	do	do	16mo	6+57		60
A Year Book of Surgery for 1883. Edited by Chas. H. Knight, M. D.	do	do	12mo	11+197		1 50
A Year Book of Therapeutics for 1883. Edited by Royal W. Amidon, M. D.	do	do	12mo	8+250		1 50
Sexual Neurasthenia: Its Hygiene, Causes, Symptoms, and Treatment. By George M. Beard, M. D. Edited by A. D. Rockwell, M. D.	E. B. Treat	do	8vo	300		2 00
A Doctor's Suggestions upon Various Subjects. By Daniel B. St. John Roosa, M. D.	J. H. Vail & Co	do	12mo	234		1 50
The Essentials of Bandaging. By Berkeley Hill. Fifth edition, revised and enlarged.	do	do	12mo	13+341		1 75
Pharmacopœia Germanica. Translated by C. L. Lochman. Second edition.	do	do	8vo	8+295		2 50
Practical Hints and Formulas for Busy Druggists. By Benjamin Lillard. Vol. I. Part 1.	do	do	8vo	80		1 00
Practical Introduction to Medical Electricity. By A. De Watteville. Second edition. Illustrated.	do	do	8vo	10+208+6		3 00
The Air We Breathe and Ventilation. By Henry A. Mott, jr. Illustrated.	John Wiley & Sons	do	16mo	81		1 00
Physiological Cruelty; or Vivisection. 1 vol	do	do	8vo			1 25
Diagnosis and Treatment of Diseases of the Heart. By Constantin Paul. Illustrated.	William Wood & Co	do	12mo	335		1 25
Diagnosis of Ovarian Cysts by Means of Examination of their Contents. By Henry J. Garrigues, A. M., M. D. Illustrated.	do	do	8vo	112		1 25
A Guide to American Medical Students in Europe. By Henry Hun, M. D.	do	do	8vo	151		1 25
Hand Book of Therapeutics. By Sidney Ringer, M. D. Tenth edition	do	do	8vo	6+8		5 00
Hooper's Physician's Vade-Mecum; a Manual of the Principles and Practice of Physic, with an Outline of General Pathology, Therapeutics, and Hygiene. Revised by Wm. A. Guy and John Harley. Tenth edition. Vol. 2. Illustrated.	do	do	8vo	360	Subs.,	1 25
Manual of General Medicinal Technology, including Prescription Writing. By Ed. Curtis, M. D. (Wood's pocket manuals.)	do	do	32mo	234		1 00

MEDICINE, SURGERY, AND SANITARY SCIENCE—Continued.					
Manual of Practical Hygiene. By Edmund A. Parkes, M. D. In 2 vols. Illustrated. Edited by F. S. B. François de Chaumont, M. D. Sixth edition, with an appendix prepared by and under the supervision of F. N. Owen. Wood's Library of Standard Medical Authors.	William Wood & Co	New York, N. Y	8vo	15+968; 7+556	Sub., ea. $1 25
The Medical Student's Manual of Chemistry. By R. A. Witthaus, M. D. Illustrated.	do	do	8vo	370	3 50
Mental Pathology and Therapeutics. By W. Griesinger, M. D. Translated from the German by C. Lockhart Robertson, M. D., and James Rutherford, M. D. Wood's Library of Standard Medical Authors.	do	do	12mo	8+375	1 25
The Pathology and Treatment of Diseases of the Ovaries. By Lawson Tait. Fourth edition, rewritten and enlarged.	do	do	8vo	357	3 50
The Pathology, Diagnosis, and Treatment of Diseases of the Rectum and Anus. By Charles B. Kelsey, M. D. Illustrations and plates.	do	do	8vo	430	4 00
The Physiological Factor in Diagnosis. By J. Milner Fothergill, M. D	do	do	8vo	256	2 25
Practical Manual of Obstetrics. By E. Verrier. Fourth edition, enlarged and revised, with the four obstetric tables of Professor Payot. First American edition, revised by E. L. Partridge.	do	do	8vo	21+395	1 25
A Practical Treatise on the Medical and Surgical Uses of Electricity. By Geo. M. Beard, M. D., and A. D. Rockwell, M. D. Illustrated. Fourth edition, revised by A. D. Rockwell, M. D.	do	do	8vo	758	5 50
The Principles and Practice of Veterinary Medicine. By Wm. Williams. First American, from the last English, edition, revised and enlarged. Illustrated with 7 plates.	do	do	8vo	589	5 00
Quain's Anatomy. Edited by Allen Thomson, M. D., Edward Albert Schäfer, and Geo. Dancer Thane. Ninth edition. 2 vols. Illustrated.	do	do		13+747; 0+947	12 00
Studies in Pathological Anatomy. By Francis Delafield, M. D. Vol. 2. Part I. Broncho-pneumonia.	do	do	8vo	15 p. +12 pl.	Paper, 2 00
A System of Surgery, Theoretical and Practical. Edited by T. A. Holmes and J. W. Hulke. Third English edition. 3 vols. Illustrated.	do	do	8vo	31+1100; 24+964; 20+943	7 00
A Text-Book of General Pathology, Anatomy, and Pathogenesis. By Ernst Ziegler. Translated and edited for English students by Donald MacAlister.	do	do	12mo	371	1 25
A Treatise on Bright's Disease of the Kidneys; its Pathology, Diagnosis, and Treatment. By Henry B. Millard, M. D., A. M. Illustrated.	do	do	8vo	14+246	2 50
A Treatise on the Diseases of the Nervous System. By Jas. Ross, M. D. Second edition. 2 vols. Illustrated.	do	do	8vo	1023; 1047	15 00

The Treatment of Wounds; its Principles and Practice, General and Special. By Louis S. Pilcher, M. D. Illustrated. Wood's Library of Standard Medical Authors.	....do....	....do....	12mo....	12+391	Subs.,	1 25
Types of Insanity; Illustrated Guide in the Physical Diagnosis of Mental Disease. By Allen McLane Hamilton, M. D. With plates.	....do....	....do....	4to....	36		2 50
Veterinary Medicine and Surgery in Diseases and Injuries of the Horse. Edited by K. O. Kirby. Illustrations and colored plates.	....do....	....do....	8vo....	332		1 25
History of Tuberculosis from the Time of Sylvius to the Present Day. By Eric E. Sattler, M. D. From the German of Dr. Arnold Spina, with notes and additions. 1 vol.	Rob. Clarke & Co....	Cincinnati, Ohio....	12mo....	191		1 25
The Homœopathic Domestic Physician. By Constantine Hering, M. D....	F. E. Boericke....	Philadelphia, Pa....	8vo....	458		2 50
Repertory to the Symptoms of Intermittent Fever. By William A. Allen, M. D.	....do....	....do....	12mo....	107		1 25
American Homœopathic Pharmacopœia. Revised and augmented by Jos. T. O'Connor, M. D. Second edition.	Boericke & Tafel....	....do....	8vo....	511		3 50
The Book of Prescriptions. By Henry Beasley. Sixth edition, revised and enlarged.	P. Blakiston, Son & Co....	....do....	12mo....	....		2 25
A Compend of Surgery. By Orville Horwitz, M. D. Illustrated. Quis Compend, No. 9.	....do....	....do....	16mo....	....		1 00
Dental Medicine. A Manual of Dental Materia Medica and Therapeutics for Students and Practitioners. By Ferdinand J. S. Gorgas, M. D.	....do....	....do....	8vo....	315		3 00
Diagnosis of Diseases of the Spinal Cord. By Will. R. Gowers, M. D. Third edition. Illustrated.	....do....	....do....	8vo....	92		1 50
Digest of Materia Medica and Pharmacy, forming a Complete Pharmacopœia, for the Use of Physicians, Druggists, and Students. By Albert Merrell, M. D.	....do....	....do....	8vo....	....		4 00
The Elements of Pathology. By E. Rindfleisch, M. D. Translated by Wm. H. Mercur, M. D. Revised and edited by Ja. Tyson.	....do....	....do....	8vo....	....		5 00
Enteric Fever, its Prevalence and Modifications. By Francis H. Welch....	....do....	....do....	8vo....	8+180		2 00
The Essentials of Pathology. By D. Tod Gilliam. Illustrated....	....do....	....do....	12mo....	....		2 00
Hand-Book of Hygiene and Sanitary Science. By Geo. Wilson, M. D. Fifth edition, enlarged and revised. Illustrated.	....do....	....do....	12mo....	....		2 75
A Handbook of the Theory and Practice of Medicine. By Fred. T. Roberts. Fifth edition, revised. Illustrated.	....do....	....do....	8vo....	1,000		5 00
Indigestion, What It Is, What It Leads To, and a New Method of Treating It. By John Beadnell Gill, M. D. Third edition.	....do....	....do....	16mo....	....		1 25
Lectures on Diseases of the Nervous System. By Samuel Wilkes, M. D. Second edition.	....do....	....do....	8vo....	602		....
Lectures on Practical Pharmacy. By Barnard S. Proctor. Second edition, with additions and corrections.	....do....	....do....	8vo....	....		4 50
The Lettsomian Lectures on the Treatment of Some of the Forms of Valvular Disease of the Heart. By A. Earnest Sansom, M. D.	....do....	....do....	12mo....	....		1 50
A Manual of Physiology. By Gerald F. Yeo, M. D. For use of medical students. Illustrated.	....do....	....do....	8vo....	700		4 00
Manual of Psychological Medicine and Allied Nervous Diseases. By Edward C. Mann, M. D.	....do....	....do....	8vo....	700		5 00
Materia Medica: For the Use of Students. By John B. Biddle. Ninth edition, revised by Clement Biddle, M. D., and Henry Morris, M. D. Illustrated.	....do....	....do....	8vo....	500		4 00
Pocket-Book of the Physical Diagnosis of the Diseases of the Heart and Lungs. By Edward T. Bruen, M. D. Second edition, revised and rewritten. Illustrated.	....do....	....do....	12mo....	228		1 50
Post-Nasal Catarrh and Diseases of the Nose Causing Deafness. By Edward Woakes, M. D. Illustrated.	....do....	....do....	12mo....	240		1 50
